UNIVERSAL EMERGENCY NUMBER SERVICE (911)

12. UNIVERSAL EMERGENCY NUMBER SERVICE (911)

12.1. GENERAL DESCRIPTION

12.1.1. Universal Emergency Number Service is a telephone exchange communication service whereby a Public Safety Answering Point (PSAP) designated by the customer may receive and answer telephone calls placed by dialing number 911.

12.1.2. 911 Service is offered subject to the availability of facilities.

12.1.3. The 911 Service customer may be a municipality or other state or local government unit, or an authorized agent of one or more municipalities or other state or local governmental units to whom authority has been lawfully delegated. The customer must be legally authorized to subscribe to the service and have public safety responsibility to respond to telephone calls from the public for emergency police and fire service within the telephone central office areas arranged for 911 Service calling.

12.1.4. Two types of 911 Service are offered: B911 and E911.

12.1.5. The service may be provided by the Company or jointly by the Company and another Local Exchange Carrier.

12.2. RULES AND REGULATIONS

12.2.1. This service is limited to the use of central office telephone number 911 as the universal emergency telephone number. Only one 911 service will be provided within any government agency's locality.

12.2.2. The 911 emergency telephone number is not intended to be a total replacement of the telephone service of the various public safety agencies which may participate in the use of this number and the public safety agencies must subscribe to other telephone service as provided in paragraph 12.2.20 following.

12.2.3. The service is furnished to the customer only for the purpose of receiving reports of emergencies by the public.

12.2.4. 911 Service will be provided to only one PSAP for calling from any telephone number within any central office serving area, except that E911 Service may be provided to more than one PSAP within a central office serving area if the Selective Routing Feature (SR) is provided. When E911 Service is furnished to a customer with the Selective Routing Service Feature for a part of a central office serving area, if a request is received from a governmental unit with police and fire public safety responsibility for other parts of the central office serving area, that governmental unit must subscribe to a combination of E911 Service Features which includes the Selective Routing Service Feature.

12.2.5. 911 Service is a telephone exchange communications service and is arranged for one-way incoming service to an appropriate PSAP. Outgoing calls can only be made on a transfer basis with E911 Service only.

UNIVERSAL EMERGENCY NUMBER SERVICE (911)

12. UNIVERSAL EMERGENCY NUMBER SERVICE (911) (Continued)

12.2 RULES AND REGULATIONS (Continued)

- 12.2.6. 911 Service is provided solely for the benefit of the municipal customer; the provision of such service shall not be interpreted, construed or regarded as being for the benefit of, or creating any Company obligation toward, or any right of action on behalf of, any third person or other legal entity.
- 12.2.7. The Company does not undertake to answer and forward E911 Service calls, but furnishes the use of its facilities to enable the customer's personnel to respond to such calls on the customer's premises.
- 12.2.8. Temporary suspension of service is not provided for any part of 911 Service.
- 12.2.9. 911 Service information consisting of the name, address and telephone numbers of telephone customers whose listings are not published in directories or listed in directory assistance offices is confidential and the customer agrees to use such information only for the purpose of responding to emergency 911 Service calls.
- 12.2.10. The 911 Service calling party forfeits the privacy afforded by non-listed and non-published service to the extent that the telephone number and the address (and name of business accounts only) associated with the originating station location are furnished to the PSAP at the time the call is originated.
- 12.2.11. Central offices that are not currently equipped to transmit ANI will not be modified to provide ANI just for 911 Services. When the SR or ANI Service Features are provided, in such circumstances, default routing will be provided in lieu of selective routing and/or ANI display.
- 12.2.12. The Automatic Location Identification feature of the E911 System is dependent upon Automatic Number Identification (ANI) being provided by the Company central office serving the caller. ANI will only be provided on single-party lines.
- 12.2.13. The Company's entire liability to any person, including other Exchange Carriers who participate in the joint provisioning of 911 Service, for interruption or failure of 911 Service shall be limited by the terms set forth in this schedule and other schedules of this price list.
- 12.2.14. The rates charged for any 911 Service do not include, and the Company does not undertake, inspection or constant monitoring to discover errors, defects and malfunctions in the service. The customer shall have the responsibility of discovering all errors, defects and malfunctions, and assumes the duty of, and will make such tests as, in the judgment of the customer, are required to determine whether the system is functioning properly for its use. The customer shall promptly notify the Company in the event the system is not functioning properly.

