**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**EXPLANATION OF SYMBOLS**

The following symbols shall be used in this price guide for the purpose indicated below:

- C - to signify a changed regulation.
- D - To signify a discontinued rate or regulation.
- I - To signify an increase in a rate.
- M - To signify text or rates relocated without change.
- N - To signify a new rate or regulation or other text.
- R - To signify a reduction in a rate.
- S - To signify reissued regulations.
- T - To signify a change in text but no change in rate.
- Z - To signify a correction.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**PRICE GUIDE FORMAT**

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially, however, new pages are occasionally added to the price guide. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version. For example, the 4<sup>th</sup> Revised Page 14 cancels the 3<sup>rd</sup> Revised Page 14.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
  - 2.
  - 2.1.
  - 2.1.1.
  - 2.1.1.A.
  - 2.1.1.A.1.
  - 2.1.1.A.1.(a).
  - 2.1.1.A.1.(a).I.
  - 2.1.1.A.1.(a).I..
  - 2.1.1.A.1.(a).I..(1).

**TRADEMARKS AND SERVICE MARKS**

Designations used by the company to distinguish its products and services are claimed as trademarks or service marks. Rather than printing a trademark symbol or service mark symbol with every occurrence of a trademarked or service marked product name as it is used throughout this price guide, let it be stated that when using names of Company products and services herein, such use is in an editorial fashion. Following are the proper use names of the Company trademarks and service that are referred to herein in terms of products and service offerings.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 1 - DEFINITIONS**

Certain terms used generally throughout this price guide are defined below.

**Advance Payment:** Part or all of a payment required before the start of service.

**Asynchronous Transmission Mode (ATM):** A high-speed switching technique that uses fixed type cells to transmit voice, video and data over fiber optic cabling.

**Automatic Number Identification (ANI):** Allows the automatic transmission of a caller's billing account telephone number to a local exchange company, interexchange carrier or a third party subscriber. The primary purpose of ANI is to allow for billing of toll calls.

**Bit:** The smallest unit of information in the binary system of notation.

**Broadband:** A data transmission scheme where multiple transmissions including voice, data and video share a communications path.

**Byte:** A grouping of Bits. A Byte may or may not be directly translatable into information meaningful to the user.

**Committed Information Rate (CIR):** The speed of transmission guaranteed between a Customer's site and the frame relay network.

**Communications Services:** The Company's intrastate data and voice ATM switched telecommunications services offered for both limited IntraLATA and InterLATA use.

**Company:** CTC Communications Corp. , the issuer of this price guide.

**Commission:** The Maryland Public Service Commission

**Completed Call:** A call which the Company's network has determined has been answered by a person, answering machine, fax machine, computer modem device or other answering device.

**Customer or Subscriber:** The person, firm or corporation which orders service and is responsible for the payment of charges and compliance with the Company's regulations.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 1 - DEFINITIONS (CONT'D.)**

**DSX-1 Panel:** Distribution equipment used to terminate and administer DS1 (1.544 Mbps) circuits.

**Dual Tone Multi-Frequency (DTMF):** The pulse type employed by tone dial station sets.

**Duplex Service:** Service which provides for simultaneous transmission in both directions.

**Ethernet:** A local area network protocol defined by the IEEE. It defines how data is transmitted on and retrieved from local area computer networks.

**Federal Communications Commission (FCC):** Independent government agency that develops and implements policy concerning interstate and international communications.

**Fiber Optic Cable:** A thin filament of glass with a protective outer coating through which a light beam carrying communications signals may be transmitted by means of multiple internal reflections to a receiver, which translates the message.

**Frame Relay:** A public, primarily data network service for local area network to local area network connections.

**Gateway:** A device which allows equipment with different protocols to communicate with each other.

**Integrated Access Device (IAD):** Installed at Customer's location, this equipment converts voice and data traffic into ATM Cells.

**Integrated Communications Network (ICN):** The Company's facilities-based network which utilizes ATM switching protocol to provide uncompressed PVC based voice connectivity, variable CIR, Full Port CIR and Hybrid Frame Relay/ATM service, dedicated internet access and videoconferencing connectivity services.

**Kbps:** Kilobits per second, denotes thousands of bits per second.

**Key System:** A Key system is an on-site telephone system geared to under 100 telephone organizations. Like a PBX, a Key System switches calls to and from the public network and within the user's organization.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 1 - DEFINITIONS (CONT'D.)**

**Local Access and Transport Area (LATA):** A Local Access and Transport Area established pursuant to the Modification of Final Judgment entered by the United States District Court for the District of Columbia in Civil Action No. 82-0192; or any other geographic area designated as a LATA in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

**Local Area Network (LAN):** Located on an individual organization's premises, a LAN enables computer devices to communicate with each other.

**Local Exchange Carrier (LEC):** Denotes any individual, partnership, association, joint-stock company, trust or corporation engaged in providing switched communication within an exchange.

**M.P.S.C.:** The Maryland Public Service Commission.

**Master Service Agreement:** The master document executed by the Customer and the Company under which all Company services are provided. The Master Services Agreement sets forth the general terms and conditions under which services will be provided.

**Mbps:** Megabits, denotes millions of bits per second.

**Multi-Frequency (MF):** An inter-machine pulse-type used for signaling between telephone switches, or between telephone switches and PBX/key systems.

**Multiplexing:** A technique whereby multiple devices can share one telephone line.

**Permanent Virtual Circuit (PVC):** A point to point connection through the Company's ICN connecting two locations.

**Private Branch Exchange (PBX):** A computerized on-site telephone system located on a Customer's premises which routes calls both within an organization and from the outside world to people within the organization.

**Recurring Charges:** The monthly charges to the Customer for services, facilities and equipment, which continue for the agreed upon duration of the service.

**Residential Customer:** A Customer who has telephone service at a dwelling and who uses the service primarily for domestic or social purposes. All other Customers are non-residential Customers.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 1 - DEFINITIONS (CONT'D.)**

**Service:** Any telecommunications service(s) provided by the Company under this price guide.

**Service Commencement Date:** The first day following the date on which the Company notifies the Customer that the requested service or facility is available for use, unless extended by the Customer's refusal to accept service which does not conform to standards set forth in the Service Order or this price guide, in which case the Service Commencement Date is the date of the Customer's acceptance. The Company and Customer may mutually agree on a substitute Service Commencement Date.

**Service Addendum:** The written request for a specific Network Services executed by the Customer and the Company in the format devised by the Company. The signing of a Service Addendum by the Customer and acceptance by the Company initiates the respective obligations of the parties as set forth therein and pursuant to this price guide, but the duration of the service is calculated from the Service Commencement Date. Service Addenda are incorporated into the terms of the Master Service Agreement.

**Shared:** A facility or equipment system or subsystem that can be used simultaneously by several Customers or several Customer locations.

**Station:** A telephone instrument consisting of a connected transmitter, receiver and associated apparatus to permit sending or receiving telephone messages.

**Two Way:** A service attribute that includes outward dial capabilities for outbound calls and can also be used to carry inbound calls to a central point for further processing.

**User or End User:** A Customer, Joint User, or any other person authorized by a Customer to use service provided under this price guide.

**Wide Area Network (WAN):** Connects computers which are located in different cities, states and countries.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 3 - APPLICATION OF RATES**

3.1 Introduction

The regulations set forth in this section govern the application of rates for services contained in other sections of this price guide.

3.2 Charges Based on Duration of Use

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

3.2.1 Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.

3.2.2 Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.

3.2.3 Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.

3.2.4 Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.

3.2.5 All times refer to local time.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 3 - APPLICATION OF RATES (CONT'D.)**

**3.3 Rates Based Upon Distance**

Where charges for a service are specified based upon distance, the following rules:

- 3.3.1 Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in the Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

Effective: December 29, 2017

---

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 3 - APPLICATION OF RATES (CONT'D.)**

3.3 Rates Based Upon Distance (Cont'd.)

3.3.2 The airline distance between any two rate centers is determined as follows:

- A. Obtain the "V" (vertical) and "H" (horizontal) coordinates for each rate center from the above-referenced Bellcore document.
- B. Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.
- C. Square each difference obtained in step (B) above.
- D. Add the square of the "V" difference and the square of the "H" difference obtained in step (C) above.
- E. Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
- F. Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.
- G. Formula:

$$\sqrt{\frac{|V_1 - V_2|^2 + |H_1 - H_2|^2}{10}}$$

3.5.1 Types of Rates and Charges

A. Monthly Rates

Monthly Rates are recurring rates that apply each month or fraction thereof that the service is provided. For billing purposes, each month is considered to have thirty (30) days.

Monthly recurring rates apply each month or fraction thereof that the PowerPath<sup>SM</sup> facility and each Service Channel provided. Customers who subscribe to the Service Discount Plan, as set forth in Section 3.5.4, of this price guide, will be subject to early termination regulations as set forth in Section 3.5.4, of this price guide, if any service discontinued before the completion of the selected commitment plan.

1. PowerPath<sup>SM</sup> Network Connection Charge (PPN CC)

Customers who subscribe to the Company's Network will receive a monthly recurring access charge. Customers have the option of subscribing to a T-1 or T-3 PowerPath<sup>SM</sup> Network (PPN) Connection as set forth in Section 6.2, following. Rates and Charges for access connections are located in Section 6.7, following.

a. T-1 PPN Connection Charge

Depending on the geographical location of the Carrier's designated premises, the Customer's monthly recurring charge for access to the Company's network will be designated as a Premium Band Network Connection Charge or Secondary Band PowerPath<sup>SM</sup> Network Connection Charge, as defined in (a) and (b), of this price guide.

B. Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation or change to an existing service). The types of nonrecurring charges that apply are for installation of service, service rearrangements and additional installations.

1. Installation of Service

Customers will be charged a Nonrecurring Installation Charge for each PowerPath<sup>SM</sup> Network Connection Charge at rates set forth in Section 6.7, following, as the nonrecurring charge for the Power Path Facility rate element. Customers subscribing to the 24 Month Service Commitment Plan, as set forth in Section 3.5.4, following, are eligible to receive a reduced installation charge, for each PowerPath<sup>SM</sup> Network Connection ordered, at the rates set forth in Section 6.7, following.

Customers who subscribe to Frame Relay Service will receive the First Permanent Virtual Channel (PVC) free of charge. Additional PVCs will be installed at the Rates and Charges as set forth in Section 8.5., following.

2. Other Non-Recurring Charges

Service Order Charges as set forth in Section 3.6, following are also one time charges. Charges such as Work Order, Service Channel Installation to existing PowerPath<sup>SM</sup> facilities and Service Rearrangements will incur a one-time charge.

3.5 Rate Regulations (Cont'd.)

3.5.2 Moves

A move involves a change in physical location of one of the following:

- the point of termination at the Customer's designated premises.
- the Customer's designated premises.

A. Moves within the Same Building

When a move is to a new location within the same building the charge for the move will be amount equal to the applicable PowerPath<sup>SM</sup> Facility installation nonrecurring charge for the service affected as set forth in Section 3.5.4., preceding. There will be no change in the minimum period or Service Discount Plan requirements.

B. Moves to a Different Building

Moves to a different building will be treated as a disconnection and start of service and all associated nonrecurring charges will apply. New minimum period and / or Service Discount Plan requirements will be established for the new services. The Customer will also remain responsible for satisfying all outstanding minimum period and / or termination liability charges for the discontinued service except as set forth in Section 3.5.4, preceding.

3.5.3 Minimum Periods

The minimum period for Business Network Exchange Access Service is Twelve (12) months.

3.5.4 Service Discount Plan

A. General

Customers subscribing to the Company's Business Network Exchange Access Service and Frame Relay Service have the option of requesting, at any time, a Service Discount Plan, for some or all of their services.

When requesting a Service Discount Plan the Customer must specify which services are to be included in the Service Discount Plan.

B. Description

A Service Discount Plan applies to the T-1 or T-3 PowerPath<sup>SM</sup> Facility and Frame Relay Service Access Connection monthly recurring charge and to the T-1 or T-3 PowerPath<sup>SM</sup> Facility nonrecurring charge. The amount of the discount differs based on the length of the commitment period selected as the commitment period for the Service Discount Plan. Service Discount Plans are offered in twelve (12) months and twenty-four (24) months periods.

The discount is applied to the currently effective monthly or nonrecurring rates. Monthly Recurring Rates may be changed during the commitment period of the Service Discount Plan, thereby creating an increase or decrease in the rates applicable to the Customer.

D. Termination Liability

1. Plans

Month - to - Month - Following expiration of any applicable Minimum Period, a Customer may terminate any service provided under a month to month service option with sixty (60) days written notice.

Term Plans - In the event a Customer terminates either a twelve (12) month, Twenty-Four (24) month or a Thirty-six (36) month term plan for Business Exchange Network Access Service as set forth in Section 5, the Customer will be assessed a termination charge in an amount equivalent to the cost of monthly access plus the monthly minimum service commitment as set forth in Section 3.5.5, following for the remaining months of the contract.

2. Moves

When a Customer requests that some or all of its service under a Service Discount Plan be moved to a different building, no termination liability charge applies provided the services remain on the same billing account. When a Customer requests that some or all of its service(s) under a Service Discount Plan be moved to a different building, no termination liability charge applies provided the service remains in the same Operating Territory.

4. Additions to Service

a. When a Customer with an existing Service Discount Plan wishes to increase the number of services the Customer has the following options.

(i) Subscribe to the additional services under non-discounted rates.

(ii) Subscribe to the additional services under a separate Service Discount Plan at the effective discounted rates and charges.

(iii) Cancel the existing Service Discount Plan and include both the existing and the additional services under a new Service Discount Plan for a commitment period equal or longer than the original period, no termination charges apply to such cancellation.

5. Extension of Commitment Plan

A Customer may at any time prior to the expiration of a commitment period for an existing Service Discount Plan, change to a Service Discount Plan with a longer commitment plan at the effective discounted rates and charges. No termination liability charges will apply for any service(s) extended to under the longer commitment period. The longer commitment period rates and charges will be effective with the next billing period.

6. Regulations

Where the Service Discount Plan is requested to be provided coincident with the connection of new service, it will be effective with the establishment of service.

At the end of a Service Discount Plan's commitment period, the Customer will have the option of subscribing to any of the then effective Service Discount Plan at the current rates and charges. If the Customer does not notify the Company of its choice prior to the expiration date of the commitment period, the Customer's current Service Discount Plan will be renewed upon the expiration of the selected period. The renewed plan will have a commitment plan equal to that originally selected by the Customer and the plan will be considered new.

