**SECTION 1 – PRICE GUIDE INFORMATION**

1.1 SYMBOLS

The following symbols shall be used in this price guide for the purpose indicated below:

- (C) - To signify changed regulation or condition.
- (D) - To signify a discontinued material, including listing, rate, rule or condition.
- (I) - To signify an increased rate.
- (M) - To signify material relocated from or to another part of price guide schedule with no change in text, rate, rule or condition.
- (N) - To signify new material including listing, rate, rule or condition.
- (R) - To signify a reduction.
- (S) - To signify reissued material.
- (T) - To signify change in wording of text but not change in rate, rule or condition

1.2 TRADEMARKS AND SERVICE MARKS

Designations used by the company to distinguish its products and services are claimed as trademarks or service marks. Rather than printing a trademark symbol or service mark symbol with every occurrence of a trademarked or service marked product name as it is used throughout this price guide, let it be stated that when using names of Company products and services herein, such use is in an editorial fashion. Following are the proper use names of the Company trademarks and service that are referred to herein in terms of products and service offerings.

1.2.1 Registered Trademarks

PowerPath<sup>SM</sup>  
PowerPath Network<sup>SM</sup>

1.2.2 Service Marks

CTC Customizer<sup>sm</sup>  
CTC Optimizer<sup>sm</sup>  
CTC Complete<sup>sm</sup>  
CTC Direct<sup>sm</sup>  
CTC Business Basic<sup>sm</sup>  
CTC Business Plus<sup>sm</sup>  
PowerNet<sup>sm</sup>

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 1 – PRICE GUIDE INFORMATION (CONT'D.)**

1.3 PRICE GUIDE FORMAT

1.3.1. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the price guide. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

1.3.2. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet in effect. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14.

1.3.3. Paragraph Numbering Sequence - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.a
- 2.1.1.A.1.a.1.

1.3.4. Check Sheets - When a price guide revision is made, an updated check sheet accompanies the price guide revision. The check sheet lists the sheets contained in the price guide, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages).

1.4 Application of Price guide

This price guide sets forth the service offerings, rates, terms and conditions applicable to the furnishing of facilities-based intrastate end-user data and voice telecommunications communications services by EarthLink Business., to business customers within the Commonwealth of Massachusetts.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 1 – PRICE GUIDE INFORMATION (CONT'D.)**

1.5 Definitions

Certain terms used generally throughout this price guide are defined below.

**Advance Payment:** Part or all of a payment required before the start of service.

**Asynchronous Transmission Mode (ATM):** A high-speed switching technique that uses fixed type cells to transmit voice, video and data over fiber optic cabling.

**Automatic Number Identification (ANI):** Allows the automatic transmission of a caller's billing account telephone number to a local exchange company, interexchange carrier or a third party subscriber. The primary purpose of ANI is to allow for billing of toll calls.

**Bit:** The smallest unit of information in the binary system of notation.

**Broadband.** A data transmission scheme where multiple transmissions including voice, data and video share a communications path.

**Byte.** A grouping of Bits. A Byte may or may not be directly translatable into information meaningful to the user.

**Committed Information Rate (CIR):** The speed of transmission guaranteed between a customer's site and the frame relay network.

**Communications Services:** The Company's intrastate data and voice ATM switched telecommunications services offered for both limited intraLATA and interLATA use.

**Company:** CTC Communications Corp. the issuer of this price guide.

**CTC:** CTC Communications Corp. the issuer of this price guide, unless otherwise indicated by the context.

**Customer or Subscriber:** The person, firm or corporation which orders service and is responsible for the payment of charges and compliance with the Company's regulations.

**Department:** The Massachusetts Department of Telecommunications and Cable

**DSX-1 Panel:** Distribution equipment used to terminate and administer DS1 (1.544 Mbps) circuits.

**Dual Tone Multi-Frequency (or "DTMF"):** The pulse type employed by tone dial station sets.

**Duplex Service:** Service which provides for simultaneous transmission in both directions.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 1 – PRICE GUIDE INFORMATION (CONT'D.)**

1.5 Definitions (Cont'd.)

**Ethernet:** A local area network protocol defined by the IEEE. It defines how data is transmitted on and retrieved from local area computer networks.

**Federal Communications Commission (or “FCC”):** Independent government agency that develops and implements policy concerning interstate and international communications.

**Fiber Optic Cable:** A thin filament of glass with a protective outer coating through which a light beam carrying communications signals may be transmitted by means of multiple internal reflections to a receiver, which translates the message.

**Frame Relay.** A public, primarily data network service for local area network to local area network connections.

**Gateway:** A device which allows equipment with different protocols to communicate with each other.

**Integrated Access Device (IAD)** Installed at Customer’s location, this equipment converts voice and data traffic into ATM Cells.

**Integrated Communications Network (ICN):** The Company’s facilities-based network which utilizes ATM switching protocol to provide uncompressed PVC based voice connectivity, variable CIR, Full Port CIR and Hybrid Frame Relay/ATM service, dedicated internet access and videoconferencing connectivity services.

**Kbps:** Kilobits per second, denotes thousands of bits per second.

**Key System:** A Key system is an on-site telephone system geared to under 100 telephone organizations. Like a PBX, a Key System switches calls to and from the public network and within the user’s organization.

**Local Access and Transport Area (LATA)** A Local Access and Transport Area established pursuant to the Modification of Final Judgment entered by the United States District Court for the District of Columbia in Civil Action No. 82-0192; or any other geographic area designated as a LATA in the National Exchange Carrier Association, Inc. Price guide F.C.C. No. 4.

**Local Area Network(LAN):** Located on an individual organization’s premises, a LAN enables computer devices to communicate with each other.

**SECTION 1 – PRICE GUIDE INFORMATION (CONT'D.)**

1.5 Definitions (Cont'd.)

Local Exchange Carrier or ("LEC"): Denotes any individual, partnership, association, joint-stock company, trust or corporation engaged in providing switched communication within an exchange.

Master Service Agreement: The master document executed by the Customer and the Company under which all Company services are provided. The Master Services Agreement sets forth the general terms and conditions under which services will be provided.

Mbps: Megabits, denotes millions of bits per second.

Multi-Frequency or ("MF"): An inter-machine pulse-type used for signaling between telephone switches, or between telephone switches and PBX/key systems.

Multiplexing: A Technique whereby multiple devices can share one telephone line.

Permanent Virtual Circuit (PVC): A point to point connection through the Company's ICN connecting two locations.

Private Branch Exchange (PBX): A computerized on-site telephone system located on a Customer's premises which routes calls both within an organization and from the outside world to people within the organization.

Recurring Charges: The monthly charges to the Customer for services, facilities and equipment, which continue for the agreed upon duration of the service.

Service Commencement Date: The first day following the date on which the Company notifies the Customer that the requested service or facility is available for use, unless extended by the Customer's refusal to accept service which does not conform to standards set forth in the Service Order or this price guide, in which case the Service Commencement Date is the date of the Customer's acceptance. The Company and Customer may mutually agree on a substitute Service Commencement Date.

**SECTION 1 – PRICE GUIDE INFORMATION (CONT'D.)**

1.5 Definitions (Cont'd.)

**Service Addendum:** The written request for a specific Network Services executed by the Customer and the Company in the format devised by the Company. The signing of a Service Addendum by the Customer and acceptance by the Company initiates the respective obligations of the parties as set forth therein and pursuant to this price guide, but the duration of the service is calculated from the Service Commencement Date. Service Addenda are incorporated into the terms of the Master Service Agreement.

**Shared:** A facility or equipment system or subsystem that can be used simultaneously by several Customers or several Customer locations.

**Two Way:** A service attribute that includes outward dial capabilities for outbound calls and can also be used to carry inbound calls to a central point for further processing.

**User or End User:** A Customer, Joint User, or any other person authorized by a Customer to use service provided under this price guide.

**Wide Area Network (WAN):** Connects computers which are located in different cities, states and countries.

**SECTION 2 - REGULATIONS**

2.4 Convenience Fee

In the event a business Customer makes a one-time or recurring payment using a credit or debit card, a Convenience Fee Charge may apply. Any payments for a deposit or advance payment to establish new service are excluded from the Convenience Fee Charge. This charge does not apply to residential Customers or to business Customers that make payment using their financial institution's bill payment service, Customers with negotiated contracts that do not allow the assessment of this fee, or Customers without a computer. This fee, not to exceed \$139.95, will be assessed at the point of payment and will not appear on the Customer's invoice.

**SECTION 3 - ACCESS ORDER CHARGES**

3.1 General

An Access Service Order is used by the Company to provide a CTC PowerPath<sup>SM</sup> Service, as set forth in Section 4, following and other services as set forth in this price guide. A Customer may order any number of services of the same type and between the same premises on a single Access Order. All details for services for a particular order must be identical except for those for multipoint service.

An Access Service Order is used by the Company to provide a CTC PowerPath<sup>SM</sup> Service as set forth in Section 4, following and other services as set forth in this price guide. A Customer may order any number of services of the same type and between the same premises on a single Access Order. All details for services for a particular order must be identical except for those for multipoint service.

When placing an order for CTC PowerPath<sup>SM</sup> Service, the Customer shall provide to the Company the following information.

- Customer name and premises address(es).
- Billing name and address (when different from Customer name and address).
- Customer contact name(s) and telephone number(s) for the following provisioning activities: order negotiation, order confirmation, interactive design, installation and billing.

**SECTION 3 - ACCESS ORDER CHARGES (CONT'D.)**

3.2 Cancellation

A Customer may cancel an Access Order for the installation of any of the services described herein, at any time prior to notification by the Company that service is available for the Customer's use or prior to the service date, whichever is later. The cancellation date is the date the Company receives written or verbal notice from the Customer that the order is to be canceled. The verbal notice must be followed by written confirmation within ten (10) days. If a Customer or an end user is unable to accept Access Service within thirty (30) calendar days after the original service date, the Customer has the choice of the following options:

- The Access Order shall be canceled and charges set forth in 11, following will apply, or
- Billing for the service will commence.

If no cancellation request is received within the specified thirty (30) calendar days, billing for the service will commence. In any event, the cancellation date or the date billing is to commence, as applicable, shall be the thirty-first (31st) day beyond the original service date of the Access Order.

The Rates and Charges for cancellation of an Access Order are set forth in Section 10, following. The Rate charged will be dependent on whether a Firm Order Commitment (FOC) has been set.

