### **Additional Details:**

#### **Description of the Planned Network Change(s):**

The DMS500 switch, located at 245 N MAIN ST, Hudson, OH 44236, will be decommissioned, powered down, and removed from Windstream's network as a result of network modernization and consolidation. All traffic will need to be routed to the HDSNOHXAPS0 Meta Switch. Windstream number blocks are being moved to HDSNOHXAPS0 Meta Switch.

#### **Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):**

Competitive local exchange carriers (CLECs), interexchange carriers (IXCs, IECs), wireless carriers, and paging carriers will need to secure new trunk groups built to the HDSNOHXAPS0 Meta Switch or have existing trunk groups to that switch augmented. Carriers that are code

holders for access connectivity in the Hudson, OH DMS500 switch will be required to reposition the codes to the HDSNOHXAPS0 Meta Switch.

All ASRs for the HDSNOHXAPS0 Meta Switch must be received no later than June 1, 2022 in order to provide sufficient time to migrate the traffic described above. These direct end office trunk (DEOT) interconnections will support traffic migration for the Hudson, OH DMS500 switch prior to its eventual decommissioning. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the Hudson, OH DMS500 switch (on or after June 4, 2022). This will serve to guide interconnect re-routes of Windstream traffic for native code currently served by the Hudson, OH DMS500 switch to reflect the HDSNOHXAPS0 Meta Switch as the new home switch. All ASRs for the HDSNOHXAPS0 Meta Switch must carry the project code of HDSNOHXAPS0.