If the Customer notifies the Company of its choice with sixty (60) days of the date of the renewal, the Customer may cancel the renewed plan and subscribe to any effective Service Discount Plan or continue with the new plan. If within the first sixty (60) days of the date of the renewal, the Customer elects to cancel the renewed plan and subscribe to the minimum commitment period or subscribe to a then effective Service Discount Plan, termination liability will not apply.

**SECTION 3 - APPLICATION OF RATES (CONT'D.)**

3.6 Service Order Charge

3.6.1 General

A Service Order Charge is a nonrecurring charge which applies to the following: (a) the installation of a new service; (b) the transfer of an existing service to a different location; (c) Work Orders; (d) Installation of additional Service Channel Equivalents, (e) Service Rearrangements and / or (f) restoral of service after suspension or termination for nonpayment. Service charges are in addition to all other applicable rates and charges for service provided by the Company. Connection Charges are listed with each service to which they apply.

A. Work Order Charge

When work is performed by the Company subsequent to the initial installation in connection with the receiving, recording and processing of Customer requests for service this charge is applicable. The Work Order Charge as set forth in Section 3.6.2, following, is in addition to other nonrecurring charges such as Service Rearrangements and Additional DS0 Installations subsequent to the initial installation as set forth in (3) and (4), following.

Types of receiving, recording and processing of Customer requests are as follows:

- change in Customer name,
- change in Customer end user premises address when the change of address is not a result of a physical relocation of equipment,
- change in agency authorization,
- change of circuit identification,
- change of billing account number,
- change of Customer test line number,
- change of Customer end user contact or telephone number,
- change in jurisdiction,
- DS0s Installations, subsequent to the initial installation, and
- Service Rearrangements.
- Restoral of Service

B. Service Channel Installations

At the request of the Customer, the Company will provide additional Service Channel Equivalents to an existing T-1 or T-3 PowerPath<sup>SM</sup> Network Connection that has not reached capacity at the rates and charges set forth in Section 3.6.2, following, for each additional Service Channel.

C. Service Rearrangements

Service Rearrangements are changes to existing (installed) services which do not result in either a change in minimum period requirements or a change in the physical location of the point of termination at the Customer designated premises. Changes which result in a change in the minimum period requirements are treated as discontinuances of existing service and installation of new service. Changes in the physical location of the point of termination at a Customer designated premises are treated as moves and are described in 3.5, preceding.

Service Rearrangements include the reallocation of existing channels on the PowerPath<sup>SM</sup> Facility.

**SECTION 4 - INTRALATA TOLL PRESUBSCRIPTION**

4.1 General

IntraLATA Toll Presubscription is a procedure whereby an end user or Pay Telephone Service Provider may select and designate an IntraLATA Toll Provider (“ITP”) to access IntraLATA toll calls without dialing an access code. The end user or Pay Telephone Service Provider may designate an ITP for IntraLATA toll, a different carrier for InterLATA toll, or the same carrier for both. This ITP is referred to as the end user or Pay Telephone Service Provider preferred IntraLATA toll provider.

Each carrier will have one or more access codes assigned to it for various types of service. When an end user or Pay Telephone Service Provider selects a carrier as its preferred IntraLATA toll provider, only one access code of that carrier may be incorporated into the switching system of the Telephone Company permitting access to that carrier by the end user or Pay Telephone Service Provider without dialing an access code. Should the same end user or Pay Telephone Service Provider wish to use other services of the same carrier, it will be necessary for the end user or Pay Telephone Service Provider to dial the necessary access code(s) to reach that carrier’s other service(s).

An ITP must use Feature Group D (“FGD”) Switched Access Service to qualify as an IntraLATA toll provider. All ITPs must submit a Letter of Intent (“LOI”) to the Telephone Company at least twenty (20) days prior to the IntraLATA toll-presubscription-conversion date or, if later, forty-five (45) days prior to the date on which the carrier proposed to begin participating in IntraLATA toll presubscription.

Selection of an ITP by an end user or Pay Telephone Service Provider is subject to the terms and conditions set forth herein.

---

**SECTION 4 - INTRALATA TOLL PRESUBSCRIPTION (CONT'D.)**

4.2 Presubscription Charge Application

4.2.1 Ninety (90) Day Initial Free Presubscription Choice for Existing Users

Existing end users or Pay Telephone Service Providers may exercise an initial free presubscription choice, either by contacting the Telephone Company, or by contacting the ITP directly. The initial free choice must be made within ninety days following implementation of IntraLATA toll presubscription. End user or Pay Telephone Service Provider choices that constitute exercising the free choices are:

- A. Designating an ITP as their primary carrier, thereby requiring no access code to access that ITP's service. Other carriers are accessed by dialing 101-XXXX or other required codes.
- B. Choosing no carrier as a primary carrier, thus requiring 101-XXXX code dialing to access all ITPs. This choice can be made by directly contacting the Telephone Company.

Following an existing end user's or Pay Telephone Service Provider's free selections, and change made more than ninety (90) days after presubscription is implemented is subject to a nonrecurring charge as set forth in the Company's tariffs on file with the Commission.

---

**SECTION 4 - INTRALATA TOLL PRESUBSCRIPTION (CONT'D.)**

4.2 Presubscription Charge Application (Cont'd.)

4.2.2 Initial Free Presubscription Choice for New Users

New end users (including an existing Customer who orders an additional line) or Pay Telephone Service Providers who subscribe to service after the presubscription implementation date will be asked to select a primary ITP when they place an order for Telephone Company Exchange Service. If a Customer cannot decide upon an ITP at the time, the Customer will have thirty (30) days following completion of the service request to make an IntraLATA PIC choice without charge. In the interim, the Customer will be assigned a "No-PIC" and will have to dial an access code to make IntraLATA toll calls. The free selection period available to new end users and Pay Telephone Service Providers is the period within thirty (30) days of installation of the new service.

Initial free selection available to new end users or Pay Telephone Service Providers are:

- A. Designating an ITP as their primary carrier, thereby requiring no access code to access that ITP's service. Other carriers are accessed by dialing 101-XXXX or other required codes.
- B. Choosing no carrier as a primary carrier, thus requiring 101-XXXX code dialing to access all ITPs. This choice can be made by directly contacting the Telephone Company.

Following a new end user's or Pay Telephone Service Provider's free selections, any change made more than thirty (30) days after presubscription is implemented is subject to a nonrecurring charge, as set forth in the Company's tariffs on file with the Commission.

---

**SECTION 4 - INTRALATA TOLL PRESUBSCRIPTION (CONT'D.)**

4.2 Presubscription Charge Application (Cont'd.)

4.2.3 Charge for IntraLATA Toll Presubscription

After expiration of the initial free presubscription choice period for new Customers, as specified above, or existing Customers, the end user or ITP will be assessed an IntraLATA Toll presubscription charge as specified in the Company's tariffs on file with the Commission.

4.2.4 Cancellation of IntraLATA Toll Presubscription

If an ITP elects to discontinue FGD service after implementation of the IntraLATA toll presubscription option, the ITP is obligated to contact, in writing, all end users or Pay Telephone Service Providers who have selected the canceling ITP as their preferred IntraLATA toll provider. The ITP must inform the end users or Pay Telephone Service Providers that it is canceling FGD service, request that the end user select a new ITP and state that the canceling ITP will pay the PIC change charge. The ITP must provide written notification to the Company that this activity has taken place.

4.3 End User/Pay Telephone Service Provider Charge Discrepancy ("Anti-Slamming Measure")

4.3.1 When a discrepancy is determined regarding an end user's designation of a preferred IntraLATA toll carrier, the following applies depending upon the situation described:

- A. A signed letter of authorization takes precedence over any order other than subsequent, direct Customer contact with the Company.
- B. When two or more order are received for an end user line generated by telemarketing, the date field on the mechanized record used to transmit PIC change information will be used as the PIC authorization date. The order with the latest application date determines Customer choice.

**4.3 End User/Pay Telephone Service Provider Charge Discrepancy (“Anti-Slamming Measure”) (Cont'd.)**

**4.3.2 Verification of Orders for Telemarketing**

No ITP shall submit to the Company a PIC change order generated by outbound telemarketing unless, and until, the order has first been confirmed in accordance with the following procedures:

- A. The ITP has obtained the Customer’s written authorization to submit the order that explains what occurs when a PIC is changed and confirms:
  - 1. The Customers billing name and address and each telephone number to be covered by the PIC change order;
  - 2. The decision to change the PIC to the ITP; and,
  - 3. The Customer’s understanding of the PIC change fee; or,
- B. The ITP has obtained the Customer’s electronic authorization, placed from the telephone number(s) on which the PIC is to be changed, to submit the order that confirms the information described above to confirm the authorization; or,
- C. An appropriately qualified and independent third party operating in a location physically separate from the outbound telemarketing representative has obtained the Customer’s oral authorization to submit the PIC change order that confirms and includes appropriate verification data (e.g., the Customer’s date of birth or Social Security number).
- D. The Company will follow the Federal Communications Commission’s and the Maryland Public Service Commission’s (if issued) regulations regarding slamming. The Company will not impose a penalty or charge for unauthorized IntraLATA toll provider changes.

**SECTION 6 - BUSINESS NETWORK ACCESS SERVICE**

The rates provided in this section apply to Customers that are currently in a Service Term agreement with the Company. All Customers being provided Month-to-Month services through an expired service term or who have never had a contractual relationship with the Company will find the rates for their specific non-term services in Section 17 - Non-Term Rates.

6.1 General

The Company provides Network Access Service over its Integrated Communications Network (ICN). Network Access Service is only available to those Customers who also subscribe to the Company’s resold local service offerings. Services available through the Company’s Network Access Service include inbound and outbound voice grade MTS Service, frame relay service and internet service.

6.1.1 Customer Requirements

Customer’s desiring to subscribe to the Company’s Network Access Service must have a combined usage and bandwidth requirement equal to or greater than a 10 DSOs.

Multiple location Customer must meet the following per location minimum combined usage and bandwidth requirements.

- A. Host locations must satisfy a 10 DSO minimum requirements. A combined average of 6 DSO’s per location is required at all other Customer locations.
- B. Minimum DSO and usage requirements for Customers subscribing to the Company’s Network Access Service for purposes of accessing only one of Company’s ICN services is as follows.

| Application | Minimum Requirement |
|-------------|---------------------|
| Internet    | 20 DSOs             |
| Frame Relay | 20 DSOs             |
| MTS         | 100,000 minutes     |

**SECTION 6 - BUSINESS NETWORK ACCESS SERVICE (CONT'D.)**

6.2 Network Architecture

The ICN architecture is composed of three distinct layers: Integrated Access, the ATM edge switch and the ATM core switch. The following diagram delineates the function of each layer.

6.2.1 Integrated Access Device.

The Integrated Access Device, which is installed on the Customer's premises serves as an endpoint to the Company's network and provides the Customer with voice, video, frame relay and internet connectivity into the ICN. It performs interworking functions such that all traffic egressing from the Customer location is in the form of ATM cells. The Integrated Access Device converts traffic to the appropriate ATM class of service for each type of traffic and statistically multiplexes this traffic over the T-1 facilities. Two classes of service are provided on the uplink: Constant Bit Rate (CBR) and Unspecified Bit Rate (UBR). No traffic shaping abilities are available with this device.

Each Integrated Access Device supports one T-1 port connection, one Ethernet port connection, one RS232 console port, and two V.35 ports for Frame Relay connectivity.

**SECTION 6 - BUSINESS NETWORK ACCESS SERVICE (CONT'D.)**

6.2 Network Architecture (Cont'd.)

6.2.1 Integrated Access Device (Cont'd.)

The Integrated Access Device shall, at all times, remain the property of the Company. Upon termination of the Service, Customer will provide the Company reasonable access to the Customer's premises for purposes of removing the Device. In the event, Customer fails to provide Company with said access or should the Equipment be returned to the Company in a condition worse than that which could be reasonably expected from the normal use and wear of the Device, then in such event, Customer will be liable to Company for the then current replacement cost of the Device.

The Device supports either analog or digital voice module connectivity but not the two concurrently. The two modules supported are:

- Twelve port analog FXS voice module
- Two port T1 voice module

6.2.2 The ATM Edge Switch accepts several Customer access lines in the form of T-1 or T-3 local loops and all associated PVCs running over these access lines. Soft PVCs are established and maintained from the ingress ATM edge switch, through the core of the network to the egress ATM edge switch. The use of Soft PVCs allows for automatic rerouting through the network in cases where a backbone trunk is suddenly disabled.

6.2.3 The ATM Core Switch acts as a cell forwarding device. No traffic shaping or policing functions are performed by these switches.

**SECTION 6 - BUSINESS NETWORK ACCESS SERVICE (CONT'D.)**

6.3 Classes of Service

The ICN currently supports two classes of service:

- Constant Bit Rate (CBR); and
- Variable Bit Rate, non-real time (VBR-nrt)

Each Class of service will be supported on a per connection basis. Features, applications and Customer defined parameters associated with the different classes of service are identified in the table below:

| Class of Service | Customer Parameters | Traffic Features   | Typical Applications  |
|------------------|---------------------|--|---|
| CBR              | PCR                 | Real time traffic requiring low cell loss, low delay, and low delay variation. The entire PCR value is allocated to the circuit from end-to-end. | Circuit emulation, voice and video traffic or data requiring a bounded delay, often using AALI circuit emulation. |
| VBR-nrt          | PCR, SCR, MBS       | Non-real-time bursty traffic requiring guaranteed minimum throughput and low cell loss. Able to tolerate variable delay.                         | Bursty data sources, e.g. transaction processing, LAN interconnect, Internet and intranet.                        |

SCR or Sustained Cell Rate is the maximum average rate at which the user can send data across the PVC.

PCR or Peak Cell Rate is the maximum rate at which the network agrees to admit cells.

MBS or Maximum Burst Size is the maximum number of cells that can be transmitted continuously at the peak rate.

MCR or Minimum Cell Rate specifies the minimum guaranteed through put of an Available Bit Rate (ABR) connection.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 6 - BUSINESS NETWORK ACCESS SERVICE (CONT'D.)**

**6.4 Voice and Data Connectivity**

Voice and data connectivity services are provided via a dedicated T-1 or T-3 PowerPath<sup>SM</sup> transmission facilities from the Customer's premises and the Company's point of presence (POP).