**SECTION 3 - ACCESS ORDER CHARGES (CONT'D.)**

3.3 Expedite Access Orders and Service Channels

At the request of the Customer Access Order may request to expedite their Access Order for CTC PowerPath<sup>SM</sup> Service as set forth in Section 4, following or Service Channels as set forth in Section 4, and 7 of this price guide and non-regulated Service Channels as set forth in their Contract. All Expedited Orders and / or negotiated dates must be agreed upon by the Company.

If the Company agrees to an Expedited Order and then does meet that negotiated date, the Customer will not be subject to the Expedite Charge as set forth in the 4.6, following.

3.3.1 Liabilities

The Company shall be indemnified, defended and held harmless by the Customer, the Customer's agent, personnel and against any claim, loss or damage for loss of business for such missed expedited order and service date.

3.3.2 Rates and Charges

Rates and Charges for Expedited Access Order are set forth in Section 11, following

**SECTION 3 - ACCESS ORDER CHARGES (CONT'D.)**

3.4 Order Modifications

The Customer may request a modification of its Access Order at any time prior to notification by the Company that service is available for the Customer's use or prior to the service date, whichever is later.

Any increase in the number of CTC PowerPath<sup>SM</sup> Service as set forth in Section 5, following, will be treated as a new order.

3.4.1 Service Date Change

Access Order service dates for the installation of new services or rearrangements of existing services may be changed, but the new service date may not exceed the original service date by more than thirty (30) calendar days. When, for any reason, the Customer indicates that service cannot be accepted for a period not to exceed thirty (30) calendar days, and the Company accordingly delays the start of service, a Service Date Change Charge will apply. If the Customer requested service date is more than thirty (30) calendar days after the original service date, the order will be canceled by the Company and reissued with the appropriate cancellation charges applied.

3.4.2 Design Date Change

The Customer may request a design change to the service ordered. A design change is any change to an Access Order which requires engineering review. Design changes do not include a change of Customer premises, end user premises, end office switch.

The Design Change Charge will apply on a per order per occurrence basis, for each order requiring a design change. The applicable charge is set forth in Section 18.5, following in addition to Additional Engineering may apply. If a change of service date is required, the Service Date Change Charge will also apply.

3.4.3 Rates and Charges

An Order Modification Charge will apply for any Service Date Change it , on a per order per occurrence basis, for each service date changed. The applicable charge is as set forth in Section 11, following.

**SECTION 3 - ACCESS ORDER CHARGES (CONT'D.)**

3.5 Minimum Period

3.5.1 The minimum period for which Services furnished under this price guide are provided and for which charges are applicable, is three month, unless otherwise stated herein.

3.5.2 The following changes will be treated as a discontinuance of the existing service and an installation of a new service. All associated nonrecurring charges will apply for the new service.

The changes listed below are those which will be treated as a discontinuance and installation of service and for which a new minimum period will be established.

- A. A move to a different building.
- B. A change in type of service.
- C. A change in Switched Access Service Interface Group.
- D. Change in Switched Access Service traffic type.
- E. Change in Company-provided Switched Access Service to a Collocated Interconnection arrangement or vice versa.
- F. Change to an existing Feature Group D Service to include the provision of 64 kbps Clear Channel Capability.

3.5.3 When CTC PowerPath<sup>SM</sup> Service is disconnected prior to the expiration of the minimum period, charges are applicable for the balance of the minimum period.

The Minimum Period Charge for monthly billed services will be determined as follows:

For Switched Access Service, the charge for a month or fraction thereof is equal to the applicable minimum monthly charge for the capacity.

All applicable nonrecurring charges for the service will be billed in addition to the Minimum Period Charge.

3.6 Rates and Charges

Rates and Charges are located in Section 11, following.

**SECTION 4 - CTC POWERPATHSM SERVICES**

4.1 General

The Company provides CTC PowerPath<sup>SM</sup> Services over its converged ICN Network and provides access to other services as set forth in this price guide. CTC PowerPath<sup>SM</sup> Services are available on both converged and standalone basis.

4.2 Customer Minimum Requirements

Customer's desiring to subscribe to the Company's CTC PowerPath<sup>SM</sup> Service must have a combined usage and bandwidth requirement equal to or greater than 8 DS0s.

Multiple location Customer must meet the following per location minimum combined usage and bandwidth requirements.

- Host locations must satisfy a 10 DS0 minimum requirements. A combined average of 6 DS0's per location is required at all other Customer locations.
- Minimum DS0 and usage requirements for Customers subscribing to the Company's Network Access Service for purposes of accessing only one of Company's ICN services is as follows.

Application	Minimum Requirement
Internet	20 DS0s
Frame Relay	20 DS0s
MTS	100,000 minutes

**SECTION 4 - CTC POWERPATHSM SERVICES (CONT'D.)**

4.3 Customer Premises Equipment

Customers who desire the Company's converged PowerPath<sup>SM</sup> service offerings may be required to install an Integrated Access Device (IAD), which is installed on the Customer's premises and serves as an endpoint to the Company's network and provides the Customer with Voice, Video, Frame Relay and Internet connectivity into the Company's PowerPath<sup>SM</sup> network. The IAD performs inter-working functions such that all traffic egressing from the Customer location is in the form of ATM Cells. The IAD converts traffic to the appropriate ATM class of service for each type of traffic statistically multiplexes this traffic over T-1 facilities. Two classes of service are provided on the uplink: Constant Bit Rate (CBR) and Unspecified Bit Rate (UBR). No traffic shaping abilities are available with this device.

Each IAD supports one (1) T-1 port connection, one (1) ethernet port connection, one (1) RS352 console port and two V.35 ports for Frame Relay connectivity.

The IAD shall, at all times remain the property of the Company. Upon termination of service, the Customer will provide the Company reasonable access to the Customer's premises for purposes of removing the Device. In the event the Customer fails to provide the Company with said access or should the equipment be returned to the Company in worse condition than that which could be reasonably expected from normal use and wear of the device, then in such event, Customer will be liable to the Company for the then current replacement cost of the Device.

The Device supports either analog or digital voice module connectivity but not the two concurrently. The two (2) modules supported are:

- Twelve port analog FXS voice module
- Two port t1 voice module

The ATM Edge Switch accepts several customer access lines in the form of T-1 or T-3 local loops and all associated Permanent Virtual Circuit (PVC) allows for automatic re-routing through the network in cases where backbone trunk is suddenly disabled.

The ATM Core Switch acts as a cell forwarding device. No traffic shaping or policing functions are performed by either of these switches.

**SECTION 5 - CTC VOICE SERVICES**

5.1 General

5.1.1 At the request of the Customer the Company will provide CTC Voice Services over the Company's Network. Depending on the Customer's choice of service the Customer will have the ability to choose between analog and digital voice services and the features and capabilities that are associated with such services. The PowerPath<sup>SM</sup> facility, as set forth in Section 5, preceding, will provide a communications path from the customer premises to the Company's network. The Company's network then provides the connectivity to the Public Switched Telephone Network (PSTN). Voice Connectivity Service is provided on a measured and unmeasured (where available) basis and no message unit or call allowance is provided, unless otherwise specified.

5.1.2 Channel Functionality

The Company will support both analog and digital interfaces. Depending on the type of interface, the Customer will have the ability to provision a variety of functionalities for each of the voice channels on the PowerPath<sup>SM</sup>.

A. Digital Voice Interface Service

The following Services are available to customers with a Digital PBX that supports E&M Wink Dual Tone Multi-Frequency (DTMF) signaling or E&M Intermediate DTMF signaling and have available DS 1 Ports in their PBX to connect to the IAD.

1. Outward Calling Only

A designated channel or group of channels on the PowerPath<sup>SM</sup> that will be used for outbound only calling.

2. Inbound Calling Only

A designated channel or group of channels on the PowerPath<sup>SM</sup> that will be used to receive inbound calls only. Customers will typically set up a hunt group, either circular or linear, to search for an open channel.

A. Digital Voice Interface Service (Cont'd.)

3. Two Way Calling

A designated channel or group of channels on the PowerPath<sup>SM</sup> that will be used to make and receive all types of calls. Each channel represents a separate phone number that could be called from the PSTN.

4. Lead Number Service

A designated group of channels on the PowerPath<sup>SM</sup> that will be used to receive inbound calls only. Customers will have a main lead number (either newly assigned by CTC or a ported number). This number will hunt through the entire group set up behind it with no phone numbers assigned to these channels.

5.1.2 Channel Functionality (Cont'd.)

A. Digital Voice Interface Service (Cont'd.)

5. Direct Inward Dialing (DID)

A designated group of channels on the PowerPath<sup>SM</sup> that will be used to only receive inbound DID calls. The PBX will receive the calls and direct them to the specific station. The PBX will additionally need to handle 3 or 4 digit out-pulsing to accommodate the service.

6. Multi-functional With DID

A designated group of channels on the PowerPath<sup>SM</sup> that will be used for outbound calling or inbound DID calls. Similar to Two Way Calling, it is a first come, first served basis as to the type of calls that can be received.

**SECTION 5 - CTC VOICE SERVICES (CONT'D.)**

5.2 Local Voice Service(s) (Cont'd.)

5.2.1 Service Descriptions (Cont'd.)

A. CTC Direct Services

CTC Direct Services (“Direct”) provides integrated analog or digital voice solutions as set forth this Section. Direct can be provided on a stand alone basis or at the Customer’s request may be combined with Data Services as set forth in Section 9, following and/or non-regulated services such as Internet via one transmission path as set forth in Section 5, previously. Direct will support up to 24 analog voice channels through a Time Division Multiplexed (“TDM”) Solution and is connected to the Public Switched Telephone Network (PSTN) through DMS-100 switches. Service is provided on a measured basis and where available an unlimited basis. Direct provides the ability to access a variety of calling features. Direct is available on a Monthly basis and at the request of the end user the Customer may choose a 12, 24 or 36 Month Term.

1. Analog / POTs Service

Analog / POTs Service (“POTs”), provides basic single business line service, available on a measured or an unlimited (where available) basis.

a. Description

1. Measured Service

Measured Service provides for calling within the local calling area and within municipalities on a per minute basis. Calls will be rated on a six second initial billing increment and a six second additional billing increment.

2. Unlimited Service

Un-Measured Service provides for unlimited calling within the local calling area and within municipalities. Accumulation of local usage time for measured services is done on a per second basis. At the end of the Customer's billing period, the sum of accumulated seconds is rounded to the next higher minute.

2. Centrex Service\*\*

(C)

a. General

Centrex is a business telecommunication system in which the controlling dial switching equipment is located at a Telephone Company central office that normally serves the principal premises of a Customer. Centrex Service provides a network-based solution that delivers services comparable to a sophisticated customer-owned PBX. Centrex Service is available to any size Customer.

