PRICE GUIDE FORMAT

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially, however, new pages are occasionally added to the Price Guide. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the LPSC. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14.
- C. Paragraph Numbering Sequence - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:
 - 2.
 - 2.1
 - 2.1.1
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.a.
 - 2.1.1.A.1.a.1.
- D. Check Sheets - When a Price Guide filing is made with the LPSC, an updated check sheet accompanies the Price Guide filing. The check sheet lists the pages contained in the Price Guide, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The Price Guide user should refer to the latest check sheet to find out if a particular page is the most current on file with the Louisiana PSC.

The Public Pay Telephone Surcharge, which is in addition to standard rates, terms and pricing guide usage charges and any applicable service charges and surcharges associated with the Company's service, applies for the use of the instrument used to access the Company service and is unrelated to the Company's service accessed from the pay telephone.

SECTION 3 - DESCRIPTION OF SERVICE

3.1 General

The Company provides direct dialed, operator assisted long distance telecommunications services originating and terminating within the State of Louisiana. Rates for these services may vary by product type, call duration, mileage and time of day. All Company services are available 24 hours a day, seven days a week. (D)

3.2 Timing of Calls

Long distance charges are based on the actual usage of the Company's network. Chargeable time begins when the called party answers, or when the billed party of a collect or person call accepts the charges. Chargeable time ends when either party disconnects.

Minimum call durations and rounding of usage measurements for billing purposes are specified in Section 4 of this Price Guide for each service provided by the Company.

Computation of Charges

For the computation of charges, the duration of each call is measured and rounded up to the applicable billing increment, then multiplied by the applicable rate and if the computed charge for any individual call results in a fraction of a cent, the fraction is then rounded up to the next whole cent on a per call basis. For example, a service may provide that each call will be charged a minimum of 18 seconds and thereafter timed in 6-second increments; therefore, under this example, a 10-second call will be rounded up to 18 seconds (0.3 minutes), and a 44-second call will be rounded up to 48 seconds (0.8 minutes). If, after multiplying the billing increment by the applicable rate, the computed charge for an individual call results in a fraction of a cent, the fraction is rounded up to the next whole cent (for example, \$1.523 would round up to \$1.53). Once the charge for each call is computed as described above, the calls are summed on the Customer's invoice.

There is no billing applied for incomplete calls.