T-1 & T-3 PowerPath<sup>SM</sup> facilities are leased from a local access provider and provisioned by the Company into the Customer's location.

Voice and data traffic is transported over a PowerPath<sup>SM</sup> in fixed length 53 byte ATM cells, each cell transporting 48 bytes of user data with 5 bytes of overhead. When the last part of a protocol data unit (PDU) fills only a portion of the fixed length ATM cell, additional overhead from padding placed in the data portion of the cells will be transported.

**6.5 Management of Traffic Contracts**

The Customer will be responsible for selecting a single contract for each service ordered which will then be translated into a set of predefined QoS parameters, which correspond to ATM Classes of Service.

Usage Parameter Control (UPC) contracts will be implemented within the Customer's Premise Equipment for all traffic to ensure the QoS guarantees are maintained for all users. The UPC function will monitor the offered load and enforce the agreed traffic descriptors. Cells exceeding the contract rate will be discarded.

**SECTION 6 - BUSINESS NETWORK ACCESS SERVICE (CONT'D.)****6.6 Application of Rates and Charges**

PowerPath<sup>SM</sup> Network Connection Charge Monthly Recurring Charges under Section 6.7.1(B)1 and 6.7.1(B)2 for T-1 PowerPath<sup>SM</sup> Network Connection Charge are no longer available for new installations as of February 9, 2005. Customer with an existing contract will continue to receive service at the rates and charges as set forth in their contract for the remainder of their contract. Upon expiration of their contract, the Customer must choose a then effective rate plan, as set forth in Sections 6.7.2, PowerPath<sup>SM</sup> Network Connection Charge II, following. Customers requesting new Business Network Exchange Access Service(s) will also be subject to the Rates and Charges in Section 6.7.2, following. Customers with an existing contract for T-3 PowerPath<sup>SM</sup> Network Connection will continue to receive service at the rates and charges as set forth in their contract for the remainder of their contract. Upon expiration of their contract, the Customer must choose a then effective rate plan

**6.6.1 Installations**

Customers subscribing to a PowerPath<sup>SM</sup> Network Connection as set forth in Section 6.7.2, PowerPath<sup>SM</sup> Network Connection Charge II, following may be eligible to pay the PowerPath<sup>SM</sup> Network Connection's installation charge in equal monthly installments. Customers who subscribe to a twelve(12) month Service Discount Plan, as set forth in Section 3.5, preceding, are eligible to pay the installation charges in twelve (12) equal monthly installments of \$200.00 or six (6) equal monthly installments of \$400.00. Customers who subscribe to a twenty-four (24) month Service Discount Plan, as set forth in Section 3.5, preceding, are eligible to pay the installation charges in six (6) equal monthly installments of \$200.00.

**SECTION 7 - VOICE CONNECTIVITY SERVICE**

7.1 General

At the request of the Customer the Company will provide Voice Connectivity Service over the Company's Integrated Communications Network (ICN). The PowerPath<sup>SM</sup> facility provides a digital path from the Customer premises to the Company network and to the Public Switched Telephone Network (PSTN). Voice Connectivity Service is provided on a measured basis only and no message unit or call allowance is provided.

Voice Connectivity Services are subject to the availability of facilities.

Customers who subscribe the Company's ICN will have the option of provisioning Voice Connectivity Service. Through the CTC Integrated Access Device (IAD) located at the Customer premises, Customers will be able to access CTC's ICN for Local, IntraLATA Toll, Long Distance and Toll Free calling.

The Company will provide the following voice connectivity services over its ICN:

- Local Voice Service
- IntraLATA Toll Service
- PBX Tie Lines
- Outgoing Long Distance Voice Service
- Toll Free Calling Services

# Customers subscribing to IntraLATA Toll, must also subscribe to Local Voice Service or Long Distance Service.

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services

7.2.1 Local Voice Service

The company will provide voice switching functionality in the form of soft switch solution in conjunction with SS7, business and trunking gateways to the Public Switched Telephone Network (PSTN) utilizing a Virtual Class 4/5 Switch. The Customer will have the ability to port existing numbers or utilize new numbers for local calling.

Local Voice Service will provide subscribers a variety of call types, channel functionality, and Service and Calling Features as set forth in 7.2.1 (A) through (C), following.

A. Call Types

CTC Local Voice Service will provide subscribers the ability to access a variety of call types over the PowerPath<sup>SM</sup>, as defined below.

1. Basic Off-Net Call

A Basic Off-net Call will allow a subscriber to place or receive calls to or from another Network Service Provider's packet network and the Public Switched Telephone Network (PSTN). This function provides standard call processing capability for off-network calls when dialing NXX-XXXX, NPA-NXX-XXXX, or 1+NPA-NXX-XXXX. Other dialing procedures, such as N11, 0/00, 01/011+, and 101XXXX+ are defined in other user features. Part of the basic off-net call feature may include the capability to play announcements and includes the ability to generate the appropriate measurement data. Measurement data includes Call Description Records ("CDRs") for accounting (billing) purposes and for performance and fault management purposes.

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

A. Call Types (Cont'd.)

2. Basic On-Net Call

A basic on-net call will allow a subscriber to place or receive a call to or from any other subscriber within the Company's packet based network served by the same Call Agent. This function provides standard call processing capability for on-network calls when dialing NXX-XXXX, NPA-NXX-XXXX, or 1+NPA-NXX-XXXX. Other dialing procedures, such as N11, 0/00, 01/011+, and 101XXXX+ are defined in other user features. Basic on-net service does not include interfacing with the PSTN (Public Switched Telephone Network). Part of the basic on-net call feature includes the capability to play announcements and the ability to generate the appropriate measurement data. Measurement data includes CDRs (Call Description Records) for accounting (billing) purposes and for performance and fault management purposes.

3. Operator Services Access

Operator Service Access recognizes 0-, 00- numbers when dialed. Certain digits may follow the 0- code (beginning with a numeric 2 or greater). These calls will be routed to the NSP's designated destination to provide required operator services. If additional digits are provided, they will be delivered as part of the SS7 ISUP or SGCP message.

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

A. Call Types (Cont'd.)

3. 911 Emergency Service (911)

“911” is recognized as a valid number by the Call Agent and the residential access gateway. These calls will be automatically routed through the PSTN to a designated emergency service bureau or Public Safety Answering Point (PSAP). Although the Call Agent will pass along the calling party number, calling name and address information (plus additional information such as nearest cross street etc.) this information is provided outside of the Call Agent architecture. This information is typically maintained in an Automatic Location Information database (ALI) which is typically maintained by the local exchange carrier. The following additional features will be supported for these calls if MF is used:

Called Party Control – Allows the connection to remain active even if the caller goes off-hook (hangs up). This allows the operator to easily reconnect the phone without re-dialing the caller's phone number

Called Party Forced Disconnect – Allows the 911 operator to force a disconnect on the calling party

Called Party Disconnected Signal – Notifies the 911 operator off-hook.

Ring Back – Allows a 911 operator to make the on-hook phone ring

---

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

A. Call Types (Cont'd.)

4. Collect Call Access

Collect Call Access enables the called party to pay for the call. Can be supported either via 1-800-NXX-XXXX (specific carriers handling collect calls), 0-, or 0+NPA+NXX+XXXX. These calls will be forwarded to a service bureau served by the PSTN. The service bureau will be responsible for validating the request, bridging the call to the destination, and obtaining sufficient call information to accurately rate and bill the call.

5. Calling Card Access

Calling Card Access enables a caller to make calls from any telephone in the network and have costs levied on the caller's personal account. Call Agent will forward all calling card requests to a service bureau served by the PSTN. The service bureau will be responsible for validating the account, bridging the call to the destination number, and obtaining sufficient call information to accurately rate and bill the call.

6. Customer Support Access

Customer Support Access recognizes 611 when dialed and routes these calls to the Company's designated destination that can provide the Customer with support. Automatic Number Identification ("ANI") will be sent to the destination, so the operator can see the calling number.

---

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

A. Call Types (Cont'd.)

7. International Dialing

01 + Country Code + National Number indicates the use of an operator assisted or calling card international call. The 011 + Country Code + National Number indicates a direct dialed international call. Both types of calls are recognized and will be routed accordingly to the NSP's designated destination to route these international calls.

8. Telecommunications Relay Service Access

Recognizes a designated TRS access number (usually 711 or some other number, usually toll-free) and routes these calls to a TRS service center somewhere in the PSTN.

9. Toll Free Access

Telephone numbers within the 800, 888, and 877 Easily Recognizable Code ("ERCs") are used to provide a service – freephone – in which the called party, rather than the calling party, is charged for the call. The Call Agent platform will route these calls to the network service provider's specified destinations (servers) for further processing. The network service provider will require third party servers that will further process the call and route it to its appropriate destination.

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

B. Channel Functionality

The CTC IAD will support both analog and digital interfaces, as set forth in Section 5.2.1, preceding. Depending on the type of interface, the Customer will be able to provision a variety of functionality for each of the voice channels on the PowerPath<sup>SM</sup>.

1. Digital Voice Interface Service

The following Services are available to Customers with a Digital PBX that supports E&M Wink Dual Tone Multi-Frequency (DTMF) signaling or E&M Intermediate DTMF signaling and have available DS 1 Ports in their PBX to connect to the IAD.

a. Outward Calling Only

A designated channel or group of channels on the PowerPath<sup>SM</sup> that will be used for outbound only calling.

Example: A Customer configures four channels for just outbound voice calls. If there were four concurrent outbound calls, the fifth caller would receive a fast busy tone from the PBX.

b. Inbound Calling Only

A designated channel or group of channels on the PowerPath<sup>SM</sup> that will be used to receive inbound calls only. Customers will typically set up a hunt group, either circular or linear, to search for an open channel. Example: A Customer configures four channels in a hunt group for just inbound voice calls, and each channel has a telephone number associated with it (either new CTC numbers or ported from the LEC). If any of those numbers were called and completed concurrently, the fifth caller would receive a busy signal from CTC.

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

B. Channel Functionality (Cont'd.)

1. Digital Voice Interface Service (Cont'd.)

c. Two Way Calling

A designated channel or group of channels on the PowerPath<sup>SM</sup> that will be used to make and receive all types of calls. Each channel represents a separate phone number that could be called from the PSTN.

Example: A Customer configures eight channels for two way calling. Inbound and Outbound calls will be handled on this type of channel. If all eight channels are being used, the ninth call, whether outbound or inbound, will not be completed.

d. Lead Number Service

A designated group of channels on the PowerPath<sup>SM</sup> that will be used to receive inbound calls only. Customers will have a main lead number (either newly assigned by CTC or a number ported from the LEC). This number will hunt through the entire group set up behind it with no phone numbers assigned to these channels.

Example: A Customer has Lead Number Service as defined above. The end user can only dial the lead number to access the Customer.

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

B. Channel Functionality (Cont'd.)

1. Digital Voice Interface Service (Cont'd.)

e. Direct Inward Dialing (DID)

A designated group of channels on the PowerPath<sup>SM</sup> that will be used to only receive inbound DID calls. The PBX will receive the calls and direct them to the specific station. The PBX will additionally need to handle 3 or 4 digit outpulsing to accommodate the service.

Example: Customers will have a block of 40 DID numbers CTC or ported from another LEC. This block of numbers is assigned to a group of channels using the ratio of 8:1 numbers/stations to channels, in this case 5 channels. If a 6th concurrent DID call is attempting to be completed, the end user will receive a busy.

f. Multi-functional With DID

A designated group of channels on the PowerPath<sup>SM</sup> that will be used for outbound calling or inbound DID calls. Similar to Two Way Calling, it is a first come, first served basis as to the type of calls that can be received.

Example: Customers will assign a block of 40 DID numbers, newly assigned by CTC or, most likely, ported from the LEC, to a group of 10 channels. In any combination, DID or outbound, the 11th call or caller won't be able to be completed.

---

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

C. Service and Calling Features (Cont'd.)

5. Carrier Selection

The Call Agent will allow the Customers to choose their intraLATA toll and long distance carrier on a per-call basis and access the carrier's network with minimal inconvenience. The following access code formats will be supported: "101XXXX NXX-XXXX", "101XXXX 1+7/10D (NXX-XXXX / NPA-NXX-XXXX)", "101XXXX 0+7/10D", "101XXXX 011+7-18D", "101XXXX 01+7-18D", "101XXXX 0-", "101XXXX 00-". The Call Agent will use the carrier information in the access calls to identify the selected carrier and route the call accordingly.

6. Circular Hunting

Circular hunting is a group feature that provides a mechanism for distributing incoming calls directed at a particular Directory Number (DN) to a group of Customer voice channels. Circular hunting specifies a Pilot DN anywhere in the range of voice channels to attempt call completion sequentially or in series and continuing in a circular fashion from the start until an open voice channel is available for call completion.

7. Touch Tone Service

Voice Connectivity service will be provided with Touch Tone Service and will enable the Customer to utilize push button dialing using Dual Tone Multi-Frequency tones

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

C. Service and Calling Features (Cont'd.)

8. Local Number Portability (LNP)

Local Number Portability enables a Customer to change Local Service Providers (“LSPs”) or move within the same rate center and retain the same 10-digit Directory Number (“DN”). The Call Agent will determine whether the dialed number is ported, perform the necessary database queries, and pass on the information (as required) to complete LNP calls.

9. Network Announcements

Provides requests to the Announcement Server to “play” stored announcements over the packet network to a designated IP address.

10. Call Blocking - Selective (Outgoing Call Restriction)

Enables subscribers to block calls to 800, 411, 900, 976 numbers. The Call Agent recognizes 800, 411, 900, 976 numbers and performs a lookup in the Customer database to determine if these numbers are blocked from this particular number. If these numbers are blocked, the Call Agent will initiate an appropriate announcement to the caller informing them of the block on these numbers.

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

C. Service and Calling Features (Cont'd.)

11. Call Forwarding

Allows incoming calls to be forwarded to another telephone number. The service is activated and de-activated by a service code (\*72 + destination number to activate and \*73 to de-activate in the US). The Call Agent enables users to forward their calls to another number within the same area code (either on the NSP's packet network or PSTN).

12. Call Forwarding – Busy Line/Don't Answer

A variation of the Call Forwarding feature. This enables Customers to forward their calls to a specific phone number when the line is busy or there is no answer after a pre-selected number of rings.

13. PBX Local Services (CAS – SGCP)

Provides the network interface support for Private Branch Exchanges (“PBX”) which use Channel Associated Signaling (“CAS”).