Centrex is offered only where suitable central office facilities are available. Where suitable facilities do not exist to provide for the furnishing of service, the Telephone Company is not obligated to construct facilities especially for this service.

Centrex does not require special attendant position equipment for answering and transferring incoming calls to stations within the system. Incoming calls to the system's listed directory number are routed to an individual station line or lines designated for the system's answering location. A night service arrangement may be provided optionally by establishing a call pickup group for this purpose. Calls then may be transferred to other stations in accordance with the system's standard or optional features. If special attendant position equipment is utilized with the system, additional charges, based on cost, may be applicable.

This service is available to businesses of any size and is capable of handling thousands of lines through its highly resilient and redundant architecture.

\*\* *Grandfathered to existing Customers at existing locations.*

Incoming calls to the system's listed directory number are routed to an individual station line or lines designated for the system's answering location. A night service arrangement may be provided optionally by establishing a call pickup group for this purpose. Calls then may be transferred to other stations in accordance with the system's standard or optional features. If special attendant position equipment is utilized with the system, additional charges, based on cost, may be applicable.

5.2 Local Voice Service(s) (Cont'd.)

5.2.1 Service Descriptions (Cont'd.)

A. CTC Direct Services (Cont'd.)

5. ISDN PRI Service

a. General

ISDN primary provides access to the Company's voice and circuit switched data transport services via a 1.544 Mbps digital path as set forth in Section 4, preceding, between ISDN compatible Customer premises equipment and a CTC Point of Presence. ISDN PRI can be combined with other services and is a true converges product. ISDN primary includes Direct Inward Dialing (DID) which permits incoming dialed calls from the network to reach a specific station line of a Private Branch Exchange (PBX) or other Customer premises equipment without the assistance of an attendant.

ISDN primary is offered on a measured local service basis and on an unlimited local service basis where unlimited local service is available, as set forth in Section 5, preceding. No local usage allowance is provided.

b. Service Components

1. Primary Port

An ISDN primary port provides the termination of the local distribution channel as set forth in B, following in the central office switch. Each port consists of a D channel for signaling and up to 23 B channels for transmission of voice.

5.2.1 Service Descriptions (Cont'd.)

A. CTC Direct Services (Cont'd.)

5. ISDN PRI Service (Cont'd.)

b. Service Components (Cont'd.)

2. Local Distribution Channel

The Local Distribution Channel is a 1.544 Mbps two-way transmission path connecting a Customer's premises with the port. The framing format for 1.544 Mbps transmission over the ISDN primary service local distribution channel is extended superframe as specified in TR-NWT-000499.

3. DID Capability

Furnished upon the condition that the Customer must subscribe to and have adequate facilities to permit the use of service without injurious effect on general telephone service, ISDN primary DID numbers will be provided in blocks of 20, 50 or 100 consecutive numbers. These minimums apply whether or not the Customer utilizes all the ISDN primary DID telephone numbers in the group.

5.2 Local Voice Service(s) (Cont'd.)

5.2.1 Service Descriptions (Cont'd.)

A. CTC Direct Services (Cont'd.)

5. ISDN PRI Service (Cont'd.)

c. Primary Service Capabilities

The following capabilities are supported on the B channels: Voice and circuit switched data capabilities can be combined over the ISDN primary port and local distribution channel.

1. Features

Circuit Switched Voice provides digitized speech or voice band data access in conjunction with existing services including local exchange service, Message Telecommunications Service (MTS), and 800 service.

Incoming Calling Line Identification provides the calling number of an incoming call if both the ISDN primary Customer and the originator of the call are served from the same central office switch or served from different central office switches which are connected by facilities that can send the calling party's number between the switches.

Channel Configuration allows some or all B channels to be dedicated to exchange and MTS, DID, or 800 service. Multiple dedicated trunk groups can be established on the same port or group of ports. The Customer must specify at the time of ordering, the number of dedicated B channels and their specific purpose.

e. Responsibility of the Customer

1. The Customer must specify, at the time of ordering, the number of call-by-call service selection B channels and the number of dedicated channels (if any) to be activated. Service Order Charges as set forth in Section 2, preceding, apply for changes in the number or type of activated channels, made subsequent to the time of ordering.
2. Customer provided equipment used to connect to ISDN primary service must comply with AT&T PUBs 41449, 41459, 5D5-900-312 and 5D5-900-322.
3. A Customer provided channel service unit or equivalent functionality is required at each termination of an ISDN primary service PowerPath, as set forth in Section 5, preceding, on the Customer's premises. The channel service unit must be compatible with the extended superframe framing format and the bipolar with 8 zero substitution line code.
4. Customer provided switching systems must be arranged to provide for the interception of assigned by unused station numbers, including vacant station number groups as required.

2. Centrex Service\*\*

(C)

a. General

Centrex is a business telecommunication system in which the controlling dial switching equipment is located at a Telephone Company central office that normally serves the principal premises of a Customer. Centrex Service provides a network-based solution that delivers services comparable to a sophisticated customer-owned PBX. Centrex Service is available to any size customer.

Centrex is offered only where suitable central office facilities are available. Where suitable facilities do not exist to provide for the furnishing of service, the Telephone Company is not obligated to construct facilities especially for this service.

Centrex does not require special attendant position equipment for answering and transferring incoming calls to stations within the system. Incoming calls to the system's listed directory number are routed to an individual station line or lines designated for the system's answering location. A night service arrangement may be provided optionally by establishing a call pickup group for this purpose. Calls then may be transferred to other stations in accordance with the system's standard or optional features. If special attendant position equipment is utilized with the system, additional charges, based on cost, may be applicable.

This service is available to businesses of any size and is capable of handling thousands of lines through its highly resilient and redundant architecture.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 5 - CTC VOICE SERVICES (CONT'D.)**

5.2 Local Voice Service(s) (Cont'd.)

5.2.2 Optional Voice Features

A. Account Codes

This feature permits the carrier to collect an account code from the subscriber for inclusion on the CDR. The collected account code may or may not be validated against a provisioned set of valid codes.

B. Anonymous Call Rejection

Anonymous Call Rejection allows a Customer to redirect incoming calls for which calling name and number display has been suppressed through the use of per call or line blocking, to an announcement indicating that the Customer is not presently accepting such calls. The Customer may activate and deactivate the feature without charge by dialing a code.

C. Busy Redial / \*66

Busy Redial enables a station user calling a busy station within the system to be automatically connected to the called line when the line becomes idle.

D. Call Forward Variable

Call Forward allows a station line to have incoming calls forwarded to another line within the system or to telephone numbers outside the system.

E. Call Forward Busy Line

Call Forwarding Busy Line permits calls attempting to terminate to a busy station line to be forwarded to a preselected station line within the Customer system or to a telephone number outside the system. This feature is not provided on a station line with Call Waiting.

**SECTION 5 - CTC VOICE SERVICES (CONT'D.)**

5.2 Local Voice Service(s) (Cont'd.)

5.2.2 Optional Voice Features (Cont'd.)

F. Call Forward Busy Variable

Call Forwarding Busy Variable permits calls attempting to terminate to a busy station line to be forwarded to a station line within the customer system or to a telephone number outside the system. This feature is not provided on a station line with Call Waiting.

G. Call Forward No Answer

Call Forward No Answer provides for the forwarding of incoming calls to a preselected station line within the customer system or to a telephone number outside the system when the called station line does not answer within a prescribed number of rings.

H. Call Forward No Answer Variable

Call Forward No Answer provides for the automatic routing forwarding of incoming calls to a station line within the customer system or to a telephone number outside the system when the called station line does not answer within a prescribed number of rings.

I. Call Forward Busy / No Answer

Call Forward Busy / No Answer provides for the automatic routing of incoming calls to a preselected telephone number when the called telephone number is busy and/or does not answer within a determined number of rings.

J. Call Hold

Call Hold allows the station user to place any established call on hold while leaving the Centrex line free to originate another call.

---

**SECTION 5 - CTC VOICE SERVICES (CONT'D.)**

5.2 Local Voice Service(s) (Cont'd.)

5.2.2 Optional Voice Features (Cont'd.)

K. Caller ID - Number Only

Caller ID-Number Only provides the originating telephone number, the date and the time of an incoming call in the period between the first and second telephone ring. This information is displayed on a customer provided compatible display device attached to the Customer's telephone line.

L. Caller ID -W/Name

Caller ID provides the telephone number and name associated in the Telephone Company's records with the line from which an incoming call originates. The calling number and name are displayed on a customer provided compatible display device attached to the Customer's telephone line.

M. Call Park

Call Park allows a call for a busy extension to be put into a hold-like state until someone at that extension or another extension becomes free to answer it. The call is brought out of "park" by dialing a special code.

N. Call Pickup

Call Pickup enables a station user to answer incoming calls to another station within a defined call pickup group by dialing a code.

O. Call Return

Call Return will allows a station user to retrieve any call that is not caught in time. You don't need to know who called. Just dial \*69 and your phone will redial the last number that called you.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 5 - CTC VOICE SERVICES (CONT'D.)**

5.2 Local Voice Service(s) (Cont'd.)

5.2.2 Optional Voice Features (Cont'd.)

P. Call Trace

Call Trace allows a station user to Trace the source of an annoyance call. The number will be provided to the police, not to the Customer who traced the call. Code: \*57.

Q. Call Transfer

Call Transfer allows a station user to transfer any established call to another station inside or outside the customer group without the assistance of an attendant. This is a basic system feature provided on all lines.

R. Call Waiting

Call Waiting Terminating permits a station user to receive an audible tone to indicate an incoming call is waiting, if the called line is busy. Call Waiting is not provided on a station line equipped with Call Forwarding Busy Line. This feature may be arranged to allow a station line to receive Call Waiting treatment on either incoming DID or intrasystem calls.

S. Channel Configuration

Channel Configuration allows some or all B channels to be dedicated to exchange and MTS, DID, or 800 service. Multiple dedicated trunk groups can be established on the same port or group of ports. The Customer must specify at the time of ordering, the number of dedicated B channels and their specific purpose.

T. Circuit Switched Voice

Circuit Switched Voice provides digitized speech or voice band data access in conjunction with existing services including local exchange service, Message Telecommunications Service (MTS), and 800 service.

---

**SECTION 5 - CTC VOICE SERVICES (CONT'D.)**

5.2 Local Voice Service(s) (Cont'd.)

5.2.2 Optional Voice Features (Cont'd.)

U. Distinctive Ring

Distinctive Ring enables a customer to have up to three separate telephone numbers (one main telephone number and two additional telephone numbers) associated with one exchange access line. Each telephone number has a distinctive ring on incoming calls to allow for identification of the incoming call.

