

Managed Router

A smart solution for your critical network needs. Many problems can be traced to the router. Delays, unauthorized access, denial of access to authorized users and configuration errors create network slowdowns.

FEATURES:

Router Installation: Our expert technicians will configure and install the router equipment.

Configuration Management: We'll back up the router configuration so changes aren't lost if an outage occurs.

Change Management: All of your network moves, adds or changes are managed for you.

Hardware Replacement: Kinetic Business will spare company-owned equipment when necessary.

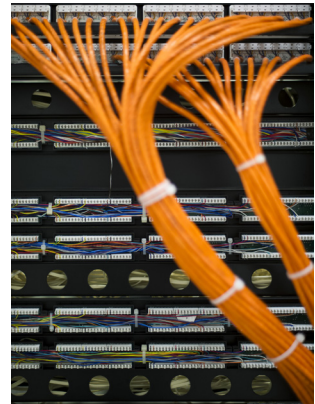

Security: Security measures will protect the router from unauthorized access.

BENEFITS:

Reduce Operational Costs: Kinetic Business manages the router configuration, installation, maintenance and repair, saving you internal network management costs.

Increase Productivity: Free up IT resources for more business-critical projects. As necessary, Kinetic Business will replace faulty equipment, minimizing the impact to your business.

Gain Access to Expert Knowledge: Our Managed Router experts are available 24 x 7 so you can have peace of mind knowing the managed router is working properly.

From router configuration to installation, management to maintenance, the Managed Router from Kinetic Business takes over the responsibility of managing the network-edge router.