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

C. Features (Cont'd.)

14. DNIS

DNIS Out-pulsing on CAS/PBX Line provides a means to specify a standard (4) or Custom (4-18) number of digits, taken from the DNIS (Dialed Number Identification Service) to be transmitted on call termination to a CAS/PBX line

15. Account Codes

This feature permits the carrier to collect an account code from the subscriber for inclusion on the CDR. The collected account code may or may not be validated against a provisioned set of valid codes.

16. Digital Manipulation

Allows the Customer to put a pre-existing, advertised number that conflicts with the rest of their number range onto their Class 5 DID service. This feature will replace the number in conflict with a predetermined number that matches the rest of the Customer's number range.

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

C. Service and Calling Features

The following Service and Calling Features are available at no charge to the Customer.

1. Billing Record Creation

Logs information concerning each call that goes through the network service provider's packet network and retains all necessary information for distribution in a standard format to the provider's billing system.

2. Call Waiting

When an incoming call arrives at the network, the Call Agent must verify if the subscriber line has the call waiting feature. If the line has this feature, the Call Agent instructs the residential gateway device to apply the call waiting tone to the busied line. The called party may either hang up on the active call and accept the new incoming call, place the active call on hold and answer the new call, or do nothing.

3. Customized Number Service (Vanity Number)

Customer requested DN's in the form of NPA-NXX-ZZZZ where the Customer specifies the numeric values for the numbers represented by Z.

4. Carrier Pre-Selection

This allows the end-user to be able to choose their long distance carrier and access the carrier's network with minimal inconvenience. The Call Agent provides the capability on a per-line basis to indicate the preferred inter-exchange carrier for toll calls.

F. Directory Listings

The Company will provide one directory listing free of charge. Any additional listings will be subject to the rates and charges set forth in Section 7.4, following.

If the Customers telephone numbers are ported from another local exchange carrier, at the Customer's option, the Customer will be able to retain the existing directory listings at the rates and charges set forth in Section 6.4, following. Provided that the initial listing was free with the previous local exchange carrier, the first listing will be provided at no charge to the Customer. If the initial listing was not free, the Customer will be subject to the additional listing charge as set forth in Section 7.4, following.

G. Transfer of Service

At the sole discretion of the Company, written permission only may be granted to assign the obligation to pay contractual or price guide charges to another Customer at the same location for a transfer of service charge, payable by the new Customer. In addition to assuming the responsibility to pay contractual charges, the new Customer assumes the conditions applicable to the service at the time of the transfer.

1. A transfer of service without written permission from the Company is not allowed.

H. DID Numbers

DID Number blocks are provided in consecutive blocks of twenty (20), fifty red (100) telephone numbers. Rates and Charges for DID number blocks are set forth in Section 7.4, following.

DID Number blocks are provided in consecutive blocks of twenty (20) and one hundred (100) telephone numbers. The first of block of twenty (20) DID telephone numbers will be provided at no charge to the Customer. Rates and Charges for Additional DID number blocks are set forth in Section 7.4, following.

If the Customers DID Number Blocks are ported from another local exchange carrier, at the Customer's option, the Customer will be able to retain the existing Number block(s). If additional numbers are required by the Customer, the Company will work cooperatively with the Customer and the previous local exchange carrier to obtain additional blocks from the previous local exchange company. In the event additional blocks cannot be obtained, the company will provide additional DID blocks at the rates set forth in Section 7.4, following and the initial block of twenty (20) consecutive numbers free of charge does not apply.

Directory Listings for DID Numbers will provided as set forth in Section 7.3., preceding.

I. Credit Allowance for Interruptions

There is no credit allowance allowed for usage. Credit Allowance Local Line charges are permitted, subject to the regulations set forth in Section 3.6, preceding.

J. Suspension of Service - Suspension of Service is not allowed.

K. Directory Assistance

The Company furnishes directory assistance service to aid Customers in determining telephone numbers. Calls to directory assistance are considered complete whether or not the number(s) requested has been provided. No more than two (2) telephone numbers may be requested per call to directory assistance service. An allowance of ten (10) Directory Assistance calls will be provided, per line, per billing period, free of charge. InterLATA Directory Assistance is provided on a direct dialed basis. Charges will not be levied for Directory Assistance on an individual who suffers a physical or visual disability that precludes the use of a telephone directory.

L. Foreign Number Service

1. Foreign Number Service is available where facilities exist to Customers who subscribe to CTC's local exchange service and desire to retain their existing phone numbers for inward service, where such numbers are associated with either a rate center or Central Office other than that in which the Customer resides or is served.

In the case where the numbers are not in the same rate center, CTC assigned phone numbers associated with the rate center in which the Customer is physically located will serve as the BTN/STN for all outbound calling routed through the rate center where the Customer is physically located. At the Customer's request, CTC will establish an additional hunt group that will route calls through the foreign rate center. Such a request may require additional programming to Customer provided equipment (CPE) at the expense of the Customer.

2. Rates and Charges

Rates and Charges for Foreign Number Service are set forth in Section 7.4, following.

M. Referral Services

1. General

Referral Service is available where facilities exist to Customers who subscribe to CTC's local exchange service. Presently, CTC will offers two types of Referral Service, Generic and Basic Referral Service.

a. Generic Referral

A Generic Referral is a recorded announcement that provides the caller the status of a disconnected or changed number. Generic Referrals do not provide the new number

b. Basic Referral

A Basic Referral is a recorded announcement that provides the caller the status of a disconnected or changed number and provides to the caller the new telephone number.

2. Minimum Period

a. Generic Referral is subject to a one (1) month minimum period.

b. Basic Referral is subject to a six (6) month minimum period.

3. Availability

Customers receiving CTC Digital or Analog Class V Voice Services (Local Voice Services) may subscribe to Referral Service at the rates and charges set forth in the Section 6.4 of the Rate Section, following.

7.2 Description of Services (Cont'd.)

7.2.1 Local Voice Service (Cont'd.)

N. Remote Call Forwarding (RCF)

1. General

Remote Call Forwarding (RCF) provides for all incoming calls placed to a ten - digit number to be call forwarded to a terminating Intra or InterLATA telephone number. RCF callers are directly connected to an on-net or off-net telephone number. The number is designated by the Customer. This service is available only to the extent facilities are available.

This service is furnished upon condition that the Customer Subscribed to adequate RCF or terminating facilities to permit the use of the service without impairment, disruption or deterioration of the quality of other telephone services. The Customer may add Additional Talk paths. The maximum number of talk paths is fifteen (15).

If in the opinion of the Company additional RCF service or terminating facilities are needed, the Customer will be requested to subscribe to additional service or facilities. If the Customer refuses to subscribe to adequate RCF or terminating facilities, the RCF service is subject to termination.

The Company does not provide identification of the originating telephone number to the RCF Customer.

No assurance can be given that transmission will be fully satisfactory during operation of RCF. In the event of poor transmission, the liability of the Company will not exceed the amount of the applicable charge, if any for the call.

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services (Cont'd.)

7.2.2 IntraLATA Toll Service

Customers who subscribe to the Company's Local Voice Service and / or Outgoing Long Distance Voice Access Service will have the option of pre-subscribing to intraLATA Toll Service provided on the ICN. IntraLATA Toll Service will only be provided as a bundled service with either Local Voice Service as set forth in Section 7.2.1, preceding or Outgoing Long Distance Voice Access Service as set forth in Section 7.2.4, following.

Usage Charges for IntraLATA Toll Service are set forth in Section 7.4 of this Price Guide And are in addition to those rates and charges for access to the ICN.

7.2.3 Outgoing Long Distance Voice Access Service \*

The ICN provides a gateway to the Public Switched Network (PSN) through dedicated channels of a Customer's PowerPath<sup>SM</sup> facility. Virtual connections are established between the Integrated Access Device located at the Customer premise and the PSTN Gateway. An Integrated Access Device located at the Gateway, receives voice over ATM cells from the ICN and converts them to traditional voice frames which are then passed to the Company's long distance switch.

Usage Charges for Outgoing Long Distance Service are set forth in Section 7.4 of this Price Guide and are in addition to those rates and charges for access to the ICN.

---

**SECTION 7 - VOICE CONNECTIVITY SERVICE (CONT'D.)**

7.2 Description of Services (Cont'd.)

7.2.4 1-800 Service \*

Incoming 1-800 Service can be configured from the Integrated Access Device at the Customer's premise directly to the Company's gateway to the PSTN. Signaling for incoming 1-800 is loop-start FXS/FXO for analog applications and E&M for digital applications.

Usage charges for 1-800 Service are set forth in Section 7.3 of this price guide and apply in addition to those rates and charges for access to the ICN.

7.2.5 PBX Tie Line Service \*

PBX Tie Line Service provides a direct connection between a pair of remote PBXs. PBX Tie Line Service is facilitated by mapping ATM virtual connections between the Customer's Adaptation Devices at the respective locations and configuring such devices to match the signaling used by the Customer's PBX equipment. Interconnected PBXs must use the same type of signaling.

Rates and Charges for PBX Tie Line Service are set forth in Section 7.3 of this price guide and apply in addition to those rates and charges for access to the ICN.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 8 - FRAME RELAY SERVICE**

The rates provided in this section apply to Customers that are currently in a Service Term agreement with the Company. All Customers being provided Month-to-Month services through an expired service term or who have never had a contractual relationship with the Company will find the rates for their specific non-term services in Section 17 - Non-Term Rates.

**8.1 Description of Services****8.1.1 General**

Frame Relay Service (FRS), which is provided subject to suitable facilities, is a virtual private data network service which allows Customers to simulate a dedicated high speed data network. FRS allows a Customer to define logical channels and establish Permanent Virtual Circuits (PVCs) among multiple locations using statistically multiplexed network access lines and a shared high speed Company packet switching network. PVCs provide the Customer with the electronic equivalent of a private line between two points.

A Customer establishes with the Company a fixed private numbering plan (i.e., Network Address) and routing scheme (i.e., network map), for moving data among Customer's various locations on a secure basis. While none of the physical circuits are dedicated, these locations are electronically connected to function similar to private line service.

FRS allows Customers to interconnect geographically dispersed Local Area Networks (LANs) and can support file transfer applications. FRS supports intermitted, bursty data traffic via 56 kbps and 1.544 mbps transport facilities. Access to the Company's FRS network is provided via a PowerPath<sup>SM</sup> facility from the Customer's location to the nearest Point of Presence.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 8 - FRAME RELAY SERVICE (CONT'D.)**

8.2 Service Components

8.2.1 Capacities and Interfaces. Two serial ports are available for data connectivity. A total of 68 ATM connections can terminate into an Integrated Access Device located on a Customer's premise.

FRS provided over a Company PowerPath<sup>SM</sup> facility is available at the following access speeds

- 56/64 Kbps
- 128 Kbps
- 192 Kbps
- 256 Kbps
- 320 Kbps
- 384 Kbps
- 448 Kbps
- 512 Kbps
- 576 Kbps
- 640 Kbps
- 704 Kbps
- 768 Kbps

8.2.2 FRS Connection across the ICN. Frame Relay Service is available to ICN Customers via PowerPath<sup>SM</sup> transmission facility. The Integrated Access Device on the Customer premises provides V.35 connectivity to the Customer's router or FRAD and allows virtual circuits to be established to other sites within the ICN, creating a two-layer virtual private network for the Customer's intranet requirements.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 8 - FRAME RELAY SERVICE (CONT'D.)**

8.2 Service Components (Cont'd.)

8.2.3 Off-Net Frame Relay Connectivity

Off-Net Frame Relay Connectivity is provided to those Customers whose traffic must enter the ICN through another service provider. Traffic is passed to the ICN through a series of network-to-network interfaces established by the Company with other FRS providers.

Traffic which must enter or exit the ICN from another Frame Relay Service Provider will be routed through a number of Network-to-Network Interfaces (NNIs) established at various points between the ICN and other Provider networks.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 8 - FRAME RELAY SERVICE (CONT'D.)**

8.3 Interruption of Service

8.3.1 A port connection and its associated logical channel will be considered out of service when it does not provide functional permanent virtual circuits, as specified and subscribed to, to all other associated FRS port connections which are not otherwise out of service.

8.3.2 When service is interrupted for 30 minutes or more a credit allowance will be made for the portion of the service which is affected, provided that the interruption is brought to the attention of the Company within ten days. For the purpose of determining the amount of allowance, every month is considered to have 30 days.

Interruptions are credited to the Customer at the proportionate monthly contract charge in half hour multiples for each half hour or major fraction thereof of interruption.

8.3.3 No credit allowance will be made for the following interruptions:

- Service interruptions of less than 30 minutes.
- Service interruptions caused by the negligence of the Customer or authorized user.
- Service interruptions resulting from the failure of equipment provided by the Customer or authorized user.
- Service interruptions which continue due to the failure of the Customer to authorize replacement of any element of special construction. The period during which no credit allowance will be made begins on the seventh day after the Customer receives the Company's notification of the need for replacement and ends on the day after the Company receives the Customer's authorization for replacement.

**SECTION 8 - FRAME RELAY SERVICE (CONT'D.)**

8.4 Application of Rates and Charges

Service charges apply in addition to the rates and charges for FRS.

Charges for PowerPath<sup>SM</sup> facilities apply in addition to those rates and charges for FRS.

Off-Net NNI connection charges apply to those Customers connecting to the ICN via external service providers.

On-Net NNI connection charges apply to those Customers connecting directly to the ICN.

**SECTION 9 - PROMOTIONS OFFERINGS AND TRIAL SERVICES**

9.1 Promotional Offerings

The Company may offer existing services on a promotional basis, subject to Commission approval, that provides special rates, terms or conditions of service. Promotional offerings are limited to a maximum of six months at which time the promotional offering must be either withdrawn or made available on a permanent basis. All promotions, regardless of whether services are provided at no charge, are subject to Commission approval.

9.2 Trial Services

The Company may offer new services, not otherwise found in this price guide, from time to time on a trial basis subject to Commission approval. Such trials are limited to a maximum of six months at which time the trial offering must be either withdrawn or made available on a permanent basis.

**SECTION 10 - ISDN PRIMARY RATE SERVICE**

The rates provided in this section apply to Customers that are currently in a Service Term agreement with the Company. All Customers being provided Month-to-Month services through an expired service term or who have never had a contractual relationship with the Company will find the rates for their specific non-term services in Section 17 - Non-Term Rates.