V. Hunting

Hunting permits the routing of calls to an idle station in a prearranged group when the called station is busy.

W. Incoming Calling Line Identification

Incoming Calling Line Identification provides the calling number of an incoming call if both the ISDN primary Customer and the originator of the call are served from the same central office switch or served from different central office switches which are connected by facilities that can send the calling party's number between the switches.

X. Line Blocking

Line blocking allows customers to automatically block the disclosure of their directory number and name on all originating calls. The option precludes the originating customer's telephone number and name, including customers with nondirectory listed service or nonpublished service, from being displayed on the terminating customers Caller ID – Number Only display device(s) and also prevents \*69 from completing a call. Line blocking does not affect the operation of the other calling features.

---

**SECTION 5 - CTC VOICE SERVICES (CONT'D.)**

5.2 Local Voice Service(s) (Cont'd.)

5.2.2 Optional Voice Features (Cont'd.)

Y. Line Overflow to Directory Number

Line Overflow to Directory Number enables a line in a hunt group that is busy to be overflowed to another Directory Number. This feature is available only where suitable facilities exist.

Z. Referral Service

Referral Service is a recorded announcement that provides the caller the status of a disconnected or changed number.

AA. Selective Call

Selective Call allows you to have only your important calls forwarded to a designated location.

AB. Selective Name and Number Blocking

Selective Blocking permits you to prevent your name and number from being transmitted on particular calls made from your telephone number.

AC. Speed Dialing

Speed Dialing allows a station user to call a predesignated telephone number by dialing a valid dialing code. The customer changeable speed dialing list furnished contains either six or eight codes depending on serving facilities.

---

**SECTION 5 - CTC VOICE SERVICES (CONT'D.)**

5.2 Local Voice Service(s) (Cont'd.)

5.2.3 Other Service Features

A. Descriptions

1. Direct Inward Dial

A designated group of channels on the PowerPath<sup>SM</sup> that will be used to only receive inbound DID calls. The PBX will receive the calls and direct them to the specific station. The PBX will additionally need to handle 3 or 4 digit outpulsing to accommodate the service.

Example: Customers will have a block of 40 DID numbers newly assigned by the Company or ported from another LEC. This block of numbers is assigned to a group of channels using the ratio of 8:1 numbers/stations to channels, in this case 5 channels. If a 6<sup>th</sup> concurrent DID call is attempting to be completed, the end user will receive a busy.

2. DNIS

DNIS Out-pulsing on CAS/PBX Line provides a means to specify a standard (4) or Custom (4-18) number of digits, taken from the DNIS (Dialed Number Identification Service) to be transmitted on call termination to a CAS/PBX line

5.3 Other Services

5.3.1 Foreign Number Service

A. General

Foreign Number Service is available where facilities exist to Customers who subscribe to the Company's local exchange service and desire to retain their existing phone numbers for inward service, where such numbers are associated with either a rate center or Central Office other than that in which the Customer resides or is served.

In the case where the numbers are not in the same rate center, the Company assigned phone numbers associated with the rate center in which the Customer is physically located will serve as the BTN/STN for all outbound calling routed through the rate center where the Customer is physically located. At the Customer's request, the Company will establish an additional hunt group that will route calls through the foreign rate center. Such a request may require additional programming to customer provided equipment (CPE) at the expense of the Customer.

B. Application of Rates and Charges

The Application of Rates and Charges for Foreign Number Service are set forth in Section 5, following.

C. Rates and Charges

Rates and Charges for Foreign Number Service are set forth in Section 11, following.

5.3.2 Referral Services

A. General

Referral Service is available where facilities exist to Customers who subscribe to the Company local exchange service. Presently, One Communications will offer two types of Referral Service, Generic and Basic Referral Service.

1. Generic Referral

A Generic Referral is a recorded announcement that provides the caller the status of a disconnected or changed number. Generic Referrals do not provide the new number

2. Basic Referral

A Basic Referral is a recorded announcement that provides the caller the status of a disconnected or changed number and provides to the caller the new telephone number.

B. Minimum Period

1. Generic Referral is subject to a one (1) month minimum period.

2. Basic Referral is subject to a six (6) month minimum period.

C. Availability

Customers receiving CTC Voice Services may subscribe to Referral Service at the rates and charges set forth in the Section 11, following.

5.3.3 Remote Call Forwarding (RCF)

A. General

Remote Call Forwarding (RCF) provides for all incoming calls placed to a ten - digit number to be call forwarded to a terminating Intra or InterLATA telephone number. RCF callers are directly connected to an on-net or off-net telephone number. The number is designated by the Customer. This service is available only to the extent facilities are available.

This service is furnished upon condition that the Customer Subscribed to adequate RCF or terminating facilities to permit the use of the service without impairment, disruption or deterioration of the quality of other telephone services. The Customer may add Additional Talk paths. The maximum number of talk paths is fifteen (15).

If in the opinion of the Company additional RCF service or terminating facilities are needed, the Customer will be requested to subscribe to additional service or facilities. If the Customer refuses to subscribe to adequate RCF or terminating facilities, the RCF service is subject to termination.

The Company does not provide identification of the originating telephone number to the RCF Customer.

No assurance can be given that transmission will be fully satisfactory during operation of RCF. In the event of poor transmission, the liability of the Company will not exceed the amount of the applicable charge, if any for the call.

5.3 Other Services (Cont'd.)

5.3.6 2-PIC Presubscription

This allows the end-user to be able to select their pre-subscribed intraLATA toll and InterLATA long distance carriers.

5.3.7 Touch Tone Service

Voice Connectivity service will be provided with Touch Tone Service and will enable the customer to utilize push button dialing using Dual Tone Multi-Frequency tones.

5.3.8 Billing Record Creation

Logs information concerning each call that goes through the network service provider's packet network and retains all necessary information for distribution in a standard format to the provider's billing system.

5.3.9 Customized Number Service

Customer requested DNs in the form of NPA-NXX-ZZZZ where the customer specifies the numeric value for the number represented by Z.

5.3.10 Network Announcements

Provides requests to the Announcement Server to "Play" stored announcements over the packet network to a designated IP address.

5.3.11 Call Blocking - Selective

Enables subscribers to block calls to 800, 411, 900, 976 numbers. The Call Agent recognizes 800, 411, 900 and 976 numbers and performs a lookup in the customer database to determine if these numbers are blocked from the particular number. If these numbers are blocked, the Call Agent will initiate an appropriate announcement to the caller informing them of the block on these numbers.

**SECTION 5 - CTC VOICE SERVICES (CONT'D.)**

5.4 IntraLATA Toll Service

Customers who subscribe to the Company's Local Voice Service and / or Outgoing Long Distance Voice Access Service will have the option of pre-subscribing to intraLATA Toll Service provided on the ICN. IntraLATA Toll Service will only be provided as a bundled service with either Local Voice Service as set forth in Section 5, preceding or Outgoing Long Distance Voice Access Service as set forth in Section 11, following.

Usage Charges for IntraLATA Toll Service are set forth in Section 6.4 of this Price guide And are in addition to those rates and charges for access to the ICN.

5.5 Outgoing Long Distance Voice Access Service \*

The ICN provides a gateway to the Public Switched Network (PSN) through dedicated channels of a Customer's PowerPath<sup>SM</sup> facility. Virtual connections are established between the Integrated Access Device located at the Customer premise and the PSTN Gateway. An Integrated Access Device located at the Gateway, receives voice over ATM cells from the ICN and converts them to traditional voice frames which are then passed to the Company's long distance switch.

Usage Charges for Outgoing Long Distance Service are set forth in Section 11, following, of this Price guide and are in addition to those rates and charges for access to the ICN.

**SECTION 5 - CTC VOICE SERVICES (CONT'D.)**

5.6 1-800 Service \*

Incoming 1-800 Service can be configured from the Integrated Access Device at the Customer's premise directly to the Company's gateway to the PSTN. Signaling for incoming 1-800 is loop-start FXS/FXO for analog applications and E&M for digital applications.

Usage charges for 1-800 Service are set forth in Section 25.6.6 of this price guide and apply in addition to those rates and charges for access to the ICN.

5.7 PBX Tie Line Service \*

PBX Tie Line Service provides a direct connection between a pair of remote PBXs. PBX Tie Line Service is facilitated by mapping ATM virtual connections between the Customer's Adaptation Devices at the respective locations and configuring such devices to match the signaling used by the Customer's PBX equipment. Interconnected PBXs must use the same type of signaling.

Rates and Charges for PBX Tie Line Service are set forth in Section 11 of this price guide and apply in addition to those rates and charges for CTC PowerPath<sup>SM</sup> Service, preceding.

**SECTION 6 - CTC OPTIONAL CALLING PLANS**

6.1 CTC Call Packs

6.1.1 General

CTC Call Packs are optional calling plans available to customers who subscribe to either CTC Voice Service, as set forth in Section 5, preceding, or CTC Customizer, as set forth in Section 6, following. Customers will have the choice of subscribing to any of fourteen (14) options based on their customer specific requirements. The fourteen (14) options will be separated into two separate groups: the first Call Packs A-G will consist of a pre-set amount of minutes for Local Usage, Toll Usage and Long Distance Usage; the second group Call Packs H-N will consist of a Unlimited Local and a pre-set amount Toll Usage and Long Distance Usage.

A. Call Packs A - G

CTC Call Packs A - G will bundle Local Usage with Toll / Long Distance Usage for a flat monthly rate. Each Call Pack will contain a specified maximum number of local minutes and a specified maximum number of toll / long distance minutes per month. Call Packs are provided on a Month-to-Month basis with no minimum period. Call minutes used in excess of the pre-subscribed Call Pack maximum minute allowance will be rated at the default rate or the rate specified in the Voice Connectivity Service as set forth in Section 5, preceding, or CTC Customizer as set forth in Section 6, following.

B. Call Packs H - N

CTC Call Packs H - N will bundle Unlimited Local Usage and Toll / Long Distance Usage for a flat monthly rate. Each Call Pack will provide Unlimited Local Usage and a specified maximum number of toll / long minutes per month. Call Packs are provided on a Month-to Month basis with no minimum period. Toll / Long Distance Calls made in excess of the pre-subscribed Call Pack maximum minute allowance will be rated at the default rate or the rate specified in the Voice Connectivity Service as set forth in Section 4, preceding, or CTC Customizer as set forth in Section 6, following.