UNIVERSAL EMERGENCY NUMBER SERVICE (911)

12. UNIVERSAL EMERGENCY NUMBER SERVICE (911) (Continued)

12.2 RULES AND REGULATIONS (Continued)

- 12.2.15. The Company shall not be liable for any loss or damages arising out of errors, interruptions, defects, failures, or malfunctions of 911 Service including any and all equipment and data processing systems associated therewith. Damages arising out of such interruptions, defects, failures, or malfunctions of the system after the Company has been so notified, and has had a reasonable time for repair, shall in no event exceed an amount equivalent to the charges made for the service affected for the period following notice from the customer until service is restored.
- 12.2.16. 911 Service is furnished subject to all operating failures and interruptions including, but not limited to, equipment breakdowns, errors, defects, malfunctions and interruptions of service experienced in the regular telephone exchange system. 911 Service is furnished subject to any additional forms of service failures and service degradations resulting from the complexity of the service arrangement, program errors and failures, delays and errors in the input and processing of data used by the Data Management System (DMS) associated with the E911 Service arrangement. The rates provided for this service are subject to the limitations which appear in this schedule and in other schedules of this and other price lists.
- 12.2.17. 911 Service will be designed by the Company to provide at least the same level of service reliability and quality as local exchange telephone service in the exchanges where 911 Services are offered.
- 12.2.18. Because the Company serving boundaries and political subdivision boundaries may not coincide, the customer must make arrangements to handle all calls received on its 911 Service lines that originate from all telephones served by central offices within the 911 Service Area whether or not the calling telephone is situated on property within the geographical boundaries at the customer's public safety jurisdiction.
- 12.2.19. Application for 911 Service must be executed in writing by each customer. If application for service is made by an agent, the Company must be provided in writing with satisfactory proof of appointment of the agent by the customer. At least one local law enforcement agency must be included among the participating agencies in any 911 Service request.

UNIVERSAL EMERGENCY NUMBER SERVICE (911)

12. UNIVERSAL EMERGENCY NUMBER SERVICE (911) (Continued)

12.2 RULES AND REGULATIONS (Continued)

12.2.20. In addition to all other terms and conditions, the following applies:

- A. All 911 Service calls will be answered 24 hours a day, seven days a week.
- B. The customer has the responsibility for dispatching the appropriate emergency service within the 911 Service Area, or will undertake to transfer all 911 service calls received to the governmental agency with responsibility for dispatching such services, to the extent that such services are reasonably available.
- C. The customer will develop an appropriate method for responding to calls for non-participating agencies which may be directed to 911 Service PSAP by calling parties.
- D. The customer will subscribe to a sufficient number of interoffice facilities and 911 exchange lines, as determined by the Company, to adequately handle incoming calls but in all cases subject to a minimum of two facilities or lines required at any point in the 911 network including the 911 exchange lines terminated at the PSAP. For 911 exchange line groups from an E911 control office to a secondary answering location used for central office transfer purposes only, the line quantity may be determined by the customer and could result in only one line being provided.
- E. The customer will subscribe for additional local exchange service at the PSAP location for administrative purposes, for placing of outgoing calls and for receiving other emergency calls including any which may be relayed by Company operators.

12.2.21. When the SR Service Feature is provided (E911), the customer is responsible for identifying primary and secondary PSAP locations as well as the unique combinations of police, fire and ambulance or any other appropriate agencies responsible for providing emergency service within various portions of the E911 Service area. An Emergency Service Number (ESN) will be provided by the Company for each such combination. The customer will associate these ESNs with street address ranges or other mutually agreed upon routing criteria in the E911 Service area. The ESNs will be carried in the DMS to permit routing of E911 Service calls to the appropriate primary and secondary PSAPs responsible for handling E911 Service calls from each telephone in the E911 Service area.

The customer's responsibility for providing this information is as follows:

- A. Initial and subsequent ESN assignments by street name, address range and area or other mutually agreed upon routing criteria shall be furnished to the Company by the customer on forms supplied by the Company for that purpose at a mutually agreed upon time prior to the effective date of the service.

12. UNIVERSAL EMERGENCY NUMBER SERVICE (911) (Continued)

12.2 RULES AND REGULATIONS (Continued)

12.2.21 (Continued)

- B. If the customer establishes new street names and/or address ranges where they did not previously exist, it shall be the customer's responsibility to notify residents in the affected area(s) of the new street names and/or address ranges. If the customer desires to have the new street names and/or address ranges reflected in the DMS (E911), it shall also be the customer's responsibility to provide the Company with a cross-reference listing of all residents of the affected area(s), showing old address and new address for each resident.
- C. After establishment of service, it is the customer's responsibility to continually verify the accuracy of the routing information contained in the master address file and to advise the Company of any changes in street names, establishment of new streets, changes in address numbers used on existing streets, closing and abandonment of streets, changes in police, fire, ambulance or other appropriate agencies' jurisdiction over any address, annexations, and other changes in municipal and county boundaries, incorporation of new cities, or any other matter that will affect the routing of E911 Service calls to the proper PSAP.
- D. Changes, deletions and additions which the customer desires to have made in the master address file should be submitted as they occur; these changes, deletions and additions should be submitted on forms supplied by the Company.