10.1 General

ISDN primary provides access to the Company's voice and circuit switched data transport services via a 1.544 Mbps digital path as set forth in Section 5, preceding, between ISDN compatible Customer premises equipment and a CTC Point of Presence. ISDN primary includes Direct Inward Dialing (DID) which permits incoming dialed calls from the network to reach a specific station line of a Private Branch Exchange (PBX) or other Customer premises equipment without the assistance of an attendant.

ISDN primary is offered on a measured local service basis and on an unlimited local service basis where unlimited local service is available, as set forth in Section 6, preceding. No local usage allowance is provided.

10.2 Service Components

10.2.1 Primary Port

An ISDN primary port provides the termination of the local distribution channel as set forth in Section 9.2.2, following in the central office switch. Each port consists of a D channel for signaling and up to 23 B channels for transmission of voice and circuit switched data calls.

10.2.2 Local Distribution Channel

The Local Distribution Channel is a 1.544 Mbps two-way transmission path connecting a Customer's premises with the port. The framing format for 1.544 Mbps transmission over the ISDN primary service local distribution channel is extended superframe as specified in TR-NWT-000499.

10.2.3 DID Capability

Furnished upon the condition that the Customer must subscribe to and have adequate facilities to permit the use of service without injurious effect on general telephone service, ISDN primary DID numbers will be provided in blocks of 20, 50 or 100 consecutive numbers. These minimums apply whether or not the Customer utilizes all the ISDN primary DID telephone numbers in the group.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 10 - ISDN PRIMARY RATE SERVICE (CONT'D.)**

10.3 Primary Service Capabilities

The following capabilities are supported on the B channels: Voice and circuit switched data capabilities can be combined over the ISDN primary port and local distribution channel.

10.3.1 Standard Features

Circuit Switched Voice provides digitized speech or voice-band data access in conjunction with existing services including local exchange service, Message Telecommunications Service (MTS), and 800 service.

Incoming Calling Line Identification provides the calling number of an incoming call if both the ISDN primary Customer and the originator of the call are served from the same central office switch or served from different central office switches which are connected by facilities that can send the calling party's number between the switches.

Channel Configuration allows some or all B channels to be dedicated to exchange and MTS, DID, or 800 service. Multiple dedicated trunk groups can be established on the same port or group of ports. The Customer must specify at the time of ordering, the number of dedicated B channels and their specific purpose.

10.4 Responsibility of the Company

10.4.1 Suspension of Service - ISDN primary is not subject of temporary suspension of service.

10.4.2 Provisions for Other Services - One directory listing without charge is furnished for each ISDN primary DID number range. Additional directory listings will be provided at the rates and charges as set forth in Section 6, preceding.

FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE

---

**SECTION 10 - ISDN PRIMARY RATE SERVICE (CONT'D.)**

10.5 Responsibility of the Customer

10.5.1 The Customer must specify, at the time of ordering, the number of call-by-call service selection B channels and the number of dedicated channels (if any) to be activated. Service Order Charges as set forth in Section 3, preceding, apply for changes in the number or type of activated channels, made subsequent to the time of ordering.

10.5.2 Customer provided equipment used to connect to ISDN primary service must comply with AT&T PUBs 41449, 41459, 5D5-900-312 and 5D5-900-322.

10.5.3 A Customer provided channel service unit or equivalent functionality is required at each termination of an ISDN primary service PowerPath<sup>SM</sup>, as set forth in Section 5, preceding, on the Customer's premises. The channel service unit must be compatible with the extended superframe framing format and the bipolar with 8 zero substitution line code.

10.5.4 Customer provided switching systems must be arranged to provide for the interception of assigned by unused station numbers, including vacant station number groups as required.

10.6 Regulations

10.6.1 Minimum Service Period

Minimum Service Period for the ISDN primary port and local distribution channel is one month. The minimum service period for ISDN primary DID numbers is one month. When a Customer ISDN Primary Service is served from a Foreign Exchange or Foreign Central Office requests be provided from their normal serving central office when facilities permit, a new minimum service period becomes effective when service is established at the normal central office.

10.6.2 Provisions for Other Service -

A Customer calling an ISDN primary telephone number can control the disclosure of his directory number by utilizing the blocking option specified for CLASS features, as set forth in Section 7.2.1.(C), preceding.

---

**SECTION 10 - ISDN PRIMARY RATE SERVICE (CONT'D.)**

10.7 Application of Rates and Charges

10.7.1 All local messages are provided at local usage charges for measured business service.

10.7.2 PBX trunk and other network access line rates and charges, as contained in other sections of this price guide, are applicable to ISDN primary.

10.7.3 Voice usage generated by using ISDN primary will be charged in accordance with the usage rates for the associated service(s).

Unlimited local usage, per call-by-call B channel or dedicated exchange/MTS B channel is charged for as specified for business trunks in the exchange of connection.

10.7.4 Initial and additional PowerPath<sup>SM</sup> connections are provided at the monthly rates for the PowerPath<sup>SM</sup> in the Customers installation locations. The nonrecurring charge for the initial is the same for a PowerPath<sup>SM</sup>.

10.7.5 ISDN primary DID telephone numbers are provided at the rates and charges specified for DID service, as set forth in Section 7.4.1(D)., preceding.

**SECTION 10 - ISDN PRIMARY RATE SERVICE (CONT'D.)**

10.8 Service Discount Plan

10.8.1 Monthly Access rates for the ISDN Primary PowerPath<sup>SM</sup> are offered under the same Service Discount Plan (SDP) described in Section 2.13.4, preceding. The SDP monthly rates charges are payable over the following Optional Payment Periods (OPP) as selected by the Customer.

- Only the PowerPath<sup>SM</sup> and service channels are eligible for the OPPs of 12, 24 36 months.
- An OPP may not be established only for nonrecurring charges

10.8.2 Termination Liability

If a Customer terminates service or cancels an SDP in whole or in part before the expiration of a commitment period the Customer is subject to a termination liability charge defined in Section 3.5.4, preceding.

**SECTION 11 - ACCESS SERVICE ORDER**

11.1. General

An Access Service Order is used by the Company to process a request for Business Network Exchange Access Service, as set forth in Section 5, preceding. A Customer may order any number of Business Network Exchange Access Service T-1 or T-3 Access Lines of the same type and between the same premises on a single Access Order. All details for services for a particular order must be identical except for those for multipoint service.

When placing an order for Business Network Access Service, the Customer shall provide to the Company the following information.

- Customer name and premises address(es).
- Billing name and address (when different from Customer name and address).
- Customer contact name(s) and telephone number(s) for the following provisioning activities: order negotiation, order confirmation, interactive design, installation and billing.

11.1.1 Critical Dates

Certain Company critical dates are associated with a Business Network Exchange Access Order on the date the order is entered into the Company's order processing systems. These dates are used by the Company and the Company's underlying carriers to monitor the progress of the provisioning process. At any point in the Business Network Exchange Access Service order interval, the Company is able to determine which critical date was the date passed and therefore can determine what percentage or portion of the Company's provisioning costs have been incurred as of that critical date.

- Application Date (APP) - the date the Customer provides a firm commitment and sufficient information as set forth in Section 11.1. preceding and 11.3, following.
- Schedule Issue Date (SID) - The date the order has been entered in the Company's order processing systems.
- Design Layout Report Date (DLRD) - The Date the Design Layout Report (DLR) is to be forwarded to the Customer.

**SECTION 11 - ACCESS SERVICE ORDER (CONT'D.)**

11.1. General (Cont'd.)

11.1.1 Critical Dates (Cont'd.)

- D. Confirming Design Layout Report Date (CDLRD) - The date the DLR is to be confirmed by the Customer.
- E. Records Issue Date (RID) - The date that all design and assignment information is to be sent to the central office and installation forces
- F. Wired and Office Tested Date (WOTD) - The date by which all intra-office wiring is to be completed, all plug-ins optioned, aligned and frame continuity established and the inter-office facilities, if applicable tested.
- G. Confirmed Due Date (CDD) - The actual date in the service order for which work activity is scheduled to be completed by the Company and for which the service will be ready for use by the Customer. The due date is the standard interval or the negotiated interval date (as specified in Section 9.2, following). The confirmed due date is provided by the Company to the Customer once the availability of the Company has been authorized.
- H. Plant Test Date (PTD) - The date on which overall testing of the service is to be started.
- I. Service Date (SD) - The Date on which service is to be made available to the Customer. This is sometimes referred to as the Due Date.

The time period from the APP to the DLRD added to the time period for the CDLRD the DD is known as the Business Network Exchange Access Service order standard interval as set forth in Section 11.2.1, following.

The Time period between the DLRD and the CDLRD is controlled by the Customer. But it is agreed upon by the Customer and the Company prior to the APP. The period is limited to a maximum of ten (11) days.

**SECTION 11 - ACCESS SERVICE ORDER (CONT'D.)**

11.2 Access Order Service Date Intervals

Business Network Exchange Access Service is provided with one of the following Service Date Intervals:

- Standard Interval
- Negotiated Interval

To the extent Business Network Exchange Access Service can be made available with reasonable effort, the Company will provide Business Network Exchange Access Service in accordance with the Customer's requested interval, subject to the following conditions.

11.2.1 Standard Interval

The Company shall make available the Standard Interval available to all Customers at the time orders are placed or the Application Date. The Application Date is the date when the Company receives complete and accurate information the Customer to allow the processing of a Business Network Exchange Access Service order. The Standard Interval is based on the Company's Underlying Carriers schedule of Standard Intervals applicable for Business Network Exchange Access Service. The underlying carrier's schedule dates are based on the type of service and quantities of Business Network Exchange Access Service lines / facilities that can be completed as specified in the underlying carrier's Service Date Interval Guides as set forth in VZ MDTE No. 15, Section 3.

Business Network Exchange Access Service in a Standard Interval will be installed during normal business hours. If a Customer requests that installation be done outside of normal scheduled work hours, and the Company agrees to this request, the Customer may be subject to applicable Additional Labor Charges.

A Service Date Change Charge as set forth in Section 11.5, following, will apply for the change in service date on a pending Standard Interval Access Order.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 11 - ACCESS SERVICE ORDER (CONT'D.)**

11.2. Access Order Service Date Intervals (Cont'd.)

11.2.2 Negotiated Interval

The Company will negotiate a service date interval with the Customer when:

- A. There is no Standard Interval for the service, or;
- B. The quantity of Business Network Exchange Access Services orders exceeds the quantities specified in the Standard Interval as specified in the Company's underlying carriers Access Service Date Interval Guides, as set forth in VZ MDTE No. 15, Section 3.
- C. The Customer requests a service date beyond the applicable Standard Interval service date except as set forth in Section 11.2.1, preceding.

The Company will offer a service date based on the type and quantity of Access Services the Customer has requested. The Negotiated Service Date Interval may not exceed by more than six (6) months the Standard Interval service date, or, when there is no Standard Service Date Interval, the Company offered service date. All services for which rates are applied on an individual case basis are provided with a Negotiated Service Date Interval.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 11 - ACCESS SERVICE ORDER (CONT'D.)**

11.3. Access Order Modifications

The Customer may request a modification of its Business Network Exchange Access Order at any time prior to notification by the Company that service is available for the Customer's use or prior to the service date, as defined in Section 11.1.1, preceding, whichever is later.

Any increase in the number of Business Network Exchange Access Service Lines will be treated as a new Access Order (for the increased amount only).

11.3.1 Service Date Change Charge

Business Network Exchange Access Order service dates for the installation of new services or rearrangements of existing services may be changed, but the new service date may not exceed the original service date by more than thirty (30) calendar days. When, for any reason, the Customer indicates that service cannot be accepted for a period not to exceed thirty (30) calendar days, and the Company accordingly delays the start of service, a Service Date Change Charge will apply. If the Customer requested service date is more than thirty (30) calendar days after the original service date, the order will be canceled by the Company and reissued with the appropriate cancellation charges applied, as set forth in Section 11.4, following.

A Service Date Change Charge will apply, on a per order per occurrence basis, for each service date changed. The applicable charge is as set forth in Section 11.5, following.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 11 - ACCESS SERVICE ORDER (CONT'D.)**

11.3. Access Order Modifications (Cont'd.)

11.3.2 Partial Cancellation Charge,

Any decrease in the number of ordered Business Network Exchange Access Service Lines / Facilities ordered with a Standard or Negotiated Interval Access Order will be treated as a partial cancellation and the charges as set forth in Section 11.4.2(A), following will apply.

11.3.3 Design Change Charge

1. The Customer may request a design change to the service ordered. A design change is any change to a Business Network Exchange Access Order which requires engineering review. Design changes do not include a change of Customer premises, end user premises, end office switch. Changes of this nature will require the issuance of a new service order with appropriate cancellation charges applied.
2. An engineering review by Company personnel or underlying carrier personnel, of the service ordered and the requested changes determine what changes in the design, if any, are necessary to meet the changes requested by the Customer.
3. The Company will review the requested change and notify the Customer whether the change is a design change and if it can be accommodated and if a new service date is required. If the Customer authorizes the Company to proceed with the design change, the design change charge as specified in Section 11.5, following, will apply on a per occurrence basis. Additional Engineering charges may also apply on a case by case basis. If a change of service date is required, a Service Date Change Charge as set forth in Section 11.5, following, will also apply.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 11 - ACCESS SERVICE ORDER (CONT'D.)**

11.3. Access Order Modifications (Cont'd.)

11.3.4 Special Handling Charge

A Special Handling Charge will apply when a Customer requests a service date that is earlier than the Standard Interval service date for the Access Service ordered. A Special Handling charge will not apply if the Telephone Company does not complete the order in less than the standard interval. A Special Handling charge is not applied if the Telephone Company offers a less than standard interval and the Customer does not accept the offered date. A Special Handling charge will apply when a service date is changed at the request of the Customer (i.e., escalation to a higher level) from standard interval or greater to less than standard, and the order is completed by the date requested within less than standard interval.

A Customer may also request an earlier service date on negotiated interval Access orders. The request for an earlier service date may be received from the Customer prior to the issuance of an Access order, or after the Access order has been issued but prior to the service date.

The Company maintains exclusive right to accept or deny the request to expedite. If, upon reviewing availability of equipment and scheduled workload, the Telephone Company agrees to provide service on an expedited basis and the Customer accepts this proposal, a Special Handling Charge will apply.

In the event that the Telephone Company provides service on an expedited basis by Customer request and the Customer then delays service, a Service Date Change Charge will also apply as set forth in Section 11.3.1 preceding.