---

**SECTION 6 - CTC OPTIONAL CALLING PLANS**

6.1 CTC Call Packs (Cont'd.)

6.1.2 Rate Regulations

- A. Discount plans do not reflect charges associated with monthly access, per channel charges, calling features, Direct Inward Dial (“DID”) numbers, account codes, Foreign Number Service (“FNS”) service or applicable taxes and surcharges.
- B. Customers who exceed the maximum number of minutes will be charged a default rate for those minutes in excess of the maximum threshold each month.
- C. Unused minutes cannot be carried over to the following month.
- D. Special customer premise equipment may be required.
- E. Qualifying usage under these plans includes local, toll and long distance outbound and inbound 800.
- F. This plan excludes usage associated with directory assistance, directory assistance call completion, operator services, and 900 service. **(D)**
- G. This plan cannot be combined with any other discount plans.
- H. Customer desiring to upgrade their service package within Ninety (90) days of the service start date may do so without incurring a Service Order Charge by entering into a new contract. After Ninety (90) days, Customers wishing to upgrade their service package will incur a Service Order Charge as set forth in Section 2, preceding.
- I. Customers desiring to downgrade their service package may do so by entering into a new contract and paying a service order charge as set forth in Section 2, preceding.

6.1.3 Rates and Charges

Rates and Charges for CTC Call Packs are set forth in Section 11, following.

**SECTION 7 - CTC BUNDLED SERVICE OFFERINGS**

7.1 CTC Customizer

7.1.1 CTC Local and Long Distance Customizer

A. General

CTC Local and Long Distance Customizer Service (“Customizer”) is a flat rate bundled service offering. Customizer combines the monthly recurring charges for voice, data and / or Internet service channels provided via the CTC PowerPath<sup>sm</sup>, as set forth in Section 5, preceding, with usage packages as set forth in Section 7, following for one monthly rate. Customers subscribed to the Local and Long Distance Customizer will receive a maximum number of local and a maximum number of long distance minutes included with the service for a flat monthly rate. The monthly charge for access as set forth in Section 4, preceding, will be in addition to the monthly Customizer rate as set forth in Section 7, following.

B. Service Description

Customers subscribing to Customizer will have the choice between Option 1 - Full T1 Customizer and Option 2 - Half T1 Customizer, as set forth in Section A. and B., following.

1. Option 1

Customers who subscribe to Full T1 Customizer will have the ability to choose between a full twenty-four (24) Channels of voice service only or twenty (20) channels of voice converged with CTC Data Services as set forth in this price guide and / or Internet Service. Customers who choose to utilize the ability to have converged service offerings may be required to have an Integrated Access Device and the remaining four (4) available channels of the T1 will be required to support such integrated access device.

**SECTION 8 - CTC ADVANCED SOLUTIONS**

8.1 Frame Relay Service

8.1.1 General

Frame Relay Service (FRS), which is provided subject to suitable facilities, is a virtual private data network service which allows Customers to simulate a dedicated high speed data network. FRS allows a Customer to define logical channels and establish Permanent Virtual Circuits (PVCs) among multiple locations using statistically multiplexed network access lines and a shared high speed Company packet switching network. PVCs provide the Customer with the electronic equivalent of a private line between two points.

A Customer establishes with the Company a fixed private numbering plan (i.e., Network Address) and routing scheme (i.e., network map), for moving data among Customer's various locations on a secure basis. While none of the physical circuits are dedicated, these locations are electronically connected to function similar to private line service.

FRS allows Customers to interconnect geographically dispersed Local Area Networks (LANs) and can support file transfer applications. FRS supports intermitted, bursty data traffic via 56 kbps and 1.544 mbps transport facilities. Access to the Company's FRS network is provided via a Powerpath□ facility from the Customer's location to the nearest Point of Presence.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 8 - CTC ADVANCED SOLUTIONS (CONT'D.)**

8.1 Frame Relay Service (Cont'd.)

8.1.2 Service Components

A. Capacities and Interfaces.

Two serial ports are available for data connectivity. A total of 68 ATM connections can terminate into an Integrated Access device located on a customer's premise.

FRS provided over a Company Powerpath□ Facility is available at the following access speeds

- 56/64 Kbps
- 128 Kbps
- 192 Kbps
- 256 Kbps
- 320 Kbps
- 384 Kbps
- 448 Kbps
- 512 Kbps
- 576 Kbps
- 640 Kbps
- 704 Kbps
- 768 Kbps

- B. FRS Connection across the ICN. Frame Relay Service is available to ICN Customers via PowerPath□ transmission facility. The Integrated Access Device on the customer premises provides V.35 connectivity to the customer's router or FRAD and allows virtual circuits to be established to other sites within the ICN, creating a two-layer virtual private network for the customer's intranet requirements.

8.1 Frame Relay Service (Cont'd.)

8.1.2 Service Components (Cont'd.)

C. Network to Network Interfaces (NNI)

1. Description

Customers wishing to connect additional locations that are not served by the PowerPath<sup>SM</sup> Network, may connect to the PowerPath<sup>SM</sup> Network via Network-to-Network Interface as set forth below.

a. Local Exchange NNI

Where suitable facilities exist, PowerPath<sup>SM</sup> Network (PPN) Customers as set forth in Section 4, preceding, with additional Customer locations located within the Company's footprint, have the option to connect to the PowerPath<sup>SM</sup> Network (PPN) to establish Frame Relay traffic to a PowerPath<sup>SM</sup> location. Connections will be established via a Network-to-Network Interfaces (NNIs), between a specified Local Exchange Carrier and the PPN. All equipment on the Customer Premise will be the sole responsibility of the customer.

b. Interexchange Carrier NNI

Where suitable facilities exist, PowerPath<sup>SM</sup> Network (PPN) Customers as set forth in Section 4, preceding, with additional Customer locations located outside the Company's footprint, have the option to connect to the PowerPath<sup>SM</sup> Network (PPN) to establish Frame Relay traffic to a PowerPath<sup>SM</sup> location. Connections will be established via a Network-to-Network Interfaces (NNIs), between a specified Interexchange Carrier and the PPN. All equipment on the Customer Premise will be the sole responsibility of the customer.

---

**SECTION 8 - CTC ADVANCED SOLUTIONS (CONT'D.)**

8.1 Frame Relay Service (Cont'd.)

8.1.3 Interruption of Service

- A. A port connection and its associated logical channel will be considered out of service when it does not provide functional permanent virtual circuits, as specified and subscribed to, to all other associated FRS port connections which are not otherwise out of service.
- B. When service is interrupted for 30 minutes or more a credit allowance will be made for the portion of the service which is affected, provided that the interruption is brought to the attention of the Company within ten days. For the purpose of determining the amount of allowance, every month is considered to have 30 days.

Interruptions are credited to the Customer at the proportionate monthly contract charge in half hour multiples for each half hour or major fraction thereof of interruption.

- C. No credit allowance will be made for the following interruptions.
  - Service interruptions of less than 30 minutes.
  - Service interruptions caused by the negligence of the Customer or authorized user.
  - Service interruptions resulting from the failure of equipment provided by the Customer or authorized user.
  - Service interruptions which continue due to the failure of the Customer to authorize replacement of any element of special construction. The period during which no credit allowance will be made begins on the seventh day after the Customer receives the Company's notification of the need for replacement and ends on the day after the Company receives the Customer's authorization for replacement.

**SECTION 8 - CTC ADVANCED SOLUTIONS (CONT'D.)**

8.1 Frame Relay Service (Cont'd.)

8.1.4 Application of Rates and Charges

Service charges apply in addition to the rates and charges for FRS.

Charges for PowerPath<sup>®</sup> facilities apply in addition to those rates and charges for FRS. Off-Net NNI connection charges apply to those Customers connecting to the ICN via external service providers.

On-Net NNI connection charges apply to those Customers connecting directly to the ICN.

A. Payment Plan

CTC Frame Relay Service is offered on a 12 Month, 24 Month and 36 Month term commitment during which the customer is subject to Company initiated rate changes. CTC Frame Relay Service are also available on a Month-to-Month Basis.

1. Application of Rates and Charges

The application of charges for customers subscribing to a term commitment period are as follows.

a. Service Establishment

Service Establishment one time charges do apply for the initial installation of CTC Direct Services installed under a term commitment.

b. Monthly Rates

Monthly recurring charges apply to each applicable component of service that has an associated monthly recurring charge.

1. Monthly Rates and nonrecurring rates are subject to Company initiated rate increases, upon the proper price guide approval by the commission.

---

**SECTION 8 - CTC ADVANCED SOLUTIONS (CONT'D.)**

8.2 Frame Relay over DSL (FRoDSL)

8.2.1 General

At the request of customers and where suitable facilities exist, the Company will provide Frame Relay Service over a Digital Subscriber Line (DSL) or Frame Relay over DSL (FRoDSL). Customers will be able to order FRoDSL via three (3) different types of DSL Circuits for Access; Symmetric DSL (SDSL), ISDN DSL (IDSL) and Asymmetric DSL (ADSL).

FRoDSL will be provided to customers who wish establish data connectivity at remote customer location(s) and virtually connect the remote to a host site. The Customer's host site must subscribe to Frame Relay Service as set forth in Section 7, of this price guide. At the remote site a Customer will have the ability to establish one (1) Permanent Virtual Circuit (PVC) and connect the PVC back to the customer primary or host location.

8.2.2 Types of DSL Access

The Company will allow the customer to choose between the three (3) types DSL Access for FRoDSL. The type of DSL Access chosen by the customer subject to facilities and loop (or circuit) qualification. Loop qualification will be provided by the Company personnel. The Company will not restrict the customer of its choice of DSL Access unless the type of DSL chosen is not available in that area or facilities do not exist.

DSL is a fast and reliable way to access the Company's Frame Relay Network. The technology allows you to take advantage of unused bandwidth that already exists on a telephone line. Regular telephone service uses less than one (1) percent of the capacity of an existing twisted pair of copper. This leaves the remaining ninety-nine (99) percent of the bandwidth for high speed data use.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 8 - CTC ADVANCED SOLUTIONS (CONT'D.)**

8.2 Frame Relay over DSL (FRoDSL)

8.2.2 Types of DSL Access (Cont'd.)

A. Asymmetric DSL (ADSL)

ADSL is a technology that allows data to be sent over existing copper telephone lines (POTS). At the customer's request the Company will provide ADSL as a means of access to the Company's Frame Relay Network which will allow the customer a low cost Frame Relay Service solution at remote locations. ADSL allows the customer to have an upstream rate and a different downstream rate. The upstream bandwidth rate is the speed data is transferred from the customer's location to the Company's Frame Relay Network. The downstream bandwidth rate is the speed data is transferred from the Company's Frame Relay Network to the customer premises. The downstream rate is always faster than the upstream rate. The upstream and the downstream speeds vary depending how far you are from the Company's Central office.

