MPLS

Private connectivity for multi-site businesses. Multi-Protocol Label Switching (MPLS) provides networking solutions that extend communications across multiple business locations. MPLS enables users to prioritize voice or data through Quality of Service (QoS) levels, based on their unique business requirements.

SCALABILITY

Reduce costs and improve performance by consolidating diverse network types, allowing data to travel over multiple access technologies, including Ethernet, T1, Cable, wireless or DSL.

Private wireless 3G and 4G data access enables cost-effective and rapid deployment of locations while providing greater resiliency when used in a back-up configuration with existing high-speed access.

HIGH PERFORMANCE

Prioritize real-time applications with four Classes of Service, helping reduce network congestion.

Guaranteed network performance with SLAs for availability, jitter and latency to keep your applications running at peak performance.
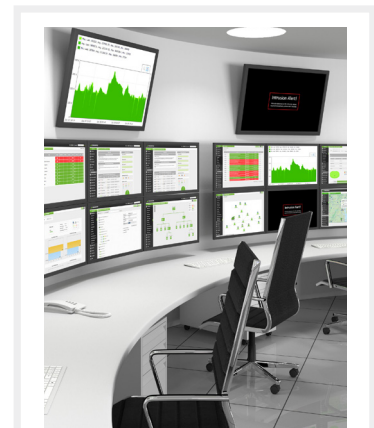

Compatible with all industry standard VoIP protocols and VoIP applications.

FULLY MANAGED

Fully managed equipment, routing, security and configurations to reduce management expenses.

Kinetic Business by Windstream assumes responsibility for technology management and evolution to reduce your risk.

24/7 access to a U.S.-based technical support team.

Kinetic Business MPLS VPN is a private, secure solution built across the Kinetic Business by Windstream's nationwide fiber network that enables a seamless transition to a Hybrid WAN and SD-WAN on an evolution path you control.

MPLS

Private and Secure
Complete isolation from other traffic over dedicated paths on Kinetic Business by Windstream's private backbone
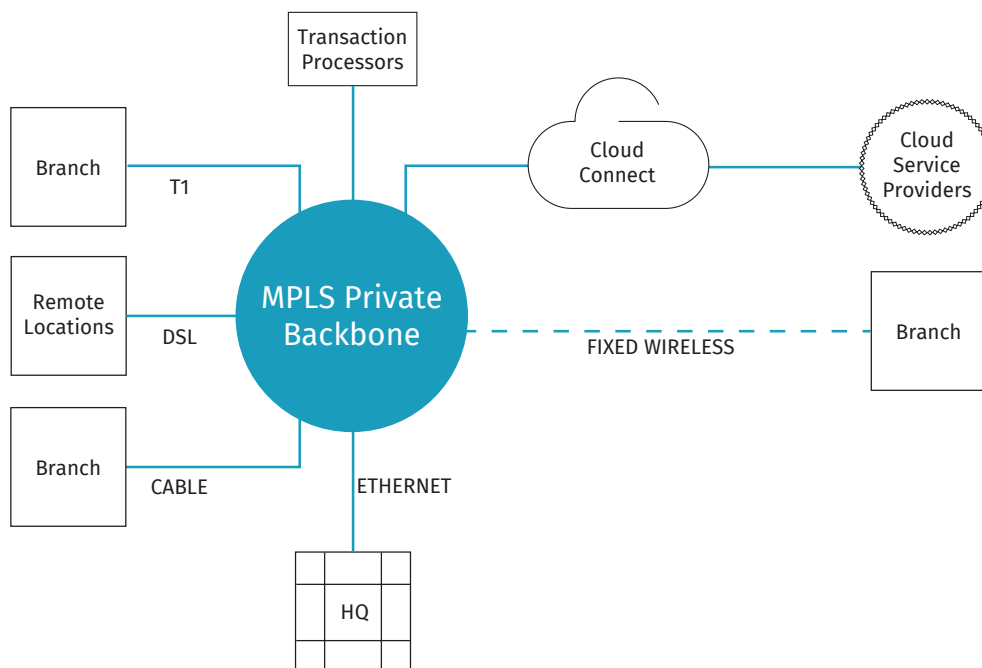

Customized Performance
Prioritize voice or data via quality of service levels; SLAs for latency, jitter, packet loss and availability

Simplified Management
Shift routine maintenance and day-to-day monitoring and issue resolution to our experts

Highly Flexible
Add broadband connections to create a Hybrid WAN or augment with SD-WAN for cost efficiencies

WHY MPLS VPN FROM KINETIC BUSINESS?
Hybrid Network Expertise
Kinetic Business by Windstream has 15+ years of experience working with broadband and cellular providers building Hybrid WANs across North America.

Optimize Cloud-based Applications
Cloud Connect service provides private connectivity from your WAN to Cloud Service Providers for increased performance and security.