In the event that the Customer cancels an expedited request, a Cancellation Charge will apply as set forth in Section 11.4, following.

11.3. Access Order Modifications (Cont'd.)

11.3.5 Change in Quantities Ordered

1. Any decrease in the number of ordered special access channels associated with Business Exchange Network Access Services' will be treated as a partial cancellation.
2. Any increase in the number of special access channels associated with Business Exchange Network Access Services will be treated as new access order (for the increased amount only).

11.3.6 Changes to Accommodate Transmission Performance

If order modifications are necessary to satisfy the transmission performance for a Business Network Exchange Access Service ordered by a Customer, these changes will be made without order modification charges being incurred by the Customer.

11.3.7 Partial Cancellation

Any decrease in the number of special access channels associated with Business Network Exchange Access Service with a standard interval or negotiated interval access order will be treated as a partial cancellation.

**SECTION 11 - ACCESS SERVICE ORDER (CONT'D.)**

11.4. Cancellation of an Access Order

11.4.1 A Customer may cancel an Access Order for the installation of service at any time prior to notification by the Company that service is available for the Customer's use or prior to the service date, whichever is later. The cancellation date is the date the Company receives written or verbal notice from the Customer that the order is to be canceled. The verbal notice must be followed by written confirmation within ten (10) days. If a Customer or an end user is unable to accept Access Service within thirty (30) calendar days after the original service date, the Customer has the choice of the following options:

- The Access Order shall be canceled and charges set forth in Section 11.4.2.(A) following will apply, or
- Billing for the service will commence.

If no cancellation request is received within the specified thirty (30) calendar days, billing for the service will commence. In any event, the cancellation date or the date billing is to commence, as applicable, shall be the thirty-first (31st) day beyond the original service date of the Access Order.

**SECTION 11 - ACCESS SERVICE ORDER (CONT'D.)**

11.4. Cancellation of an Access Order (Cont'd.)

11.4.2 When a Customer cancels a Standard or Negotiated Interval Access Order for the installation of service, a Cancellation Charge will apply as follows:

- A. When the Customer cancels a Business Network Exchange Access Order, a charge equal to the estimated percentage or portion of the provisioning costs incurred at a particular date for the service ordered by the Company shall apply as set forth in Exhibit 11.4.2-1.
- B. If the Company misses a service date for a Standard or Negotiated Interval Access Order by more than thirty (30) days, due to circumstances such as acts of God, governmental requirements, work stoppages and civil commotions, the Customer may cancel the Business Network Exchange Access Order without incurring cancellation charges.

**SECTION 12 - CALL PACKS**

12.1 General

Call Packs are optional calling plans available to Customers who subscribe to either Voice Connectivity Service, as set forth in Section 7, preceding. Customers will have the choice of subscribing to any of twelve (12) options based on their Customer specific requirements. The twelve (12) options will be separated into two separate groups:

12.1.1 Call Packs A - F

Call Packs A - F will bundle Local Usage with Toll / Long Distance Usage for a flat monthly rate. Each Call Pack will contain a specified maximum number of local minutes and a specified maximum number of toll / long distance minutes per month. Call Packs are provided on a Month-to-Month basis with no minimum period. Call minutes used in excess of the pre-subscribed Call Pack maximum minute allowance will be rated at the default rate or the rate specified in the Voice Connectivity Service as set forth in Section 7, preceding.

12.1.2 Call Packs G - L

Call Packs G - L will bundle Unlimited Local Usage and Toll / Long Distance Usage for a flat monthly rate. Each Call Pack will provide Unlimited Local Usage and a specified maximum number of toll / long minutes per month. Call Packs are provided on a Month-to-Month basis with no minimum period. Toll / Long Distance Calls made in excess of the pre-subscribed Call Pack maximum minute allowance will be rated at the default rate or the rate specified in the Voice Connectivity Service as set forth in Section 7, preceding.

**SECTION 12 - CALL PACKS (CONT'D.)**

12.2 Rate Regulations

- 12.2.1 Discount plans do not reflect charges associated with monthly access, per channel charges, calling features, Direct Inward Dial (“DID”) numbers, account codes, Foreign Number Service (“FNS”) service or applicable taxes and surcharges.
- 12.2.2 Customers who exceed the maximum number of minutes will be charged a default rate for those minutes in excess of the maximum threshold each month.
- 12.2.3 Unused minutes cannot be carried over to the following month.
- 12.2.4 Special Customer premise equipment may be required.
- 12.2.5 Qualifying usage under these plans includes local, toll and long distance outbound and inbound 800.
- 12.2.6 This plan excludes usage associated with directory assistance, directory assistance call completion, calling card, operator services, and 900 service.
- 12.2.7 This plan cannot be combined with any other discount plans.
- 12.2.8 Customer desiring to upgrade their service package may do so without charge by entering into a new contract.
- 12.2.9 Customers desiring to downgrade their service package may do so by entering into a new contract and paying a service order charge as set forth in Section 3.6, preceding.

## FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE

---

### SECTION 13 - CTC CUSTOMIZER SERVICE

The rates provided in this section apply to Customers that are currently in a Service Term agreement with the Company. All Customers being provided Month-to-Month services through an expired service term or who have never had a contractual relationship with the Company will find the rates for their specific non-term services in Section 17 - Non-Term Rates.

#### 13.1 Local and Long Distance Customizer

##### 13.1.1 General

CTC Local and Long Distance Customizer Service (“Customizer”) is a flat rate bundled service offering. Customizer combines the monthly recurring charges for voice, data and / or Internet service channels provided via the CTC PowerPath<sup>SM</sup>, as set forth in Section 5, preceding, with usage packages as set forth in Section 13.3, following for one monthly rate. Customers subscribed to the Local and Long Distance Customizer will receive a maximum number of local and a maximum number of long distance minutes included with the service for a flat monthly rate. The monthly charge for access as set forth in Section 5, preceding, will be in addition to the monthly Customizer rate as set forth in Section 13.3, preceding.

##### 13.1.2 Service Description

Customers subscribing to Customizer will have the choice between Option 1 - Full T1 Customizer and Option 2 - Half T1 Customizer, as set forth in Section A. and B., following.

A. Option 1

Customers who subscribe to Full T1 Customizer will have the ability to choose between a full twenty-four (24) Channels of voice service only or twenty (20) channels of voice converged with CTC Data Services as set forth in this price guide and / or Internet Service. Customers who choose to utilize the ability to have converged service offerings may be required to have an Integrated Access Device and the remaining four (4) available channels of the T1 will be required to support such integrated access device.

B. Option 2

Customer who subscribe to the Half T1 Customizer will have to ability to choose voice service only, or a converged Half T1 with voice services, data and / or internet for up to a maximum twelve (12) service channels. Half T1 Customizer with converged service offerings may require an Integrated Access Device. The converged service offering will also require four (4) available channels to support such integrated access device. The four (4) channels will not affect the twelve (12) channels providing the Customizer services to the Customer.

**SECTION 13 - CTC CUSTOMIZER SERVICE (CONT'D.)**

13.1 Local and Long Distance Customizer (Cont'd.)

13.1.3 Application of Rates and Charges

- A. For purpose of this service, a month is considered to have thirty ( 30) days.
- B. Monthly rates are exclusive of applicable taxes and surcharges, charges associated with DID blocks, calling features, account codes and FNS service.
- C. Customers who exceed the maximum number of minutes will be charged a default rate as set forth in Section 6, preceding for those minutes in excess of the maximum threshold each month.
- D. Unused minutes cannot be carried over to the following month.
- E. Special Customer premise equipment may be required.
- F. Qualifying usage under these plans includes local, toll and long distance outbound and inbound 800.
- G. This plan excludes usage associated with directory assistance, directory assistance.
- H. This plan cannot be combined with any other discount plans.
- I. Customers desiring to upgrade their service package may do so without charge by entering into a new contract.
- J. Customers desiring to downgrade their service package may do so by entering into a new contract and paying a service charge as set forth in Section 2.14.2, preceding.

**SECTION 13 - CTC CUSTOMIZER SERVICE (CONT'D.)**

13.2 Unlimited Local and Long Distance Customizer

13.2.1 General

Unlimited Local and Long Distance Customizer Service (“Unlimited Customizer”) is a flat rate bundled service offering. Unlimited Customizer combines the monthly recurring charges for voice, data and / or Internet service channels provided via the CTC PowerPath<sup>SM</sup>, as set forth in Section 5, preceding, with usage packages as set forth in Section 13.2.2, following for one monthly rate. Customers subscribed to Unlimited Local and Long Distance Customizer will receive unlimited local calling and a maximum number of regional toll / long distance minutes for a flat monthly rate. The monthly charge for access as set forth in Section 5, preceding, will be in addition to the monthly Customizer rate as set forth in Section 13., preceding.

13.2.2 Service Description

Customers subscribing to Unlimited Customizer will have the choice between Option 1 - Full T1 Customizer and Option 2 - Half T1 Customizer, as set forth in Section A. and B., following.

A. Option 1

Customers who subscribe to Full T1 Unlimited Customizer will have the ability to choose between a full twenty-four (24) Channels of Voice only or Twenty (20) Channels of Voice converged with other CTC Data Services as set forth in this price guide and / or Internet Service. Customers who choose to utilize the ability to have converged service offerings are required to have an Integrated Access Device and the remaining four (4) channels of the T1 are required to support the such integrated access device.

B. Option 2

Customer who subscribe to the Half T1 Unlimited Customizer will have to ability to choose voice service only, or a converged Half T1 with voice services, data and / or internet for up to a maximum twelve (12) service channels. Half T1 Unlimited Customizer with converged service offerings may also require an Integrated Access Device. The converged service offering will also require four (4) channels to support the integrated access device. The four (4) channels will not affect the twelve (12) channels providing the Unlimited Customizer Services to the Customer.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 14 - VIRTUAL PRIVATE NETWORKS**

14.1 Frame Relay over DSL (FRoDSL)

14.1.1 General

At the request of Customers and where suitable facilities exist, the Company will provide Frame Relay Service over a Digital Subscriber Line (DSL) or Frame Relay over DSL (FRoDSL). Customers will be able to order FRoDSL via three (3) different types of DSL Circuits for Access; Symmetric DSL (SDSL), ISDN DSL (IDSL) and Asymmetric DSL (ADSL).

FRoDSL will be provided to Customers who wish establish data connectivity at remote Customer location(s) and virtually connect the remote to a host site. The Customer's host site must subscribe to Frame Relay Service as set forth in Section 8, of this price guide. At the remote site a Customer will have the ability to establish one (1) Permanent Virtual Circuit (PVC) and connect the PVC back to the Customer primary or host location.

14.1.2 Types of DSL Access

The Company will allow the Customer to choose between the three (3) types DSL Access for FRoDSL. The type of DSL Access chosen by the Customer subject to facilities and loop (or circuit) qualification. Loop qualification will be provided by the Company personnel. The Company will not restrict the Customer of its choice of DSL Access unless the type of DSL chosen is not available in that area or facilities do not exist.

DSL is a fast and reliable way to access the Company's Frame Relay Network. The technology allows you to take advantage of unused bandwidth that already exists on a telephone line. Regular telephone service uses less than one (1) percent of the capacity of an existing twisted pair of copper. This leaves the remaining ninety-nine (99) percent of the bandwidth for high speed data use.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 14 - VIRTUAL PRIVATE NETWORKS (CONT'D)**

14.1 Frame Relay over DSL (FRoDSL) (Cont'd.)

14.1.2 Types of DSL Access (Cont'd.)

A. Asymmetric DSL (ADSL)

ADSL is a technology that allows data to be sent over existing copper telephone lines (POTS). At the Customer's request the Company will provide ADSL as a means of access to the Company's Frame Relay Network which will allow the Customer a low cost Frame Relay Service solution at remote locations. ADSL allows the Customer to have an upstream rate and a different downstream rate. The upstream bandwidth rate is the speed data is transferred from the Customer's location to the Company's Frame Relay Network. The downstream bandwidth rate is the speed data is transferred from the Company's Frame Relay Network to the Customer premises. The downstream rate is always faster than the upstream rate. The upstream and the downstream speeds vary depending how far you are from the Company's Central office.

ADSL will be offered 2 different bandwidths 1.5 Mbps downstream rate with 384 Kbps upstream and 3.0 Mbps downstream and 764 Kbps upstream rate at the rates and charges as set forth in Section 14.1.5 , following. Actual speeds may be lower due to the impact of loop distance, modem technology and other factors. Therefore, these data speeds are not guaranteed.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 14 - VIRTUAL PRIVATE NETWORKS (CONT'D)**

14.1 Frame Relay over DSL (FRoDSL) (Cont'd.)

14.1.2 Types of DSL Access (Cont'd.)

B. Symmetric DSL (SDSL)

At the Customer's request the company will provide SDSL as a means of access to the Company's Frame Relay Network which will allow the Customer a low cost Frame Relay Service solution at remote locations. Symmetric DSL (SDSL), is a technology that allows data to be sent over existing copper telephone lines (POTS). SDSL works by sending digital pulses in the high-frequency area of telephone wires and cannot operate simultaneously with voice connections over the same wires. Unlike ADSL, SDSL is symmetric and will send and receive data at the same bandwidth. SDSL will be offered in bandwidth speeds of 192 Kbps, 384 Kbps, 768 Kbps, 1.1 Mbps, and 1.5 Mbps, at the rates and charges as set forth in Section 14.1, following. Actual speeds may be lower due to the impact of loop distance, modem technology and other factors. Therefore, these data speeds are not guaranteed.

C. Digital Subscriber Line over ISDN

Digital Subscriber Line over ISDN (IDSL), uses an ISDN circuit and runs at the same speed as ISDN. IDSL has an "always-on" connection. IDSL runs at 144 Kbps downstream and 144 Kbps upstream. One benefit of IDSL is that it supports users that are outside the normal distance limitations from the telephone CO (Central Office). IDSL is a great solution for those who want a dedicated connection but do not qualify for an ADSL or SDSL connection because of the mileage constraints. The data speeds listed above are maximum speeds. Actual speeds may be lower due to the impact of loop distance, modem technology and other factors. Therefore, these data speeds are not guaranteed.