ADSL will be offered 2 different bandwidths 1.5 Mbps downstream rate with 384 Kbps upstream and 3.0 Mbps downstream and 764 Kbps upstream rate at the rates and charges as set forth in Section 10, following. Actual speeds may be lower due to the impact of loop distance, modem technology and other factors. Therefore, these data speeds are not guaranteed.

8.2.2 Types of DSL Access (Cont'd.)

B. Symmetric DSL (SDSL)

At the customer's request the company will provide SDSL as a means of access to the Company's Frame Relay Network which will allow the customer a low cost Frame Relay Service solution at remote locations. Symmetric DSL (SDSL), is a technology that allows data to be sent over existing copper telephone lines (POTS). SDSL works by sending digital pulses in the high-frequency area of telephone wires and cannot operate simultaneously with voice connections over the same wires. Unlike ADSL, SDSL is symmetric and will send and receive data at the same bandwidth. SDSL will be offered in bandwidth speeds of 192 Kbps, 384 Kbps, 768 Kbps, 1.1 Mbps, and 1.5 Mbps, at the rates and charges as set forth in Section 10, following. Actual speeds may be lower due to the impact of loop distance, modem technology and other factors. Therefore, these data speeds are not guaranteed.

C. Digital Subscriber Line over ISDN

Digital Subscriber Line over ISDN (IDSL), uses an ISDN circuit and runs at the same speed as ISDN. IDSL has an "always-on" connection. IDSL runs at 144 Kbps downstream and 144 Kbps upstream. One benefit of IDSL is that it supports users that are outside the normal distance limitations from the telephone CO (Central Office). IDSL is a great solution for those who want a dedicated connection but do not qualify for an ADSL or SDSL connection because of the mileage constraints. The data speeds listed above are maximum speeds. Actual speeds may be lower due to the impact of loop distance, modem technology and other factors. Therefore, these data speeds are not guaranteed.

**SECTION 8 - CTC ADVANCED SOLUTIONS (CONT'D.)**

8.2 Frame Relay over DSL (FRoDSL)

8.2.3 Terms and Conditions

- A. The Company will provision and maintain FRoDSL service to the Network Interface Device at the customer designated premises . The Customer is responsible for obtaining a compatible splitter and modem.
- B. The Customer will provide the Company with the necessary information (e.g., Customer name, customer address) to provision FRoDSL.
- C. FRoDSL will be provided subject to the availability and limitations of Company Facilities.
- D. The Company will qualify copper facilities to determine the suitability of such facilities for FroDSL Service served via copper facilities. The Company will not provide FRoDSL on copper facilities that are not suitable for the service. Nor will the company provide FRoDSL Service if it determines that such provision will produce interference to other services.
- E. The Company reserves the right to interrupt temporarily FRoDSL Service for facilities maintenance, software upgrades and in emergency situations.
- F. Customer will allow the Company's employees or agents to enter Customer designated premises at any reasonable hour for the purpose of installing, inspecting and repairing FRoDSL, or upon termination of removing the company's equipment.
- G. Customers subscribed to CTC FRoDSL via ADSL Access must also subscribe to a CTC POTS line as set forth in other CTC Tariffs and pricing sheets on file with the applicable Public Service Commission.

**SECTION 8 - CTC ADVANCED SOLUTIONS (CONT'D.)**

8.2 Frame Relay over DSL (FRoDSL)

8.2.4 Application of Rates and Charges

- A. Customers subscribed to FRoDSL via ADSL, SDSL or IDSL access are subject to the rates and charges as set forth in Section 10, following.
- B. Customers subscribed to FRoDSL are subject to a Two (2) - year term agreement per arrangement ordered.
- C. Monthly Rates - A monthly recurring charge applies for each FRoDSL arrangement.
- D. Service Activation - a non-recurring charge applies for each service activation associated with each FRoDSL per arrangement ordered.
- E. Termination Liability - If a customer elects to terminate the 2 year term plan for FRoDSL prior to the end of the commitment period, termination charges will apply. The Termination Liability Charge is set forth in Section 10, following.
- F. Expiration - At the expiration of the service term, the end user's service will continue on a month to month basis at the same rates and charges.
- G. Cancellation - customers who subscribe to SDSL or IDSL are subject to a cancellation fee. End Users who enter into a confirmed order for SDSL or IDSL and cancel the order before the service is installed are subject to a cancellation charge as set forth in Section 10.

**SECTION 9 - CTC PROMOTIONAL OFFERINGS**

9.1 General

The Company may from time to time engage in special promotional service offerings of limited duration, not to exceed ninety (90) days, designed to attract new subscribers or to increase subscriber awareness of a particular service offering. Such promotional offerings will be limited to specific dates, times and locations. Except for the rates charged under such promotions, all other terms and conditions of service contained in this price guide will apply to CTC's promotional service offerings. The MDTC will be notified in accordance with Department's rules and regulations prior to the start of any promotional offering.

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES**

The rates provided in Section 10 apply to Customers that are currently in a Service Term agreement with the Company. All Customers being provided Month-to-Month services through an expired service term or who have never had a contractual relationship with the Company will find the rates for their specific out of contract services in Section 12 - Non-Term Rates.

10.1 One Communications Features

10.1.1 One Communications Analog Voice Features and Service Options

Call Forward Variable (All Calls)

Customers can forward calls to another number. Calls can be forwarded to domestic, offshore (Hawaii, Alaska, U.S. Virgin Islands, Puerto Rico, Guam and Northern Marianas), or cellular numbers. The Customer manually enters the number to which calls will be forwarded. The Customer is billed any usage charges for the forwarded call. This feature can be activated and deactivated when needed from the Customer's own phone.

Call Forwarding Remote Access

Allows the Customer to activate and deactivate Call Forward Variable from any location. Call Forwarding Remote Access will only work when paired with Call Forward Variable. This feature can be activated/deactivated when needed from the Customer's own phone.

Call Forward Busy:

Customer designates the number that the line will be forwarded under the conditions of busy. Calls can be forwarded to domestic, offshore, or cellular numbers. The Customer manually enters the number to which calls will be forwarded. The Customer is billed any usage charges for the forwarded call. This feature can be activated and deactivated when needed.

Call Forward No Answer:

Customer designates the number that the line will be forwarded under the conditions of no answer. Calls can be forwarded to domestic, offshore, or cellular numbers. The Customer manually enters the number to which calls will be forwarded. The Customer is billed any usage charges for the forwarded call. This feature can be activated and deactivated when needed.

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.1 One Communications Features (Cont'd)

10.1.1 One Communications Analog Voice Features and Service Options (Cont'd)

Call Forward Busy/No Answer:

Customer designates the number that the line will be forwarded under the conditions of busy or no answer. Calls can be forwarded to domestic, offshore, or cellular numbers. The Customer manually enters the number to which calls will be forwarded. The Customer is billed any usage charges for the forwarded call. This feature can be activated and deactivated when needed.

Three-Way Calling:

Allows the Customer to add a third party to an existing conversation utilizing a single line.

Call Transfer:

Allows the Customer to transfer incoming calls to other destinations, internal or external. This feature also gives the Customer the ability to make three-way conference calls at no additional charge.

Call Waiting:

Provides a short tone that lets the Customer know someone else is calling while they are on the phone. The first call can be put on 'hold' to allow the second call to be answered. This feature gives the Customer the ability to handle more than one call at a time.

Caller ID Number:

Caller ID Number displays the originating number of an incoming call on a display unit provided by the Customer. The Company does not provide the digital display box needed to use this feature. Some numbers may not display for a variety of reasons, including:

- Calls placed through a long distance carrier
- Calls from an area where caller ID is not available
- Calls placed from cellular phones
- Calls from someone who has activated caller ID blocking

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.1 One Communications Features (Cont'd)

10.1.1 One Communications Analog Voice Features and Service Options (Cont'd)

**Speed Dialing (8):**

Allows the Customer to dial frequently called numbers by using a one-digit code. Each line can have its own individual list of speed dial numbers, up to a maximum of eight numbers. Speed dialing can be programmed with domestic, offshore, Canadian and other international numbers if there are no toll restrictions on the line. This feature can be activated and deactivated when needed from the Customer's own phone.

**Enhanced Speed Dialing (30):**

Allows the Customer to dial frequently called numbers by using a two-digit code. Each line can have its own individual list of speed dial numbers, up to a maximum of thirty numbers. Speed dialing can be programmed with domestic, offshore, Canadian and other international numbers if there are no toll restrictions on the line. This feature can be activated and deactivated when needed from the Customer's own phone.

**Verified or Non-Verified Account Codes (analog or digital):**

Account codes offer the Customer the ability to identify and track calls by user and/or department so they can easily review all calling records and charge back costs to specific departments or clients. Two types of account codes are offered: Verified and Non-Verified. Requests for more than 100 account codes must be made via special request. Verified or non-verified account codes with two to eight digits are available for intrastate interLATA and interstate long distance.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.1 One Communications Features (Cont'd)

10.1.1 One Communications Analog Voice Features and Service Options (Cont'd)

**Outbound Caller ID:**

Outbound caller ID is the information that is sent from the Company to the caller ID unit on the terminating end of the call. The standard information sent is the account name and the billing telephone number (BTN). This feature has a character limitation of 15 characters.

**Multi-Line Hunting:**

All local telephone lines that are part of the same account can be set up to hunt. Hunting allows calls to a line to rollover to the next available line in the group when the first line is busy. Customers can have more than one hunt group. Customers can also choose to leave individual lines out of a hunt group. Customers will have the ability to present Outbound Caller ID from either the lead line of the hunt group or an individual calling line.

**Caller ID Blocking:**

Caller ID Blocking (also referred to as Call Privacy) allows Customers to block their name and number from being displayed on a caller ID unit at the terminating end of the call. This feature is turned on or off at the switch level and can be deactivated by the Customer on a per call basis.

**Anonymous Call Rejection:**

Allows Customers to prevent callers who intentionally block their number from getting through on their line. This feature is only available to Customers with Caller ID Number or Caller ID Name & Number. This feature can be activated and deactivated when needed from the Customer's own phone.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.1 One Communications Features (Cont'd)

10.1.1 One Communications Analog Voice Features and Service Options (Cont'd)

**Distinctive Ring:**

This feature allows a Customer to have two telephone numbers associated with a single line. Each telephone number has a unique ringing pattern and does not require an additional line. The ring of the incoming call is determined by which telephone number has been dialed. Two different ring patterns are available.