12.2.22. Cancellation of the service in whole or in part by the customer prior to establishment thereof will require payment of an amount equal to the cost of engineering, manufacturers' billings resulting from equipment orders, installation, assembly, labor, cost of removal and any other costs incurred up to the time of cancellation resulting from the customer's order for service, but not to exceed the total non-recurring charges.

12.2.23. Each customer and any Local Exchange Carrier that participates in the joint provisioning of 911 Service agree to release, indemnify, defend and hold harmless the Company from any and all loss, claims, demands, suits or other action, or any liability whatsoever, whether suffered, made, instituted or asserted by the customer or by any other party of person, for any personal injury to or death of any person or persons, or for any loss, damage or destruction of any property, whether owned by the customer or others.

UNIVERSAL EMERGENCY NUMBER SERVICE (911)

12. UNIVERSAL EMERGENCY NUMBER SERVICE (911) (Continued)

12.2 RULES AND REGULATIONS (Continued)

12.2.24. The customer and any Local Exchange Carrier that participates in the joint provisioning of 911 Service also agree to release, indemnify and hold harmless the Company for any infringement or invasion of the right of privacy of any person or persons, caused or claimed to have been caused, directly or indirectly, by the installation, operation, failure to operate, maintenance, removal, presence, condition, occasion or use of 911 Service features, or by any services furnished by the Company in connection therewith, including, but not limited to, the identification of the telephone number, address or name associated with the telephone used by the party or parties accessing 911 service hereunder, and which arise out of the negligence or other wrongful act of the Company, the customer, its user, agencies or municipalities, or the employees or agents of any one of them.

12.2.25. The use of Automatic Location Identification (ALI) on anything less than a total E911 System basis is not permitted.

This feature enables the customer to view on a display unit the telephone name and number on incoming telephone calls. When Caller ID is activated on a customer's line, the telephone name and numbers of incoming calls are displayed on the called customer premise equipment during the first long, silent interval of the ringing cycle. The telephone name and numbers that will be displayed on a Caller ID subscribers display unit include listed, non-listed, and non-published telephone name and numbers. Caller ID is not available on operator-handled calls. If the incoming call is from a caller served by a PBX or multi-line hunt group, only the main name and number of the PBX or hunt group is transmitted and available for display.

If the customer's line is busy, and another incoming call attempt is made, the telephone name and number of that calling party will not be disclosed even if the called number has Call Waiting. The customer has the option of turning off the display device to suspend the display of incoming calling numbers.

Callers placing calls to customers subscribing to Caller ID have the ability to prevent their telephone name and numbers from being disclosed to the called party on a per call basis by utilizing Per Call Blocking (See following). The prevention of the disclosure of their telephone name and numbers is accomplished by dialing a special code before dialing the telephone number. The special code must be dialed prior to every call made in which the calling party does not want the telephone name and number disclosed. If the called party has a display device, a privacy indication will appear instead of the calling party's telephone name and number.

Callers placing calls to customers subscribing to Caller ID may also prevent the disclosure of their telephone name and numbers on a per line basis by subscribing to Per Line Blocking (See following). This service will prevent the display of the calling party's name and number on all calls originating on that line. A privacy indication will appear on the display unit instead of the calling party's telephone name and number on all calls.

Any customer subscribing to Caller ID will be responsible for the provision of a display device, which will be located on the customer's premise. The installation, repair and technical capability of that equipment to perform in conjunction with the feature specified will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to function satisfactorily with the network features described herein.

MISCELLANEOUS SERVICES

14. MISCELLANEOUS SERVICES

14.3 PER CALL BLOCKING

Per Call Blocking enables customers to prevent the disclosure of their telephone number on a per call basis to the called party. The disclosure of the calling party's number can be prevented on a per call basis by dialing a preassigned access code before making a call. This action must be repeated each time a call is made to prevent the disclosure of the calling party's telephone number. If the called party has a display device, a privacy indication will appear instead of the calling party's telephone number. The service is provided at no charge, and is automatically placed on all telephone lines by the Company.

Per Call Blocking does not prevent the delivery of telephone numbers to 911 emergency service providers.

14.4 PER LINE BLOCKING

Per Line Blocking prevents the disclosure of the customer's telephone number to the called party. Per Line Blocking is applicable on all outgoing calls placed from the customer's line. If the called party has a display device, a privacy indication will appear instead of the calling party's telephone number. Customers may deactivate the feature by entering a code. Per Line Blocking is provided at no charge, but is a feature which must be ordered by the customer. Requests for removal of Per Line Blocking will be completed at no charge, and the service will be converted to Per Call Blocking.

Per Line Blocking does not prevent the display of originating telephone numbers to 911 emergency service providers.