**SECTION 14 - VIRTUAL PRIVATE NETWORKS (CONT'D)**

14.1 Frame Relay over DSL (FRoDSL) (Cont'd.)

14.1.3 Terms and Conditions

- A. The Company will provision and maintain FRoDSL service to the Network Interface Device at the Customer designated premises . The Customer is responsible for obtaining a compatible splitter and modem.
- B. The Customer will provide the Company with the necessary information (e.g., Customer name, Customer address) to provision FRoDSL.
- C. FRoDSL will be provided subject to the availability and limitations of Company Facilities.
- D. The Company will qualify copper facilities to determine the suitability of such facilities for FRoDSL Service served via copper facilities. The Company will not provide FRoDSL on copper facilities that are not suitable for the service. Nor will the company provide FRoDSL Service if it determines that such provision will produce interference to other services.
- E. The Company reserves the right to interrupt temporarily FRoDSL Service for facilities maintenance, software upgrades and in emergency situations.
- F. Customer will allow the Company's employees or agents to enter Customer designated premises at any reasonable hour for the purpose of installing, inspecting and repairing FRoDSL, or upon termination of removing the company's equipment.
- G. Customers subscribed to CTC FRoDSL via ADSL Access must also subscribe to a CTC POTS line as set forth in other CTC Tariffs and pricing sheets on file with the applicable Public Service Commission.

---

**SECTION 14 - VIRTUAL PRIVATE NETWORKS (CONT'D)**

14.1 Frame Relay over DSL (FRoDSL) (Cont'd.)

14.1.4 Application of Rates and Charges

- A. Customers subscribed to FRoDSL via ADSL, SDSL or IDSL access are subject to the rates and charges as set forth in Section 14.1.5, following.
- B. Customers subscribed to FRoDSL are subject to a Two (2) - year term agreement per arrangement ordered.
- C. Monthly Rates - A monthly recurring charge applies for each FRoDSL arrangement.
- D. Service Activation - a non-recurring charge applies for each service activation associated with each FRoDSL per arrangement ordered.
- E. Termination Liability - If a Customer elects to terminate the 2 year term plan for FRoDSL prior to the end of the commitment period, termination charges will apply. The Termination Liability Charge is set forth in Section 14.1.5, following.
- F. Expiration - At the expiration of the service term, the end user's service will continue on a month to month basis at the same rates and charges.
- G. Cancellation - Customers who subscribe to SDSL or IDSL are subject to a cancellation fee. End Users who enter into a confirmed order for SDSL or IDSL and cancel the order before the service is installed are subject to a cancellation charge as set forth in Section 14.1.5

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES**

The rates provided in this section apply to Customers that are currently in a Service Term agreement with the Company. All Customers being provided Month-to-Month services through an expired service term or who have never had a contractual relationship with the Company will find the rates for their specific non-term services in Section 17 - Non-Term Rates.

15.1 [Reserved for Future Use]

15.2 [Reserved for Future Use]

15.3 One Communications Features

15.3.1 One Communications Analog Voice Features and Service Options

**Call Forward Variable (All Calls)**

Customers can forward calls to another number. Calls can be forwarded to domestic, offshore (Hawaii, Alaska, U.S. Virgin Islands, Puerto Rico, Guam and Northern Marianas), or cellular numbers. The Customer manually enters the number to which calls will be forwarded. The Customer is billed any usage charges for the forwarded call. This feature can be activated and deactivated when needed from the Customer's own phone.

**Call Forwarding Remote Access**

Allows the Customer to activate and deactivate Call Forward Variable from any location. Call Forwarding Remote Access will only work when paired with Call Forward Variable. This feature can be activated/deactivated when needed from the Customer's own phone.

**Call Forward Busy**

Customer designates the number that the line will be forwarded under the conditions of busy. Calls can be forwarded to domestic, offshore, or cellular numbers. The Customer manually enters the number to which calls will be forwarded. The Customer is billed any usage charges for the forwarded call. This feature can be activated and deactivated when needed.

**Call Forward No Answer:**

Customer designates the number that the line will be forwarded under the conditions of no answer. Calls can be forwarded to domestic, offshore, or cellular numbers. The Customer manually enters the number to which calls will be forwarded. The Customer is billed any usage charges for the forwarded call. This feature can be activated and deactivated when needed.

---

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.3 One Communications Features (Cont'd.)

15.3.1 One Communications Analog Voice Features and Service Options (Cont'd.)

**Call Forward Busy/No Answer**

Customer designates the number that the line will be forwarded under the conditions of busy or no answer. Calls can be forwarded to domestic, offshore, or cellular numbers. The Customer manually enters the number to which calls will be forwarded. The Customer is billed any usage charges for the forwarded call. This feature can be activated and deactivated when needed.

**Three-Way Calling**

Allows the Customer to add a third party to an existing conversation utilizing a single line.

**Call Transfer**

Allows the Customer to transfer incoming calls to other destinations, internal or external. This feature also gives the Customer the ability to make three-way conference calls at no additional charge.

**Call Waiting**

Provides a short tone that lets the Customer know someone else is calling while they are on the phone. The first call can be put on 'hold' to allow the second call to be answered. This feature gives the Customer the ability to handle more than one call at a time.

**Caller ID Number**

Caller ID Number displays the originating number of an incoming call on a display unit provided by the Customer. The Company does not provide the digital display box needed to use this feature. Some numbers may not display for a variety of reasons, including:

- Calls placed through a long distance carrier
- Calls from an area where caller ID is not available
- Calls placed from cellular phones
- Calls from someone who has activated caller ID blocking

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.3 One Communications Features (Cont'd.)

15.3.1 One Communications Analog Voice Features and Service Options (Cont'd.)

Speed Dialing (8)

Allows the Customer to dial frequently called numbers by using a one-digit code. Each line can have its own individual list of speed dial numbers, up to a maximum of eight numbers. Speed dialing can be programmed with domestic, offshore, Canadian and other international numbers if there are no toll restrictions on the line. This feature can be activated and deactivated when needed from the Customer's own phone.

Enhanced Speed Dialing (30)

Allows the Customer to dial frequently called numbers by using a two-digit code. Each line can have its own individual list of speed dial numbers, up to a maximum of thirty numbers. Speed dialing can be programmed with domestic, offshore, Canadian and other international numbers if there are no toll restrictions on the line. This feature can be activated and deactivated when needed from the Customer's own phone.

Verified or Non-Verified Account Codes (analog or digital)

Account codes offer the Customer the ability to identify and track calls by user and/or department so they can easily review all calling records and charge back costs to specific departments or clients. Two types of account codes are offered: Verified and Non-Verified. Requests for more than 100 account codes must be made via special request. Verified or non-verified account codes with two to eight digits are available for intrastate interLATA and interstate long distance.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.3 One Communications Features (Cont'd.)

15.3.1 One Communications Analog Voice Features and Service Options (Cont'd.)

**Outbound Caller ID**

Outbound caller ID is the information that is sent from the Company to the caller ID unit on the terminating end of the call. The standard information sent is the account name and the billing telephone number (BTN). This feature has a character limitation of 15 characters.

**Multi-Line Hunting**

All local telephone lines that are part of the same account can be set up to hunt. Hunting allows calls to a line to rollover to the next available line in the group when the first line is busy. Customers can have more than one hunt group. Customers can also choose to leave individual lines out of a hunt group. Customers will have the ability to present Outbound Caller ID from either the lead line of the hunt group or an individual calling line.

**Caller ID Blocking**

Caller ID Blocking (also referred to as Call Privacy) allows Customers to block their name and number from being displayed on a caller ID unit at the terminating end of the call. This feature is turned on or off at the switch level and can be deactivated by the Customer on a per call basis.

**Anonymous Call Rejection**

Allows Customers to prevent callers who intentionally block their number from getting through on their line. This feature is only available to Customers with Caller ID Number or Caller ID Name & Number. This feature can be activated and deactivated when needed from the Customer's own phone.

---

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.3 One Communications Features (Cont'd.)

15.3.1 One Communications Analog Voice Features and Service Options (Cont'd.)

**Abbreviated Dialing**

Allows a Customer to dial only the last three, four, or five digits of a phone number that is associated with the Customer's physical service location. This feature works between multiple locations of the same Customer if all locations are within the same local calling area.

**Call Return**

A recording will give the Customer the number, date and time of the last incoming call. The Customer can have the number redialed automatically. If the last incoming call was blocked or the call was from a network with limited capabilities, the Customer will hear a message that the number they are trying to reach is private and cannot be called. Call Return will continue trying to connect the call for up to 30 minutes. This feature can be activated when needed from the Customer's own phone.

**Continuous Redial**

Automatically redials the most recent outgoing call, freeing the Customer to move on to other things, including using the phone for other calls. This feature can be activated and deactivated when needed from the Customer's own phone.

---

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.3 One Communications Features (Cont'd.)

15.3.1 One Communications Analog Voice Features and Service Options (Cont'd.)

**Caller ID Name and Number**

Caller ID Name and Number displays both the originating name and number of an incoming call on a display unit provided by the Customer. The Company does not provide the digital display box needed to use this feature. Some numbers may not display for a variety of reasons, including:

- Calls placed through a long distance carrier
- Calls from an area where caller ID is not available
- Calls placed from cellular phones
- Calls from someone who has activated caller ID blocking

**Call Waiting with Caller ID Name & Number**

This feature allows Customers to view the name and number of an incoming call while another call is already in progress. The name and number will be displayed on the incoming call after the first call waiting tone is heard. Feature functionality cannot be obtained by purchasing Caller ID and Call Waiting separately.

**Direct Line Connect**

Direct Line Connect allows an analog line to automatically dial a designated number whenever the originating line goes off-hook. This feature is assigned to a phone line that must be used only for one purpose. 911 cannot be the designated number.

**FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE**

---

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.3 One Communications Features (Cont'd.)

15.3.2 One Communications Digital and PRI Voice Features and Service Options

Standard or PRI Configuration

Standard 24B channel configuration with 56 kbps for each channel (8 kbps removed for signaling and call control) or PRI 23B + 1D configuration with 64 kbps clear channel on all B channels and signaling/call control on the D channel.

Hunting

- Lowest available channel: Use the lowest available channel in the lowest available DS1.
- Highest available channel: Use the highest available channel in the highest available DS1.
- Least idle: Use the available channel that has been idle for the shortest time.
- Most idle: Use the available channel that has been idle for the longest time. (PRI Only Option)

Direct Inward Dialing (DID)

Direct Inward Dialing enables the Customer to have fewer lines than extensions, while still having a unique number for each extension, callable from outside the Customer's location. The Company will allocate a range of telephone numbers and present them to the Customer's PBX so that the PBX can appropriately route the call based on the digits dialed.

Direct Outward Dialing (DOD)

Direct Outward Dialing allows subscribers within a Customer's PBX system to connect to outside lines directly. Using a DOD, Customers can provide each person or workstation within their company the ability to dial numbers directly.

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.3 One Communications Features (Cont'd.)

15.3.2 One Communications Digital and PRI Voice Features and Service Options (Cont'd.)

**Direct Inward Dialing and Direct Outward Dialing (DID/DOD)**

Both Direct Inward Dialing and Direct Outward Dialing may be furnished over the same facility.

**Outbound Caller ID Name & Number**

Outbound Caller ID Name & Number displays the subscriber's directory name and number on the caller ID device of the called party. This feature has a 15-character limitation.

**Inbound Caller ID Number Only**

Inbound Caller ID Number is only available with PRI service only and provides the number of the calling party to the party being called.

**Verified or Non-Verified Account Codes (analog or digital)**

Account codes provide Customers with the ability to identify and track calls by user and/or department. Two types of account codes are offered: Verified and Non-Verified. Requests for more than 100 account codes must be made via special request. Verified or non-verified account codes with two to eight digits are available for local, toll, intrastate interLATA and interstate long distance.

**ESF/B8ZS or D4/AMI Circuit Framing**

Extended Super Frame/Binary 8 Zero Suppression and D4/Extended Super Frame are the two framing configurations that are available with the Company's Digital Voice solutions. D4/AMI service is subject to availability.

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.3 One Communications Features (Cont'd.)

15.3.2 One Communications Digital and PRI Voice Features and Service Options (Cont'd.)

**Non-Facility Associated Signaling (NFAS) for ISDN PRI option**

NFAS allows a single D channel to control multiple PRI's. Customers who desire redundancy in the event of facility failure have the option of ordering additional backup D channels, which will be furnished for a charge.

**Inbound Caller ID Name & Number**

With Inbound Caller ID Name & Number, the name and number of the calling party is transmitted with a call and displayed on a Customer's Caller ID capable phone. The feature will not work if the Customer does not have PRI and Caller ID capable equipment.

**Direct Inward Dialing Number Blocks**

The Company will provide telephone numbers for direct inward dialing number service in blocks of 20, 50 or 100. A monthly recurring charge applies for each block ordered.

15.4 One Communications Pay Per Use Features

15.4.1 Description of Services

Charges for the following features are incurred on a per activation basis:

**Cancel Call Waiting**

When activated this feature suspends the call waiting service feature for the duration of a call.

**Per Call Return**

When activated this feature provides Customers with the number, date and time of the last incoming call. Customers also have the option to have the last called number redialed automatically. Feature available is subject to compatibility with network facilities and calling party user specifications.

**Continuous Redial**

Continuous Redial automatically redials the most recent outgoing call until the call is completed or the feature is deactivated.

**Per Call ID Blocking**

Per Call ID blocking allows Customers to block their name and number from being displayed on a Called Party's caller ID device

Per Call Display enables Customers to disable Caller ID Blocking on a line on a per call basis.

**Call Trace**

Call Trace enables Customers to initiate a trace of the most recent incoming call immediately after terminating the call. When activated the calling party number of the most recent call will be captured and stored by the company. Calling party information will only be released to Law Enforcement as required by law.

**Anonymous Call Rejection**

Anonymous Call Rejection allows a Customer to prevent callers who block delivery of their calling party information. This feature is only available to Customers with Caller ID Number or Caller ID Name and Number

15.5 One Communications Directory Listings

15.5.1 Description of Services

Customers are provided one free white page and one free yellow page main listing for each Billing Telephone Number (BTN). Customer's requiring special Yellow Page advertisements (i.e. a 3-color box ad in the yellow pages) must coordinate such arrangements directly with the applicable Publisher.