**Group Call Pick-Up:**

This feature will enable a Customer to answer an incoming call that has terminated to another user's station in the defined call pick-up group. A call pick-up is accomplished by dialing a pick-up access code while the called station is ringing. If more than one station in the group is ringing, the station that has begun ringing first will be intercepted first.

**Call Hold**

This feature allows the Customer to place a caller on hold for an extended period of time. The Customer simply presses the flash hook and hangs up the phone. To return to the call the Customer picks up the handset. This feature allows the Customer to make an outbound call while the other call is on hold.

**Assume or Dial 9**

Assume 9 means the Customer is not required to dial 9 to get an outside line. Dial 9 means the Customer is required to dial 9 to get an outside line.

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.1 One Communications Features (Cont'd)

10.1.1 One Communications Analog Voice Features and Service Options (Cont'd)

**Abbreviated Dialing:**

Allows a Customer to dial only the last three, four, or five digits of a phone number that is associated with the Customer's physical service location. This feature works between multiple locations of the same Customer if all locations are within the same local calling area.

**Call Return:**

A recording will give the Customer the number, date and time of the last incoming call. The Customer can have the number redialed automatically. If the last incoming call was blocked or the call was from a network with limited capabilities, the Customer will hear a message that the number they are trying to reach is private and cannot be called. Call Return will continue trying to connect the call for up to 30 minutes. This feature can be activated when needed from the Customer's own phone.

**Continuous Redial:**

Automatically redials the most recent outgoing call, freeing the Customer to move on to other things, including using the phone for other calls. This feature can be activated and deactivated when needed from the Customer's own phone.

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.1 One Communications Features (Cont'd)

10.1.1 One Communications Analog Voice Features and Service Options (Cont'd)

Caller ID Name and Number:

Caller ID Name and Number displays both the originating name and number of an incoming call on a display unit provided by the Customer. The Company does not provide the digital display box needed to use this feature. Some numbers may not display for a variety of reasons, including:

- Calls placed through a long distance carrier
- Calls from an area where caller ID is not available
- Calls placed from cellular phones
- Calls from someone who has activated caller ID blocking

Call Waiting with Caller ID Name & Number:

This feature allows Customers to view the name and number of an incoming call while another call is already in progress. The name and number will be displayed on the incoming call after the first call waiting tone is heard. Feature functionality cannot be obtained by purchasing Caller ID and Call Waiting separately.

Direct Line Connect:

Direct Line Connect allows an analog line to automatically dial a designated number whenever the originating line goes off-hook. This feature is assigned to a phone line that must be used only for one purpose. 911 cannot be the designated number.

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.1 One Communications Features (Cont'd)

10.1.2 One Communications Digital and PRI Voice Features and Service Options

Standard or PRI Configuration:

Standard 24B channel configuration with 56 kbps for each channel (8 kbps removed for signaling and call control) or PRI 23B + 1D configuration with 64 kbps clear channel on all B channels and signaling/call control on the D channel.

Hunting

Lowest available channel: Use the lowest available channel in the lowest available DS1.

Highest available channel: Use the highest available channel in the highest available DS1.

Least idle: Use the available channel that has been idle for the shortest time.

Most idle: Use the available channel that has been idle for the longest time. (PRI Only Option)

Direct Inward Dialing mg (DID):

Direct Inward Dialing enables the Customer to have fewer lines than extensions, while still having a unique number for each extension, callable from outside the Customer's location. The Company will allocate a range of telephone numbers and present them to the Customer's PBX so that the PBX can appropriately route the call based on the digits dialed.

Direct Outward Dialing (DOD):

Direct Outward Dialing allows subscribers within a Customer's PBX system to connect to outside lines directly. Using a DOD, Customers can provide each person or workstation within their company the ability to dial numbers directly.

10.1 One Communications Features (Cont'd)

10.1.2 One Communications Digital and PRI Voice Features and Service Options (Cont'd)

Direct Inward Dialing and Direct Outward Dialing (DID/DOD):

Both Direct Inward Dialing and Direct Outward Dialing may be furnished over the same facility.

Outbound Caller ID Name & Number:

Outbound Caller ID Name & Number displays the subscriber's directory name and number on the caller ID device of the called party. This feature has a 15-character limitation.

Inbound Caller ID Number Only:

Inbound Caller ID Number is only available with PRI service only and provides the number of the calling party to the party being called.

Verified or Non-Verified Account Codes (analog or digital):

Account codes provide Customers with the ability to identify and track calls by user and/or department. Two types of account codes are offered: Verified and Non-Verified. Requests for more than 100 account codes must be made via special request. Verified or non-verified account codes with two to eight digits are available for local, toll, intrastate interLATA and interstate long distance.

ESF/B8ZS or D4/AMI Circuit Framing:

Extended Super Frame/Binary 8 Zero Suppression and D4/Extended Super Frame are the two framing configurations that are available with the Company's Digital Voice solutions. D4/AMI service is subject to availability.

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.1 One Communications Features (Cont'd)

10.1.2 One Communications Digital and PRI Voice Features and Service Options (Cont'd)

Non-Facility Associated Signaling (NFAS) for ISDN PRI option:

NFAS allows a single D channel to control multiple PRI's. Customers who desire redundancy in the event of facility failure have the option of ordering additional backup D channels, which will be furnished for a charge.

Inbound Caller ID Name & Number:

With Inbound Caller ID Name & Number, the name and number of the calling party is transmitted with a call and displayed on a Customer's Caller ID capable phone. The feature will not work if the Customer does not have PRI and Caller ID capable equipment.

Direct Inward Dialing Number Blocks:

The Company will provide telephone numbers for direct inward dialing number service in blocks of 20, 50 or 100. A monthly recurring charge applies for each block ordered.

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.7 One Communications Toll-Free Service

10.7.1 Description of Services

One Communications Toll-Free Service offers Customers inbound calling where a toll-free number is provided for the purpose of receiving calls at no expense to the calling party.

One Solutions service packages provide Customers with a bundled number of toll and toll-free minutes per line for a flat monthly fee. Customers who exceed their allotted number of minutes in any given month will be billed a per minute rate on their overage minutes. One Communications Toll-Free service is not available on a standalone basis. A monthly recurring charge does not apply to the first toll-free number ordered, but does apply to additional toll-free numbers. Toll-free numbers must terminate to a valid phone number assigned in connection with a OneSolutions Essential or One Solutions Enhanced service package.

Toll-free numbers are reserved and assigned at random to each Customer from a general pool of available toll-free numbers provided to the Company.

Vanity numbers may be requested by the Customer; however, the Company does not guarantee the availability of any vanity numbers. Requests for vanity numbers are subject to a non-recurring charge.

10.7 One Communications Toll-Free Service (Cont'd)

10.7.2 One Communications Toll-Free Service Features

The following features are available in conjunction with the Company's toll free service. Features can be ordered separately or in combination. A non-recurring charge applies when features are ordered, changed or disconnected subsequent to installation of the initial service:

Info Digit Blocking

Info Digit Blocking blocks calls based on the type of telephone from which the call originates, such as calls originating from payphones or prison phones.

Info Digit Routing

Info Digit Routing routes and controls calls based on telephone line type.

Point of Origination Blocking (3/6/10 Digit Blocking)

Point of Origination Blocking allows or blocks calls based on originating NPA, NPA-NXX or 10 digit numbers.

Point of Origination Routing (3/6/10 Digit Routing)

Point of Origination Routing routes calls to a predetermined location based on originating NPA, NPA-NXX or 10 digit numbers.

Time of Day Routing (Time and Day of Week Routing)

Time of Day Routing routes calls to different locations based on the time and day of the week.

Day of Year Routing

Day of Year Routing routes calls to a different location based on day of the year.

Percent Call Allocation Routing

Percent Traffic Allocation routing provides Customers with the ability to route calls to different locations based on a predetermined percentage of calls received.

Pre-Defined Alternative Routing Profiles

Pre-Defined Alternative Routing establishes alternate routing profiles, which can be activated in various predefined situations.

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.8 One Communications Cancellation and Early Termination of Service

10.8.1 Cancellation of Service

If Customer elects to cancel the service prior to installation, Customer shall owe the Company an amount equal to (I) one month's recurring charge for the service plus (II) the non-recurring charge for such service set forth in this price guide. The Customer will also be liable to the Company for any direct costs incurred by the Company as a result of the service cancellation (including any cancellation or early termination fees imposed on the Company by any service provider that was to be utilized to deliver the cancelled service).

10.8.2 Early Termination of Service

If Customer elects to terminate all or any portion of a service furnished pursuant to a fixed-term agreement subsequent to the service installation date but prior to the end of the fixed-term, Customer shall owe the Company an amount equal to the applicable monthly recurring charge for the disconnected service(s) or portion of service multiplied by the number of months remaining in the selected term. The Customer will also be liable to the Company for any direct costs incurred by the Company as a result of early termination (including any cancellation or early termination fees imposed on the Company by any service provider that was utilized to deliver the terminated service).

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.11 OneSolutions Essential

10.11.1 General

OneSolutions Essential service is a multifunctional service that provides voice and high speed asymmetrical data services to business customers on an integrated basis over a single high-speed transmission facility. OneSolutions Essential service is only available where suitable facilities permit.

Customers selecting OneSolutions Essential will receive:

Three initial analog voice DS0 channels and up to three additional DS0 voice grade DS0 channels, which may be purchased on an optional basis.

Unlimited local calling.

250 domestic toll and toll-free minutes per line. Minutes will be aggregated across all voice grade DS0 channels included in the OneSolutions Essential service package (limit of 6 DS0s per service package). Included minutes not used within the billing cycle are lost.

The following analog voice features are included at no additional charge with OneSolutions Essential: Call Forward Variable (all calls), Call Forwarding Remote Access, Call Forward Busy, Call Forward No Answer, Call Forward Busy/No Answer, Three-Way Calling, Call Transfer, Call Return, Call Waiting, Caller ID Number, Distinctive Ring, Group Call Pick-Up, Continuous Redial, Speed Dialing (8), Enhanced Speed Dialing (30), Assume or Dial 9, Abbreviated Dialing, Voice Mail, Verified or Non-Verified Account Codes, Outbound Caller ID (CNAM), Multi-Line Hunting, Caller ID Blocking, Anonymous Call Rejection, Call Hold, Touch Tone. Customers that choose OneSolutions Essential may purchase additional One Communications Analog Voice Features at rates set forth in this price guide.

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.11 OneSolutions Essential (Cont'd)

10.11.1 General (Cont'd)

Customers selecting OneSolutions Essential will receive: (Cont'd.)

High-speed data services at speeds of up to 1.5 Mbps downstream and 768 kbps upstream. Upgrade options for bandwidth at 3 Mbps downstream/768 kbps upstream or 7.1 Mbps downstream/768 kbps upstream may be purchased for an additional MRC.

One toll-free number.

---

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.11 OneSolutions Essential (Cont'd)

10.11.2 Restrictions

The maximum number of voice grade DS0 channels that can be ordered with a OneSolutions Essential service package is six. Additional lines purchased outside of OneSolutions Essential are available to Customers and will be provided in accordance with the rates, terms and conditions set forth in the Company's Massachusetts Facilities-Based Local Price Guide No. 2 Price guide.

A measured rate (per minute) will apply to domestic toll and toll-free usage in excess of OneSolutions Essential maximum of 250 minutes per DS0 channel (minutes aggregated across all lines that are part of OneSolutions Essential).

Unlimited local usage applies only to voice grade DS0 channels included in the OneSolutions Essential service package.

Unlimited local minutes included under OneSolutions Essential will only apply to voice grade service and is not available for the following types of applications:

Call centers, telemarketers and other companies that utilize auto-dialer or like applications.

Internet dial up connections and other data applications (including access to corporate LANs).

Calls to Directory Assistance, Operator Assisted and third party billed calls, international calls, and calls to Canada and Mexico are not included in the OneSolutions Essential local and toll calling plans. Directory and Operator Assisted Calls will be billed in accordance with the rates and charges set forth in the One Communications Operator Services and Directory Assistance section of this price guide. Calls to Canada, Mexico and International locations will be billed in accordance with the Company's standard published rates.

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.11 OneSolutions Essential (Cont'd)

10.11.2 Restrictions (Cont'd)

Toll-free numbers are available for use but are not the property of the Customer and cannot be sold or assigned without the Company's permission.

Customers that order OneSolutions Essential must pre-subscribe to the Company's toll and Long Distance service.

Customer-premises equipment must be compatible with Company provided equipment including but not limited to any integrated access device (IAD) that the Company may install on the Customer's premise. Unless otherwise agreed to in writing, any IAD or other equipment installed by the Company at the Customer's premise shall, at all times remain the property of the Company. Upon termination of service, the Customer will provide the Company reasonable access to the Customer's premises for purposes of removing Company-provided equipment. In the event the Customer fails to provide the Company with said access or should Company-provided equipment be returned to the Company in worse condition than that which could be reasonably expected from normal use and wear, then Customer will be liable to the Company for the then current replacement cost of such equipment.

Alarm lines are not available with a OneSolutions Essential service package.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.12 OneSolutions Enhanced

10.12.1 General

OneSolutions Enhanced service provides business Customers with channels of analog or digital voice, high-speed data and as well as intra-company private networking services on an integrated basis via a single transmission facility. OneSolutions Enhanced service is only available where suitable facilities exist.

Customers selecting OneSolutions Enhanced will receive:

Six voice channels. Up to nine additional voice channels may be purchased as part of OneSolutions Enhanced service package.

Unlimited local calling.

500 domestic toll and toll-free minutes per line. Minutes will be aggregated across all channels included in a OneSolutions Enhanced service package (limit of 15 channels per service package). Allotted minutes not used within a given month are lost and may not be carried over to subsequent months.

The following analog voice features are included at no additional charge with OneSolutions Enhanced: Call Forward Variable (all calls), Call Forwarding Remote Access, Call Forward Busy, Call Forward No Answer, Call Forward Busy/No Answer, Three-Way Calling, Call Transfer, Call Return, Call Waiting, Caller ID Number, Distinctive Ring, Call Pick-Up, Continuous Redial, Speed Dialing (8), Enhanced Speed Dialing (30), Assume or Dial 9, Abbreviated Dialing, 5 Voice Mail boxes, Verified or Non-Verified Account Codes, Outbound Caller ID (CNAM), Multi-Line Hunting, Caller ID Blocking, Anonymous Call Rejection, Call Hold, Touch Tone. Customers that choose OneSolutions Enhanced may purchase additional One Communications Analog Voice Features at rates set forth in this price guide.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.12 OneSolutions Enhanced (Cont'd)

10.12.2 Restrictions

The maximum number of voice channels that can be ordered under a OneSolutions Enhanced service package is fifteen. Where available, additional lines or channels can be ordered outside of the One Solutions Enhanced service package, provided however, that such additional lines or channels will be provided at the Company's standard market rates. Usage on such additional lines or channels is excluded from the calling plans offered in connection with OneSolutions Enhanced service.

A measured rate (per minute) will apply to domestic toll and toll-free usage in excess of OneSolutions Enhanced maximum of 500 minutes per line (minutes aggregated across all lines that are part of OneSolutions Enhanced).

Unlimited local usage applies only to voice channels that are furnished in connection with the OneSolutions Enhanced service package.

Unlimited local minutes included under OneSolutions Enhanced will only apply to voice grade service and is not available for the following types of applications:

Call centers, telemarketers and other companies that utilize auto-dialer or like applications.

Internet dial-up connections and other data applications (including access to corporate LANs).

Calls to Directory Assistance, Operator Assisted and third party billed calls, international calls, and calls to Canada and Mexico are not included in the OneSolutions Enhanced local and toll calling plans. Directory and Operator Assisted Calls will be billed in accordance with the rates and charges set forth in the One Communications Operator Services and Directory Assistance section of this price guide. Calls to Canada, Mexico and International locations will be billed in accordance with the Company's standard published rates.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.13 OneSolutions Complete

10.13.1 General

OneSolutions Complete is a converged service capable of providing voice, Internet and data services delivered via IP to the Customer's service location. Customers may choose a voice only, a voice and Internet only or a voice, Internet and MPLS VPN configuration. OneSolutions Complete is available only for business Customers. Additional charges may apply to Customers who reside in rate centers where the Company does not have a node. Service is only available where suitable facilities exist.

Customers who subscribe to OneSolutions Complete will be provided with the option to purchase service bundled with a package of 100,000 local minutes. Allotted minutes not used within a given month are lost and may not be carried over to subsequent months.

Customers will also have the option to purchase Call Packs of Domestic Toll Minutes (includes Local Toll, Domestic Toll and Domestic Toll-Free).

The following analog voice features are included at no additional charge with OneSolutions Complete: Call Forward Variable (all calls), Call Forwarding Remote Access, Call Forward Busy, Call Forward No Answer, Call Forward Busy/No Answer, Three-Way Calling, Call Transfer, Call Waiting, Caller ID Number, Distinctive Ring, Group Call Pick-Up, Speed Dialing (8), Enhanced Speed Dialing (30), Assume or Dial 9, Abbreviated Dialing, Verified or Non-Verified Account Codes, Outbound Caller ID (CNAM), Multi-Line Hunting, Caller ID Blocking, Anonymous Call Rejection and Call Hold. Customers may purchase additional One Communications Analog Voice Features at rates set forth in this price guide.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.13 OneSolutions Complete (Cont'd)

10.13.2 Restrictions

Lines purchased with packages of calls or minutes may not be available for the following types of applications:

Call centers, telemarketers and other companies that utilize auto-dialer or like applications.

Internet dial up connections and other data applications (including access to corporate LANs).

Calls to Directory Assistance, Operator Assisted and third party billed calls, international calls, and calls to Canada and Mexico are not included in the One Communications OneSolutions Complete service local and toll calling plans. Directory and Operator Assisted Calls will be billed in accordance with the rates and charges set forth in the One Communications Operator Services and Directory Assistance section of this price guide. Calls to Canada, Mexico and International locations will be billed in accordance with the Company's standard published rates.

Alarm lines are not available as part of OneSolutions Complete.

Toll-free numbers are available for use but are not the property of the Customer and cannot be sold or assigned without the Company's permission.

Customer-premises equipment must be compatible with Company provided equipment including but not limited to any integrated access device (IAD) that the Company may install on the Customer's premise. Unless otherwise agreed to in writing, any IAD or other equipment installed by the Company at the Customer's premise shall, at all times remain the property of the Company. Upon termination of service, the Customer will provide the Company reasonable access to the Customer's premises for purposes of removing Company-provided equipment. In the event the Customer fails to provide the Company with said access or should Company-provided equipment be returned to the Company in worse condition than that which could be reasonably expected from normal use and wear, then Customer will be liable to the Company for the then current replacement cost of such equipment.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 10 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

10.13 OneSolutions Complete (Cont'd)

10.13.3 Application of Rates

- A. **Basic Monthly Recurring Charges**  
Monthly recurring charges as described below apply to Customers who subscribe to One Communications OneSolutions Complete service under one, two or three year term contracts.
- B. **Local Usage**  
Local usage is provided on a measured, per minute basis. Local usage rates will apply to service not ordered as bundled with a package of 100,000 local minutes. Customers who exceed their allotted number of local minutes in any given month will be billed a per minute rate on their overage minutes (local usage rate will apply).
- C. **Domestic Toll Usage**  
Domestic toll service (includes Local Toll, Domestic Toll and Domestic Toll-Free) is furnished on a usage sensitive basis and is subject to a per minute rate. Domestic toll usage rates will apply to service not ordered with a Call Pack of domestic toll minutes. Customers who exceed their allotted domestic toll usage Call Pack of minutes in any given month will be billed a per minute rate on their overage minutes.

FACILITIES-BASED DATA AND VOICE COMMUNICATIONS SERVICES

---

**SECTION 13 - MISCELLANEOUS (CONT'D.)**

13.2 Presubscribed Interexchange Long Distance (PILD) Charge

The Presubscribed Interexchange Long Distance (PILD) Charge is a monthly charge applicable to multi-line business, ISDN-PRI and T-1 Customers' lines or line equivalents that are presubscribed to the Company's long distance service. For ISDN-PRI and T-1 Customers, the Company will assess five (5) PICC charges per circuit. The aggregate of these PILD charges will not be prorated for a partial month of service, are not subject to any discounting and do not contribute to any monthly minimums. Customers subscribed to the Company for both their interLATA and intraLATA long distance service will be subject to a single PILD charge per line. Customers subscribed to the Company for both their interLATA and intraLATA long distance service will be subject to a single PILD charge per line.

13.3 Instate Access Recovery Fee (IARF)

A monthly service charge that is applied to Customers subscribed to the Company for long distance services associated with residential or single-line business telephone lines. This charge is intended to recover costs incurred by the Company in providing in-state long distance service over Customer's local exchange provider's network. This charge is not subject to any discounting and does not contribute to any monthly minimums.