Customers may purchase additional white page listings for a monthly per listing fee. The following types of additional white page listings are available:

- Additional White Page Listing  
(includes extra listing, cross reference, duplicate, foreign, alternate number, extra line, reference, indented, toll-free, where available)
- Non Published (private)
- Non-Directory Listed (semi-private)
- National Toll-Free Directory Listing
- State Directory Toll-Free Assistance Listing
- Call Intercept

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.9 One Communications Toll-Free Service

15.9.1 Description of Services

One Communications Toll-Free Service offers Customers inbound calling where a toll-free number is provided for the purpose of receiving calls at no expense to the calling party.

One Solutions service packages provide Customers with a bundled number of toll and toll-free minutes per line for a flat monthly fee. Customers who exceed their allotted number of minutes in any given month will be billed a per minute rate on their overage minutes. One Communications Toll-Free service is not available on a standalone basis. A monthly recurring charge does not apply to the first toll-free number ordered, but does apply to additional toll-free numbers. Toll-free numbers must terminate to a valid phone number assigned in connection with a OneSolutions Essential or One Solutions Enhanced service package.

Toll-free numbers are reserved and assigned at random to each Customer from a general pool of available toll-free numbers provided to the Company.

Vanity numbers may be requested by the Customer; however, the Company does not guarantee the availability of any vanity numbers. Requests for vanity numbers are subject to a non-recurring charge.

15.9 One Communications Toll-Free Service (Cont'd.)

15.9.2 One Communications Toll-Free Service Features

The following features are available in conjunction with the Company's toll free service. Features can be ordered separately or in combination. A non-recurring charge applies when features are ordered, changed or disconnected subsequent to installation of the initial service:

**Info Digit Blocking**

Info Digit Blocking blocks calls based on the type of telephone from which the call originates, such as calls originating from payphones or prison phones.

**Info Digit Routing**

Info Digit Routing routes and controls calls based on telephone line type.

**Point of Origination Blocking (3/6/10 Digit Blocking)**

Point of Origination Blocking allows or blocks calls based on originating NPA, NPA-NXX or 10 digit numbers.

**Point of Origination Routing (3/6/10 Digit Routing)**

Point of Origination Routing routes calls to a predetermined location based on originating NPA, NPA-NXX or 10 digit numbers.

**Time of Day Routing (Time and Day of Week Routing)**

Time of Day Routing routes calls to different locations based on the time and day of the week.

**Day of Year Routing**

Day of Year Routing routes calls to a different location based on day of the year.

**Percent Call Allocation Routing**

Percent Traffic Allocation routing provides Customers with the ability to route calls to different locations based on a predetermined percentage of calls received.

**Pre-Defined Alternative Routing Profiles**

Pre-Defined Alternative Routing establishes alternate routing profiles, which can be activated in various predefined situations.

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.10 One Communications Cancellation and Early Termination of Service

15.10.1 Cancellation of Service

If Customer elects to cancel the service prior to installation, Customer shall owe the Company an amount equal to one month's recurring charge for the service plus (II) the non-recurring charge for such service set forth in this price guide. The Customer will also be liable to the Company for any direct costs incurred by the Company as a result of the service cancellation (including any cancellation or early termination fees imposed on the Company by any service provider that was to be utilized to deliver the cancelled service).

15.10.2 Early Termination of Service

If Customer elects to terminate all or any portion of a service furnished pursuant to a fixed-term agreement subsequent to the service installation date but prior to the end of the fixed-term, Customer shall owe the Company an amount equal to the applicable monthly recurring charge for the disconnected service(s) or portion of service multiplied by the number of months remaining in the selected term. The Customer will also be liable to the Company for any direct costs incurred by the Company as a result of early termination (including any cancellation or early termination fees imposed on the Company by any service provider that was utilized to deliver the terminated service).

FACILITIES BASED LOCAL EXCHANGE SERVICES PRICE GUIDE

---

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.13 OneSolutions Essential

15.13.1 General

OneSolutions Essential service is a multifunctional service that provides voice and high speed asymmetrical data services to business Customers on an integrated basis over a single high-speed transmission facility. OneSolutions Essential service is only available where suitable facilities permit.

Customers selecting OneSolutions Essential will receive:

- Three initial analog voice DS0 channels and up to three additional DS0 voice grade DS0 channels, which may be purchased on an optional basis.
- Unlimited local calling.
- 250 domestic toll and toll-free minutes per line. Minutes will be aggregated across all voice grade DS0 channels included in the OneSolutions Essential service package (limit of 6 DS0s per service package). Included minutes not used within the billing cycle are lost.
- The following analog voice features are included at no additional charge with OneSolutions Essential: Call Forward Variable (all calls), Call Forwarding Remote Access, Call Forward Busy, Call Forward No Answer, Call Forward Busy/No Answer, Three-Way Calling, Call Transfer, Call Return, Call Waiting, Caller ID Number, Distinctive Ring, Group Call Pick-Up, Continuous Redial, Speed Dialing (8), Enhanced Speed Dialing (30), Assume or Dial 9, Abbreviated Dialing, Voice Mail, Verified or Non-Verified Account Codes, Outbound Caller ID (CNAM), Multi-Line Hunting, Caller ID Blocking, Anonymous Call Rejection, Call Hold, Touch Tone. Customers that choose OneSolutions Essential may purchase additional One Communications Analog Voice Features at rates set forth in this price guide.
- High-speed data services at speeds of up to 1.5 Mbps downstream and 768 kbps upstream. Upgrade options for bandwidth at 3 Mbps downstream/768 kbps upstream or 7.1 Mbps downstream/768 kbps upstream may be purchased for an additional MRC.
- One toll-free number.

---

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.13 OneSolutions Essential (Cont'd.)

15.13.2 Restrictions

- The maximum number of voice grade DS0 channels that can be ordered with a OneSolutions Essential service package is six. Additional lines purchased outside of OneSolutions Essential are available to Customers and will be provided in accordance with the rates, terms and conditions set forth in the Company's M.P.S.C. - No. 3 - Telephone.
- A measured rate (per minute) will apply to domestic toll and toll-free usage in excess of OneSolutions Essential maximum of 250 minutes per DS0 channel (minutes aggregated across all lines that are part of OneSolutions Essential).
- Unlimited local usage applies only to voice grade DS0 channels included in the OneSolutions Essential service package.
- Unlimited local minutes included under OneSolutions Essential will only apply to voice grade service and is not available for the following types of applications:
  - Call centers, telemarketers and other companies that utilize auto-dialer or like applications.
  - Internet dial up connections and other data applications (including access to corporate LANs).
- Calls to Directory Assistance, Operator Assisted and third party billed calls, international calls, and calls to Canada and Mexico are not included in the OneSolutions Essential local and toll calling plans. Directory and Operator Assisted Calls will be billed in accordance with the rates and charges set forth in the One Communications Operator Services and Directory Assistance section of this price guide. Calls to Canada, Mexico and International locations will be billed in accordance with the Company's standard published rates.

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.13 OneSolutions Essential (Cont'd.)

15.13.2 Restrictions (Cont'd.)

- Toll-free numbers are available for use but are not the property of the Customer and cannot be sold or assigned without the Company's permission.
- Customers that order OneSolutions Essential must pre-subscribe to the Company's toll and Long Distance service.
- Customer-premises equipment must be compatible with Company provided equipment including but not limited to any integrated access device (IAD) that the Company may install on the Customer's premise. Unless otherwise agreed to in writing, any IAD or other equipment installed by the Company at the Customer's premise shall, at all times remain the property of the Company. Upon termination of service, the Customer will provide the Company reasonable access to the Customer's premises for purposes of removing Company-provided equipment. In the event the Customer fails to provide the Company with said access or should Company-provided equipment be returned to the Company in worse condition than that which could be reasonably expected from normal use and wear, then Customer will be liable to the Company for the then current replacement cost of such equipment.
- Alarm lines are not available with a OneSolutions Essential service package.

15.14 OneSolutions Enhanced

15.14.1 General

OneSolutions Enhanced service provides business Customers with channels of analog or digital voice, high-speed data and as well as intra-company private networking services on an integrated basis via a single transmission facility. OneSolutions Enhanced service is only available where suitable facilities exist.

Customers selecting OneSolutions Enhanced will receive:

- Six voice channels. Up to nine additional voice channels may be purchased as part of OneSolutions Enhanced service package.
- Unlimited local calling.
- 500 domestic toll and toll-free minutes per line. Minutes will be aggregated across all channels included in a OneSolutions Enhanced service package (limit of 15 channels per service package). Allotted minutes not used within a given month are lost and may not be carried over to subsequent months.
- The following analog voice features are included at no additional charge with OneSolutions Enhanced: Call Forward Variable (all calls), Call Forwarding Remote Access, Call Forward Busy, Call Forward No Answer, Call Forward Busy/No Answer, Three-Way Calling, Call Transfer, Call Return, Call Waiting, Caller ID Number, Distinctive Ring, Call Pick-Up, Continuous Redial, Speed Dialing (8), Enhanced Speed Dialing (30), Assume or Dial 9, Abbreviated Dialing, 5 Voice Mail boxes, Verified or Non-Verified Account Codes, Outbound Caller ID (CNAM), Multi-Line Hunting, Caller ID Blocking, Anonymous Call Rejection, Call Hold, Touch Tone. Customers that choose OneSolutions Enhanced may purchase additional One Communications Analog Voice Features at rates set forth in this price guide.

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.14 OneSolutions Enhanced (Cont'd.)

15.14.2 Restrictions

- The maximum number of voice channels that can be ordered under a OneSolutions Enhanced service package is fifteen. Where available, additional lines or channels can be ordered outside of the One Solutions Enhanced service package, provided however, that such additional lines or channels will be provided at the Company's standard market rates. Usage on such additional lines or channels is excluded from the calling plans offered in connection with OneSolutions Enhanced service.
- A measured rate (per minute) will apply to domestic toll and toll-free usage in excess of OneSolutions Enhanced maximum of 500 minutes per line (minutes aggregated across all lines that are part of OneSolutions Enhanced).
- Unlimited local usage applies only to voice channels that are furnished in connection with the OneSolutions Enhanced service package.
- Unlimited local minutes included under OneSolutions Enhanced will only apply to voice grade service and is not available for the following types of applications:
  - Call centers, telemarketers and other companies that utilize auto-dialer or like applications.
  - Internet dial-up connections and other data applications (including access to corporate LANs).
- Calls to Directory Assistance, Operator Assisted and third party billed calls, international calls, and calls to Canada and Mexico are not included in the OneSolutions Enhanced local and toll calling plans. Directory and Operator Assisted Calls will be billed in accordance with the rates and charges set forth in the One Communications Operator Services and Directory Assistance section of this price guide. Calls to Canada, Mexico and International locations will be billed in accordance with the Company's standard published rates.

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.15 OneSolutions Complete

15.15.1 General

OneSolutions Complete is a converged service capable of providing voice, Internet and data services delivered via IP to the Customer's service location. Customers may choose a voice only, a voice and Internet only or a voice, Internet and MPLS VPN configuration. OneSolutions Complete is available only for business Customers. Additional charges may apply to Customers who reside in rate centers where the Company does not have a node. Service is only available where suitable facilities exist.

Customers who subscribe to OneSolutions Complete will be provided with the option to purchase service bundled with a package of 100,000 local minutes. Allotted minutes not used within a given month are lost and may not be carried over to subsequent months.

Customers will also have the option to purchase Call Packs of Domestic Toll Minutes (includes Local Toll, Domestic Toll and Domestic Toll-Free).

The following analog voice features are included at no additional charge with OneSolutions Complete: Call Forward Variable (all calls), Call Forwarding Remote Access, Call Forward Busy, Call Forward No Answer, Call Forward Busy/No Answer, Three-Way Calling, Call Transfer, Call Waiting, Caller ID Number, Distinctive Ring, Group Call Pick-Up, Speed Dialing (8), Enhanced Speed Dialing (30), Assume or Dial 9, Abbreviated Dialing, Verified or Non-Verified Account Codes, Outbound Caller ID (CNAM), Multi-Line Hunting, Caller ID Blocking, Anonymous Call Rejection and Call Hold. Customers may purchase additional One Communications Analog Voice Features at rates set forth in this price guide.

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.15 OneSolutions Complete (Cont'd.)

15.15.2 Restrictions

- Lines purchased with packages of calls or minutes may not be available for the following types of applications:
  - Call centers, telemarketers and other companies that utilize auto-dialer or like applications.
  - Internet dial up connections and other data applications (including access to corporate LANs).
  - Calls to Directory Assistance, Operator Assisted and third party billed calls, international calls, and calls to Canada and Mexico are not included in the One Communications OneSolutions Complete service local and toll calling plans. Directory and Operator Assisted Calls will be billed in accordance with the rates and charges set forth in the One Communications Operator Services and Directory Assistance section of this price guide. Calls to Canada, Mexico and International locations will be billed in accordance with the Company's standard published rates.
  - Alarm lines are not available as part of OneSolutions Complete.
  - Toll-free numbers are available for use but are not the property of the Customer and cannot be sold or assigned without the Company's permission.
  - Customer-premises equipment must be compatible with Company provided equipment including but not limited to any integrated access device (IAD) that the Company may install on the Customer's premise. Unless otherwise agreed to in writing, any IAD or other equipment installed by the Company at the Customer's premise shall, at all times remain the property of the Company. Upon termination of service, the Customer will provide the Company reasonable access to the Customer's premises for purposes of removing Company-provided equipment. In the event the Customer fails to provide the Company with said access or should Company-provided equipment be returned to the Company in worse condition than that which could be reasonably expected from normal use and wear, then Customer will be liable to the Company for the then current replacement cost of such equipment.

---

**SECTION 15 - ONE COMMUNICATIONS SERVICES, RATES AND CHARGES (CONT'D.)**

15.15 OneSolutions Complete (Cont'd.)

15.15.3 Application of Rates

A. Basic Monthly Recurring Charges

Monthly recurring charges as described below apply to Customers who subscribe to One Communications OneSolutions Complete service under one, two or three year term contracts.

B. Local Usage

Local usage is provided on a measured, per minute basis. Local usage rates will apply to service not ordered as bundled with a package of 100,000 local minutes. Customers who exceed their allotted number of local minutes in any given month will be billed a per minute rate on their overage minutes (local usage rate will apply).

C. Domestic Toll Usage

Domestic toll service (includes Local Toll, Domestic Toll and Domestic Toll-Free) is furnished on a usage sensitive basis and is subject to a per minute rate. Domestic toll usage rates will apply to service not ordered with a Call Pack of domestic toll minutes. Customers who exceed their allotted domestic toll usage Call Pack of minutes in any given month will be billed a per minute rate on their overage minutes.
